*Your emergency specialist catalog*

*Dear Sir or Madam*

*Dear Sirs,*

Herewith you receive our current emergency catalog.

On the following 96 pages, the catalog offers you a compilation of our product range in the areas of ventilation, intubation, resuscitation, trauma, immobilisation, transport, first aid, bags, backpacks, cases and much more.

In addition to products from our own brands 'Lifeguard Emergency Products' and 'Lifeguard Tactical Products', you will also find products from the brands Plum, Cederroth, Burnshield, HemCon and many more.

As a long-standing professional supplier of medical products, we know what is important to our customers: that is why we offer you technical service in addition to good delivery availability and expert advice.

All products are available through our wide network of medical retailers.

You can also obtain this and other catalogs online as a flipping book or download at:

[www.lifeguard-emergency-products.de/kataloge-zum-blaettern](http://www.lifeguard-emergency-products.de/kataloge-zum-blaettern)

Have fun browsing through and exploring our product range.

Yours sincerely

***Your Lifeguard Team***

We are certified  
according to DIN EN ISO 13485:2021

### Bacteria filter

Designed for use with anaesthetic and respiratory equipment to protect patients from exposure to bacteria. Qualified for use with emergency resuscitators and it can be added between the mask and a resuscitator bag. The exhalation is filtered, leaving the resuscitator free of bacteria. The standard connection of 22 mm /15 mm fits all devices and accessories.

Weight: 38 gr.  
Bacterial filtration: 99.999%

**RESQ-BREEZER**  
RESUSCITATOR BAG

#### PVC-Cushion mask

Transparent mask enabling a clear view and monitoring of the patient. The inflatable cushion allows an individual hardness adjustment. Thus, the mask adapts optimally to the facial contours and brings absolute tightness. The mask is suitable as a supplement to a resuscitator, in inhalation therapies or in anesthesia. The masks are DEHP-free for the safety of the patient. Including hook ring for attachment with a head strap.

Single packed, non autoclavable, single use

**RESQ-BREEZER**  
RESUSCITATOR BAG

#### RESQ-Breezer Silicone Line One-Piece Face Mask

Autoclavable up to 134 °C.

| Type             | SU      | REF   | Price SU |
|------------------|---------|-------|----------|
| Size 0 Neonates  | 1 piece | E5 01 | 10,00    |
| Size 1 Infant    | 1 piece | E5 02 | 10,00    |
| Size 2 Pediatric | 1 piece | E5 03 | 10,00    |

## Transport case

Made of strong, durable, transparent plastic, empty.

| Type          | Dimensions         | SU      | REF      | Price SU |
|---------------|--------------------|---------|----------|----------|
| Transport box | 340 x 145 x 135 mm | 1 piece | E5 017GU | 10,40    |

## Catheter mount super-set

The catheter mount super-set can be adjusted to any position thanks to the "accordion design". This allows the dead space to be adjusted from 15-36 ml and the length to be adjusted from 70 to 150 mm.

With adapter, 22 mm outer diameter / 15 mm inner diameter.

| Type                     | SU      | REF     | Price SU |
|--------------------------|---------|---------|----------|
| Catheter mount super-set | 1 piece | H7 3504 | 1,60     |

## Continuous anaesthesia and humidification hose

The rolls are 50 meters long and suitable for 22 mm standard connections. Ideal for all inhalation, intensive care and anaesthesia applications. Separable at 40 cm intervals.

Also fits roll dispenser, conforms to DS/ISO NORM 5367

| Type          | Length | SU     | REF     | Price SU |
|---------------|--------|--------|---------|----------|
| Flexible hose | 50 m   | 1 roll | F5 1201 | 128,70   |

## Lifeguard Mouth wedge

Made of blue rubber, conical.

| Type        | Dimensions      | SU      | REF       | Price SU |
|-------------|-----------------|---------|-----------|----------|
| Mouth wedge | 85 x 24 x 17 mm | 1 piece | I7 610000 | 3,40     |

## POCKET-BREEZER

### Pocket-Breezer

The foldable pocket mask ensures the safety of the lifesaver giving artificial respiration. The mouthpiece has a bacterial filter and a one-way valve for the safety of the patient. The valve is positioned between the mouthpiece and air-cushioned mask to reduce the risk of infection.

The close-fitting mask possesses an attachment strap and folds into itself for easy storage. Additionally, it has got a bacterial filter for the patients safety.

Comes in a practical Lifeguard pocket-box.

| Type                     | SU      | REF     | Price SU |
|--------------------------|---------|---------|----------|
| Pocket Breezer, complete | 1 piece | N4 2050 | 9,15     |

## QUICK-BREEZER

### Quick-Breezer Face shield

Rapid resuscitation

The resuscitation face shield includes a mouthpiece and an exhalation valve. Comes in a protective, round container that can be used as a key ring. Complete with face shield and chain.

| Type                               | SU      | REF     | Price SU |
|------------------------------------|---------|---------|----------|
| Quick Breezer face shield in a box | 1 piece | N4 4054 | 3,10     |

## QUICK-BREEZER

### Quick-Breezer ECO Face shield

Rapid resuscitation

The simple resuscitation face shield without a mouthpiece for protecting helpers and patients. Comes in an alu blister and provides:

- » Safety and hygiene during mouth to mouth and mouth to nose resuscitation
- » Very easy handling with the help of a brief instruction
- » With minimum space requirements

| Type                                                                            | SU      | REF     | Price SU |
|---------------------------------------------------------------------------------|---------|---------|----------|
| Quick Breezer ECO face shield, packed singly in alu-blister; without mouthpiece | 1 piece | N4 4000 | 1,60     |

## Oxygen Cylinders

Filled with medical oxygen, white, light-metal cylinder, 200 bar, with residual pressure valve, DIN standard.

**NOTE: Medical oxygen is a hazardous substance.** It is a medical product with a shelf life of 2 years! New: with RPV against corrosion.

**How to ascertain the volume of oxygen contained within the cylinder?**

Cylinder volume x pressure = oxygen volume

Example: 2,0 l x 200 bar = 400 l oxygen

2,0 l x 50 bar = 100 l oxygen

**Oxygen supply: Dosage = treatment time**

Example: 400 l: 4,0 l / minute flow rate = 100 minutes treatment time

100 l: 4,0 l / minute flow rate = 25 minutes treatment time

400 l: 10,0 l / minute flow rate = 40 minutes treatment time

200 l: 10,0 l / minute flow rate = 20 minutes treatment time

| Type                       | HMV | SU      | REF       | Price SU |
|----------------------------|-----|---------|-----------|----------|
| 0.8 litre oxygen cylinder  |     | 1 piece | E5 1000   | 104,50   |
| 2.0 litre oxygen cylinder  |     | 1 piece | E5 500140 | 165,00   |
| 10.0 litre oxygen cylinder |     | 1 piece | E5 500130 | 209,00   |

Obligatory text, please see annex at the back of the catalogue!

## Oxygen Pressure Reducer Variable Flow

Volumeter with adjustable flow in 0-1-2-3-4-5-6-9-12-15 litre steps.

A hose nozzle REF: E5 3000-AT is required for connection.

| Type                     | SU      | REF     | Price SU |
|--------------------------|---------|---------|----------|
| Pressure reduction valve | 1 piece | E5 3000 | 212,20   |

## Oxygen pressure reducer fixed flow

Fixed flow rate of 6 l per minute, fixed at 4.5 bar. Connection bolt to the left. Volume manometer.

A hose nozzle REF: E5 3000-AT is required for connection.

| Type                     | SU      | REF     | Price SU |
|--------------------------|---------|---------|----------|
| Pressure reduction valve | 1 piece | E5 2000 | 151,45   |

## Humidifier

With plastic fitting.

| Type       | SU      | REF     | Price SU |
|------------|---------|---------|----------|
| Humidifier | 1 piece | E5 2020 | 6,95     |

## Attachment nozzle for O<sub>2</sub> tubing and humidifier

For pressure reducer REF: E5 2000 und REF: E5 3000, chrome-plated, for 6 mm hose, with seal.

| Type                                     | SU      | REF        | Price SU |
|------------------------------------------|---------|------------|----------|
| Replacement hose connection with sealing | 1 piece | E5 3000-AT | 6,80     |

## DCT DISPOSABLE CATHETERS+TUBES

### DCT O<sub>2</sub> Mask for adults

With attachment straps, nose clip and 2.10 m O<sub>2</sub> safety tubing with universal connector. EO gas treated for germ reduction.

| Type              | SU      | REF    | Price SU |
|-------------------|---------|--------|----------|
| Oxygen mask Adult | 1 piece | H7 163 | 3,80     |

## DCT DISPOSABLE CATHETERS+TUBES

### DCT O<sub>2</sub> Mask for children

With attachment straps but with a nose clip. 2.10 m O<sub>2</sub> safety tubing. EO gas treated for germ reduction.

| Type              | SU      | REF     | Price SU |
|-------------------|---------|---------|----------|
| Oxygen mask Child | 1 piece | H7 1146 | 3,90     |

## DCT DISPOSABLE CATHETERS+TUBES

### DCT O<sub>2</sub> Mask

With attachment straps and nose clip but **without a tubing**. EO gas treated for germ reduction.

| Type              | SU      | REF      | Price SU |
|-------------------|---------|----------|----------|
| Oxygen mask Adult | 1 piece | H7 1116  | 3,50     |
| Oxygen mask Child | 1 piece | H7 1146M | 3,45     |

## DCT DISPOSABLE CATHETERS+TUBES

### DCT O<sub>2</sub> Tubing single

Transparent, green, non-kinking (star lumen), with 2 universal soft connectors. EO gas treated for germ reduction.

| Type                         | SU      | REF     | Price SU |
|------------------------------|---------|---------|----------|
| O <sub>2</sub> tubing 2.10 m | 1 piece | H7 162  | 0,66     |
| O <sub>2</sub> tubing 4.00 m | 1 piece | H7 1175 | 1,60     |

## DCT DISPOSABLE CATHETERS+TUBES

### DCT O<sub>2</sub> mask for high oxygen concentrations

With a reservoir bag, 2.10 m safety tubing, nose clip and attachment strap. For general use, with or without rebreathing valve (or with 3 removable valves). EO gas treated for germ reduction.

| Type  | SU      | REF     | Price SU |
|-------|---------|---------|----------|
| Adult | 1 piece | H7 1191 | 6,00     |
| Child | 1 piece | H7 1192 | 6,00     |

## DCT DISPOSABLE CATHETERS+TUBES

### DCT Hyperventilation bag

This mask for the nose and mouth with rebreathing bag is a must in every ambulance, emergency kit and first aid facility.

EO gas treated for germ reduction.

| Type                                | SU      | REF    | Price SU |
|-------------------------------------|---------|--------|----------|
| Hyperventilation bag with reservoir | 1 piece | N1 012 | 5,60     |

## DCT DISPOSABLE CATHETERS+TUBES

### DCT Oxygen catheter

With foam compress and tapered connector. Sterile and singly packed. Comes in 4 sizes. Length = 40 cm.

| Size  | OC       | SU      | REF     | Price SU |
|-------|----------|---------|---------|----------|
| CH 08 | 600 pcs, | 50 pcs. | F5 1904 | 18,90    |

| CH 12 | 600 pcs  | 50 pcs. | F5 1906 | 18,90    |
| CH 14 | 600 pcs  | 50 pcs. | F5 1907 | 18,90    |

## DCT DISPOSABLE CATHETERS + TUBES

### DCT Nasal oxygen catheter soft

Green double catheter with new, soft fittings. Complete with 2.10 m O<sub>2</sub> tubing. singly sealed. The new, soft nasal catheter prevents injury to the nasal membranes and enables optimal exhalation through the nose. No more foam as the super-soft nasal catheter is made to sit comfortably in the nostrils.

EO gas treated for germ reduction.

| Type                    | SU      | REF     | Price SU |
|-------------------------|---------|---------|----------|
| For adults and children | 1 piece | H7 161  | 1,55     |
| For infants             | 1 piece | H7 1163 | 1,55     |

## DCT DISPOSABLE CATHETERS + TUBES

### DCT Nasal oxygen catheter soft with 0,5 m tube

Green double catheter with new, soft fittings, but with 0.5 m tube and extension adapter.

EO gas treated for germ reduction.

| Type                    | SU      | REF      | Price SU |
|-------------------------|---------|----------|----------|
| For adults and children | 1 piece | H7 161NT | 2,03     |

## DCT DISPOSABLE CATHETERS + TUBES

### DCT O<sub>2</sub> Tubing single

Transparent, green, non-kinking (star lumen), with 2 universal soft connectors. EO gas treated for germ reduction.

| Type                         | SU      | REF     | Price SU |
|------------------------------|---------|---------|----------|
| O <sub>2</sub> tubing 2.10 m | 1 piece | H7 162  | 0,66     |
| O <sub>2</sub> tubing 4.00 m | 1 piece | H7 1175 | 1,60     |

## DCT DISPOSABLE CATHETERS + TUBES

### DCT Tube connector - non sterile

Made of green plastic. For the nasal oxygen cannula and O<sub>2</sub> tubing.

Bag = 30 pieces

| Type           | SU      | REF   | Price SU |
|----------------|---------|-------|----------|
| Tube connector | 30 pcs. | H7 TC | 13,30    |

## Nasosafe nasopharyngeal airway

NasoSafe is an innovative Nasopharyngeal Airway. The swivel grip eliminates the risk of the airway from travelling down the nasal passage. This process provides a maximum comfort for the patient.

NasoSafe is ideal when the oral passage is not accessible. It allows a nasotracheal suctioning. The color coding of the grips helps to identify the size and to find the correct suction catheter. The rounded edge of the tip combined with the angle cut design helps to reduce the risk of injury during intubation. Individually sterile packed.

### Endo Breezer Endotracheal tubes universal model with balloon

The crystal-clear disposable endotracheal tubes Endo Breezer are designed for short to medium term applications. The balloon is shaped to prevent necrosis. Sterile and individual packed. It includes a contrast strip, an automatic spring value, a control balloon and a connector.

Made of medical PVC, with universal pressure cuff, control cuff and norm connector. For nasal or oral use. Sterile and individual packed.

- » Magill tip, Murphy-eyelet
- » Particularly thin and flexible tube
- » Control balloon with charge number
- » Sterile and singly packed
- » Control strip along the entire length of the tube
- » With norm connector attached
- » Also for nasal intubation

### Lifeguard Endotracheal tube holder „T-Holder“

The T-HOLDER meets all professional requirements. Universal size for paediatric and adult patients, sterile.

Eliminates complicated and time-consuming fixation with plasters, etc.

- » Simple usage
- » Velcro fastener
- » With biteblock
- » Suitable for all ET-tubes and larynx-masks

| Type     | SU      | REF     | Price SU |
|----------|---------|---------|----------|
| T-Holder | 1 piece | N2 9500 | 4,50     |

## ENDO-STYLET

### Endo-Stylet Mandrin

Flexible mandrin for the endotracheal catheter.

Sterile and individuel packed. Pack = 20 pieces.

## Silicone Laryngeal Mask LarySeal Blue

- » **Crush Resistant Tube:** Thickness of the main tube wall reduces risk of crushing, while star lumen maintains patency.
- » **Secure Seal for Airway Management:** Cuff material moulds against the contours of the oropharyngeal area, providing a secure seal.
- » **Indication of the Cuff Pressure through Pilot Balloon:** Thin wall pilot balloon indicates the inflation of the cuff.
- » **Universal Connector:** 15mm Male connector provides a universal connection.
- » **Colour Coded Pilot Balloon:** Easy identification of sizing by colour coded pilot balloons.
- » **Clear View:** Deep and open port reduces risk of blockage by epiglottis and provides unrestricted access for use with an endoscope.

## Laryngeal tube LTS-D Sets

The Laryngeal Tube is a supraglottic airway for use in general anaesthesia under spontaneous or positive pressure ventilation. In case of an emergency it is a suitable aid for securing the airway in the difficult airway, as an alternative technique to mask ventilation and endotracheal intubation.

Double lumen tube with drainage channel for single use, individually sterile packed.

| Type                                                               | Size | Colour-Code | SU      | REF            | Price SU |

### Laryngeal tube iLTS-D Sets

The iLTS-D as 3rd generation SAD compiles all essential features required to achieve and protect an airway: Ventilation, Drain Tube and Intubation.

Only two sizes match all patients  $\geq 125$  cm. Usage and indications rely on the broad experience gathered with the standard Laryngeal Tube.

| Type                                                                        | Size    | SU      | REF            | Price SU |

## Quick Trach tracheotomy set

The tracheotomy set with an anatomically shaped cannula.

It creates an air passage simply and quickly. The plastic cannula with an inner diameter of 4 mm for adults and 2 mm for children enables sufficient ventilation using a resuscitator bag. It can be used with the mouth or with a conventional respiration device. The conical needle point can be inserted without prior incision – fast, small stoma, reduced risk of bleeding and swabbing. The stopper prevents excessively deep penetration and the easy-glide tip enables clear identification of the trachea. The 15 mm connector provides quick attachment to a resuscitator bag or respiration device, with or without a connecting tube. The holding plate guarantees secure fixation using the foam neck strap. Sterile and complete with foam neckband, syringe and connection tube.

| Type                            | Inner diameter | SU      | REF        | Price SU |

#### ScalpelCric surgical set for cricothyrotomy

ScalpelCric is a surgical set for cricothyrotomy according to the scalpel technique. The set has been developed to match the latest recommendations from the DAS (Difficult Airway Society) 2015 guidelines. Based on the simple description of „stab, twist, bougie, tube“ the ScalpelCric is meant to facilitate the execution of the scalpel technique. Each component is designed to enhance the safety and efficacy of the technique. The set is packed in a specific pouch and the individual components are organised in the order of use.

**Content:** Scalpel fig.10, 14 Fr bougie (40 cm), 6.0 mm I.D. cuffed tube, Extension tubing, Syringe 10 ml, Necktape

## RESQ-BLADE

### RESQ-Blade Cold Blade Mega FO Battery Handles

Battery handles come without batteries. Two batteries are inquired per handle. Disposable battery handle incl. batteries.

The handle REF: I5 0801 requires batteries of type LR6 (REF: F3 LR6).

The handle REF: I5 0802 requires batteries of type MN1400/LR14 (REF: F3 MN1400).

# RESQ-BLADE

STAINLESS STEEL COLD-LIGHT SPATULA

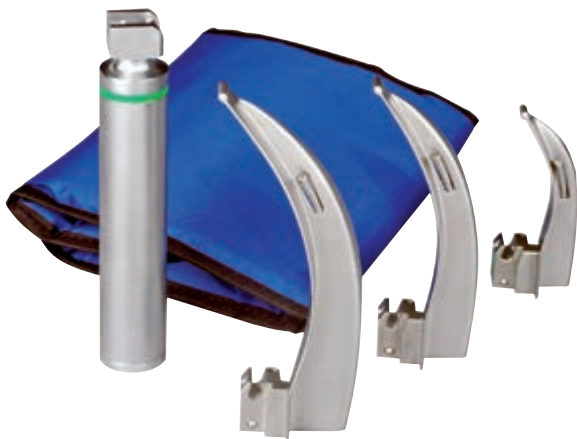

## RESQ-BLADE

**RESQ-Blade Stainless steel cold light blade Macintosh/Miller**

Cold light illumination has significant advantages: First the bright halogen bulb sits in the centre of the handle and does not generate heat. Second the bundled light is emitted from the end of the blade. Additionally, the narrow blade is also easier to clean and provides a clearer view. With hook-on clasp, silver matt-finish.

## VACQ-BREEZER

### VACUUM SUCTION PUMP....

#### VACQ-Breezer vacuum suction pump Special-Set

The VACQ-Breezer vacuum suction pump has a swiveling collection jar for better handling. It is equipped with an overflow protection in the lid of the collection jar which prevents a contamination of the pump.

#### VACQ-Breezer vacuum suction pump includes:

- » Collection Jar for adults (300ml)
- » Yankauer Soft catheter in the sizes: adult, children
- » Universal catheter connector to use standard suction catheters with funnel approach

**Technical data:** Weight of the pump: 275 g, Vacuum: max. 450 mm Hg

## Technical details:

Max. flow: 30 L / min  
 Max. vac.: 630 mmHG  
 Weight: 4.2 kg  
 Size: 250 x 395 x 160mm (H x W x D)  
 Power: 12Volt DC / 85 W (build in battery)  
 Mount: 10G tested car mount (according to European Norm UNE-EN-1789: 2000), including 12 V power supply

## V7 plus B Suction Pump

High quality and performance portable suction units, specifically designed for ambulance, transport and emergency field. Due to their versatility, they can be used in ambulances, hospitals, home-care therapies and other emergency services.

- » High vacuum suction unit up to 30 L/min
- » Strong and steady ABS ergonomical case
- » Rear fixing system for wall bracket tested to resist accelerations and decelerations of 10 g in longitudinal,transverse and vertical direction (according to European Norm UNE-EN-1789: 2000)
- » Piston type suction pump, oil-free and maintenance-free
- » Vacuum control knob
- » Vacuum gauge 0 - 760 mmHg
- » Water-proof ON/OFF switch with guard
- » Battery status controlable by LED battery level indicator lights
- » Polycarbonate suction jar (1 L) with overfilling safety valve, autoclavable up to 121 °C
- » Bacteria filter, Yankauer cannula and suction hoses included

### Vascular-Check Pulse Oximeter

The Vascular-Check pulse oximeter impresses with its handiness, its easy to use, the Display and the sophisticated technology. With Bluetooth port, (software not included), fingersensor and protective cover. „Spot Check“ measurement and „attendant care monitoring“ for adults or children, for finger thicknesses of 7,6 to 25,4 mm.

With a TFT LCD colour display.

In addition to the display of oxygen saturation (SpO<sub>2</sub>), pulse and pletysmogram the circulation in the most minute vessels is being captured and in 6 steps pulled up for calculating the vessel age.

#### The 6 steps display for calculating the vessel age:

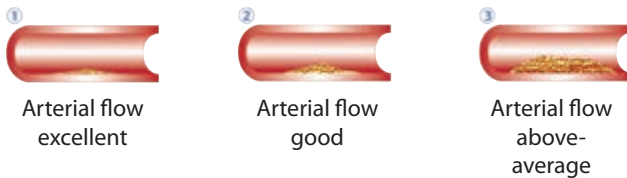

- ① Arterial flow excellent
- ② Arterial flow good
- ③ Arterial flow above-average
- ④ Arterial flow average
- ⑤ Arterial flow below-average
- ⑥ Arterial flow poor

#### Scope of delivery:

Pulse oximeter, 4 AA batteries, rotection cover, orange, Fingersensor, User manual, 12 months guarantee

**Technical data:** Oxygen Saturation Range: 35 % – 100 %, Accuracy: 70 % – 100 % ± 2 digital, 35 % – 69 % ± 3 digital, Pulse Rate Range: 30 – 250 BPM, Digital-LCDs for SpO<sub>2</sub> and pulse rate

## RESQ-METER

### RESQ-Meter Extreme Pulse Oximeter

This Pulse Oximeter is the first choice when you need a robust and reliable product for the outdoor area. Thanks to the silicon sensor the Resq-meter Extreme can be used for adults and children. The OLED display shows the oxygen saturation (SpO<sub>2</sub>), pulse rate, pulse intensity and a plethysmogram. Through the silicone shell of the pulse oximeter is optimal shock and dirt proof and with the included belt clip, the device can be secured against loss. A continuous measurement of 8 hours are possible with a battery.

#### Scope of delivery:

Pulse oximeter  
2 AAA batteries  
Clip strap  
Instruction manual  
12 month guarantee

**Technical data:** OLED-Display, MEASUREMENT, SpO<sub>2</sub>: 70 – 100%, Pulse Rate: 30 – 235 BPM, ACCURACY, SpO<sub>2</sub>: +/- 3% (70 – 100%), Pulse Rate: +/- 2 BPM, Power Requirement: 1 AAA-Batterie, Dimensions: 63.5 x 47 x 39.5 mm, Weight: 50g (without Battery)

| Type                              | SU      | REF    | Price SU |

## RESQ-METER

### Meter finger pulse oximeter

Compact and handy Finger Oximeter for non-invasive measures of pulse and oxygen concentration in the blood. The clip contains an infrared light which measures the intensity of the haemoglobin.

Based on the intensity, the oximeter calculates the oxygen content in percentage terms. Additionally, the device measures the capillary pulse and flow to calculate "Vascular Age in 6 different levels. Results are shown on large and bright OLED display. The high-quality workmanship makes this device durable and sturdy.

The Res-Q-Meter Finger Oximeter is suitable for adults and children, ideal in hospitals, clinics or homeuse as well as in the sport and fitness branch.

#### Main Features:

- » Reliable measurement and display of oxygen concentration and pulse
- » Calculation of Vascular AGE (APG) in 6 levels
- » Simple one-button operation
- » Large and clear OLED display
- » Light, compact, easy to transport (Weight: 37 gr. without batteries)
- » Up to 16 hours operation with one set of batteries (2 AAA batteries)
- » Switches off automatically after 8 seconds when not in use
- » Rubber lining

#### Scope of delivery:

- 1 Pulse oximeter
- 2 AAA batteries
- 1 Clip strap
- 1 Instruction manual
- 12 month guarantee

**Technical data:** OLED Display, • Measurement range: SpO<sub>2</sub>: 35 - 99 %, Pulse rate: 30 - 250 BPM, Accuracy: SpO<sub>2</sub>: +/- 2 % (70 - 99 %), Pulse rate: +/- 3 BPM, Vascular Age in 6 levels, Power source: 2 AAA batteries, Dimensions: 63,5 x 34 x 35 mm, Weight: 37 g (without batteries)

#### Calculation of vessel age (APG) with 6-stage display

- 1 Arterial flow excellent
- 2 Arterial flow good
- 3 Arterial flow rate above average
- 4 Arterial flow rate average
- 5 Arterial flow rate below average
- 6 Arterial flow poor

#### Calculation of vessel age (APG) with 6-stage display

Arterial flow excellent

Arterial flow good

Arterial flow rate above average

Arterial flow rate average

Arterial flow rate below average

Arterial flow poor

## RESQ-METER

### RESQ-Meter Finger pulse oximeter

Compact finger pulse oximeter for quick and easy monitoring of oxygen saturation (SpO<sub>2</sub>) and pulse rate (PR). Can be used for adults and children (from 25 kg body weight). In hospital, at the doctor's surgery, at home, on the road, in care and for emergency services Also ideal for equipping emergency and home visit bags.

#### Scope of delivery:

- 1 pulse oximeter
- 1 carrying strap
- 1 instructions for use

**Technical data:** Finger pulse oximeter for measuring oxygen saturation (SpO<sub>2</sub>) and pulse rate (PR), Two-colour OLED display of pulse rate, saturation & perfusion index, Alarm function, Monitoring the battery capacity, Change the display direction at the touch of a button, SpO<sub>2</sub> measuring range: 35 - 99 % (graduation: 1 %), Pulse rate measuring range: 30 - 240 beats/minute (division: 1 beat per minute), Power supply: 2 x 1.5V AAA alkaline batteries (not included), Automatic switch-off after 8 seconds, Weight incl. batteries: approx. 80 g, Dimensions: 60 x 36 x 33 mm (L x W x H), Colour: white

### ZOLL AED 3

ZOLL has been a pioneer in resuscitation technology for more than 25 years. First responders use our innovative AEDs to save lives quickly and confidently.

All ZOLL AEDs feature real-time feedback on compression depth and rate.

| Type                  | SU      | REF           | Price SU |
|-----------------------|---------|---------------|----------|
| AED 3 semi-automatic  | 1 piece | P5 850108     | 3.833,00 |
| AED 3 fully-automatic | 1 piece | P5 8501120208 | 3.833,00 |

#### Scope of delivery:

ZOLL AED 3, Uni-PADz electrode, emergency set, battery  
AED training is not included in the price!

The ZOLL AED 3 features Real-CPR Help with lifelike deployment images and an integrated rescue mode for children. This makes it easy to treat both adults and children.

- » WLAN connection that automatically reports readiness to the program management
- » Integrated rescue mode for children
- » Universal CPR Uni-Padz for treating adults and children
- » LCD color display with touch menu function
- » RapidShock analysis
- » Electrode and battery last up to 5 years
- » IP 55 protection class
- » MDR certified
- » Dimensions: 12.7 x 23.6 x 24.7 cm
- » Weight: 2.5 kg (with built-in battery)
- » 8-year warranty (6 + 2 years when registered via ZOLL)

## ZOLL

### ZOLL AED Plus

The ZOLL AED Plus with clinically proven, integrated real-time feedback sets the standard for reliability, durability and performance.

- » Visual and audible prompts such as 'press harder' or 'chest compressions good'
- » One-piece electrode design, easy and precise application
- » Electrode and batteries last up to 5 years
- » IP 55 protection class
- » Dimensions: 13.3 x 24.1 x 29.2 cm
- » Weight: 3.1 kg
- » 7-year warranty (5 + 2 years when registered via ZOLL)

# RESQ-BOARD

## RESQ-Board

for use during resuscitation and endotracheal intubation

- » The anatomically shaped headrest places the upper body in the correct position for cardiac massage
- » The roughened surface prevents the patient from slipping off the board
- » The smooth underside makes the board easy to slide into position under the patient
- » The RESQ-Board is made of sturdy polyethylene, which is stable yet light

**Technical data:** Length: 600 mm, Width: 420 mm, Height: 60 mm, Max. load: 150 kg, Weight: 2 kg

| Type       | SU      | REF        | Price SU |
|------------|---------|------------|----------|
| RESQ-Board | 1 piece | N1 RB70000 | 68,30    |

## Cardio First Angel

Cardio First Angel – the lifesaver for heart attacks

Specially for lay helpers in the critical first 15 minutes until a doctor arrives!

In Europe there are about 700 000 heart attacks every year, worldwide there are even about 17 million.

If the heart stops beating, the brain is no longer supplied with oxygen and suffers irreparable damage unless the patient receives correct cardiac massage immediately. However, often valuable minutes pass before the emergency doctor arrives. During these minutes are no attempts at resuscitation or they are made in the wrong way. This is exactly where the Cardio First Angel comes in, with it even the layman can perform a cardiac massage quickly and efficiently. Many first aiders cannot find the right place for a cardiac massage without support. With the cardio First Angel the massage is automatically carried out where it is most effective. A positioning aid ensures this. The device is placed in the middle of the chest and a drawing on the surface indicates how the hand should be placed. But, how hard should you press? The cardio First Angel provides security in this as well. A special spring signalises the perfect pressure of 41 kg with a clear click-sound. The click-sound is also audible with the following release of the spring. If the first-aiders are geared to these two click-sounds he will automatically reach the required frequency of round about 100 compressions per minute. With the Cardio First Angel the time until the emergency doctor arrives, can be bridged. If the Cardio First Angel were at hand everywhere within 1 to 3 minutes, numerous lives could be saved and patients could be protected from longterm damage. So it ensures the best care in the crucial first minutes after cardiac arrest. Only mechanically it provides the necessary pressure, the most effective frequency and the correct positioning during a cardiac massage.

### Ideal applicability

Without any electricity or battery – purely mechanically – is the Cardio First Angel always on standby. Its applicability is shown in uncomplicated and international comprehensible icons.

### Ideal positioning

The specific design of the Cardio First Angel guarantees the correct positioning on the patients breast, so the cardiac massage works exactly where it is needed. A special foam creates a soft contact surface and absorbs sudor.

### Ideal effort

A special spring signalises the perfect pressure of 41 kg with a clear click-sound. The click-sound is also audible with the following release of the spring. If the first-aiders are geared to these two click-sounds he will automatically reach the required frequency of round about 100 compressions per minute.

**Technical data:** Dimensions: 20 x 13 x 6 cm (L/W/H), Weight: 130 grams

### Air splints

For the immediate immobilisation of injured or broken limbs. Made of transparent plastic which can be placed on the injured limb within seconds. By filling the splint with air, the limb is stabilised and immobilised. The valve is open when turned to the right and closed when turned to the left. Radiolucent.

### T-Pod Responder Pelvic stabilization device white/orange

The T-POD Responder Pelvic Stabilization Device is a rapid and effective device for treating pelvic trauma, pain, and bleed-out while preventing loss of life. With its patented circumferential tightening mechanism, T-POD Responder is the only external fixation device shown in independent clinical studies to be equivalent to a surgical procedure in achieving stabilization, while also mitigating patient discomfort. T-POD is used extensively by civilian first responders in motor vehicle accidents and by medics on the battlefield, especially in incidents involving improvised explosive devices. Disposable, single use only.

#### T-POD Advantages

- » Complete: Specially engineered pulley system ensures even pelvic compression and stabilization
- » Easy: Single-handed tightening with no straining
- » Adjustable: One size fits most physiologies, easily trimmed for custom fit; two can be secured together for obese patients
- » Flexible: Non-metal fabric belt
- » Compatible: 100 % radiolucent, X-ray, CT, and MRI compatible
- » Safe: Latex-free

# E-BONE SPLINT

*These foam covered, aluminium splints have become well accepted everywhere: Rescue services, fire brigade, disaster protection services, mountain rescue, hospitals, neonatal units, sports medicine, school first aid, industrial medicine, rapid-response groups ... and many more*

**Uses:** Cervical spine, lower arm, whole leg, finger, lower leg, shoulder and arm.  
**Also an ideal arm support during infusion.**

## E-Bone Splint

Available individually to fill the Roll Pouch

### The universal splint for emergency services

- » Fits perfectly in every emergency case or bag
- » Versatile enough to splint the cervical spine and all extremities as well as treating a variety of injuries
- » Does not adhere to wounds and is suitable for continuous use
- » Resistant to blood, exudates and bodily fluids
- » Radiolucent
- » Lightweight and thermostabile
- » Reusable
- » May be cut to size required
- » Folds for simple storage
- » Durable
- » Longer than comparable products and yet very economical.

## Lifeguard VACQ-SPLINT vacuumsplint set

The VACQ-SPLINT vacuum splints allow a gentle immobilisation of the extremities. Each splint is made of robust material and contains several chambers to prevent pellet displacement and are therefore quickly ready for use.

As with our VACQ-BLUE II vacuum mattress, each splint has the option of owner identification through a lockable slide-in field.

The splints are radiolucent and MRI- and CT-compatible.

### Scope of delivery:

- 1 x arm splint
- 1 x leg splint
- 1 x ankle splint
- 1 x hand pump
- 1 x transport bag

**Technical data:** Dimensions set: 56 x 36 x 16 cm (L/W/H), Weight: approx. 3.5 kg

## Lifeguard Trans-Red II transport sheet

Transport sheet in accordance with DIN EN 1865, made of extremely durable red tarpaulin with 8 side handles for easier patient transportation. Cleanable and disinfectable.

If conventional stretchers cannot be used due to unfavorable spatial conditions, the transport sheet is a reliable and safe solution for transporting immobile, injured or unconscious persons. The transport sheet is made of sturdy tarpaulin and is sewn with webbing that guarantee a maximum load capacity of 150 kg. It is washable, disinfectable, impermeable to liquids and resistant to mineral oils. The transport sheet is also radiolucent.

**Technical data:** Material: tarpaulin, Cloth dimensions: 200 x 74 cm, Footmuff dimensions: 74 x 23 x 23 cm, Max. Load capacity: 150 kg, Weight: 2.2 kg

### VACQ-BLUE II Vacuum Mattress Set incl. bag and pump

The VACQ-BLUE II is a Vacuum mattress which meets the modern requirements of a vacuum mattress.

#### Overview of the advantages:

- » Anatomical Shape
- » Easy to use
- » Multichambersystem, that ensures that the filling material stays in the optimal position
- » Made of strong materials
- » Automatic valve
- » X-Ray, CT and MRT compatible
- » 4 Patient straps for secure fixation of the Patient
- » 8 Handles for easy transportation

**Technical data:** Length: 2100 mm, Width (Head): 400 mm, Width (Torso): 880 mm, Width (Feed): 600 mm, Weight: 7 kg, Max Load: 159 kg, Material (outside): TPU, Multi chamber system

## Lifeguard scoop stretcher

Ideal for all rescue vehicles, industrial first aid, etc.

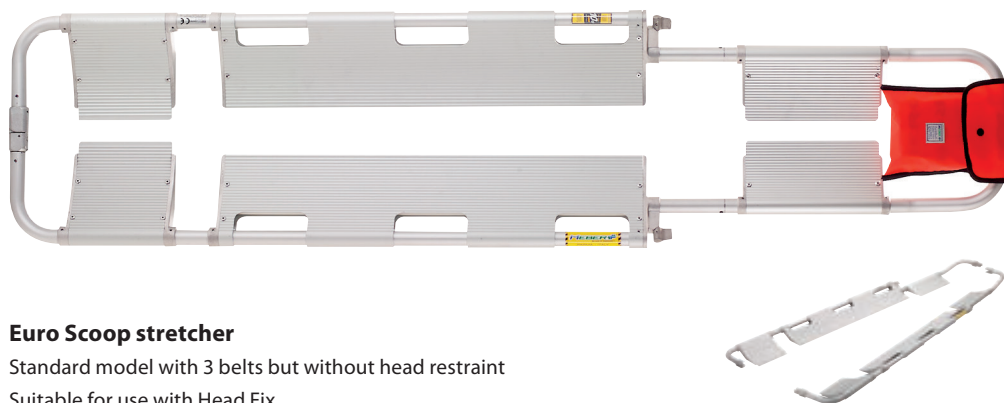

The 2 strong snap-connectors combine the two parts of the stretcher together and the patient can be immobilised for transporting (important when back or spinal injuries are suspected), incl. 3 black patient belts

The stretcher can be extended to 2 m in length.

Made of polished / anodised aluminium.

**Technical data:** Extended (L x W x H): 200 x 42 x 7 cm, folded (L x W x H): 165 x 42 x 7 cm, Weight: 8,7 kg, Max. Load capacity: 159 kg

*Ergon has been designed and developed by rescue operators and emergency medical technician experts!*

#### **Ergon comfort stretcher**

Variable Geometry Comfort Stretcher

Designed for comfort and performance, it features handles that are lined with HC3 and inclined at 20° to allow the best grip and also special eyelets and pins, strategically positioned along the handles to easily accommodate speed clip straps.

The distance between the two halves is just 25 mm, compared to those normal scoop stretchers which are separated by 80 mm, therefore enabling perfect containment of the spinal column.

The HC3 material provides insulation and prevents hypothermia thus enabling the patient to remain prone for a longer period of time.

A further technological revolution is the use of the FlexiLock articulated locking device, which enables separation of the stretcher in two halves, and rescue in unnatural positions and tough situations.

**Technical data:** Height: 7.5 cm, Width: 43 cm, Length: 165 – 201 cm, Length folded: 120 cm, Height folded: 9 cm, Weight: 10 kg, Maximum load: 150 kg

## COMBI CARRIER II

### Combi Carrier II

Stretcher or Spineboard

The further development of the world-famous combination of scoop stretcher and spineboard. The Combi Carrier II is just as simple and ingenious as its predecessor: a plastic scoop stretcher with a one-piece head support surface. It combines the advantages of a scoop stretcher with the features of a spineboard.

- » Incl. 4-piece Speed-Clip harness set
- » Easy to clean
- » No sharp corners and edges
- » 14 robust circumferential handle recesses
- » Fully X-ray compatible
- » Thinner than its predecessor, but more resilient
- » Floatable

**Technical data:** Sizes: 186.7 x 41.9 x 5.6 cm (L x W x H),  
Weight: 7.1 kg, Max. load: 205 kg

## COMBI CARRIER II

### Lifeguard RESQ-Chair

The RESQ-Chair is made of sturdy aluminium and features with high carrying capacity. It's caterpillar drive enables a safe and easy way downstairs with the patient and ensures a high level of security. Thanks to the steer-able front wheels the RESQ-Chair has got a high flexibility. Being not used, the chair can be folded with minimum space. The strap system has got a colour code for an easier and faster use and a head fixation provides an additional support for the patient.

**Technical data:** Size (folded): 98 x 54 x 35 cm (L/W/H),  
Size (non-folded): 98 x 54 x 80 cm (L/W/H), Weight: 20 kg, Max. load: 227 kg

| Type       | SU      | REF       | Price SU |
|------------|---------|-----------|----------|

### Folding transportation seat

With armrests and foot supports

- » For transporting seated patients wherever space is confined.
- » 3 restraints (shoulder, abdomen and legs) keep the patient securely positioned.
- » 4 large wheels (2 with brakes) which glide comfortably over smooth surfaces.
- » 4 extractable grip-handles at the back (at the shoulder and seat) and 2 extractable and foldable grip-handles at the front for easier transportation on stairs.
- » Simple to assemble and light to push.
- » The seat and backrest are made of thermoplastic material making it easy to disinfect.

**Technical data:** Height open: 90 cm, Height folded: 100 cm, Width: 53 cm, Length: 69 cm, Length with extracted handles: 119 cm, Depth folded: 22 cm, Weight: 13 kg, Max. load: 170 kg

| Cover, colour: orange | 1 piece | N6 LG4006 | 210,00   |

### Carrier EL2000

This carrier is a multifunctional piece of equipment. Fitted with extra large tyres to make it easy and quick to transport patients or equipment over difficult terrain. The unique design makes it possible to transport the injured patient with the help of only 2 persons instead of four. This opportunity makes it extremely practical in situations where a large number of patients need to be attended to simultaneously (in areas of natural disaster or trouble spots) or where the rescuers themselves need to remove themselves from danger and remain protected.

A further advantage of this carrier is that it may also be used as a camp bed or examination couch, the patient does not need to be moved.

When folded, the compact size enables space-saving storage. It is suitable for use with all standard stretchers and spineboards and is invaluable in situations where the terrain would otherwise be impassable or for use over long distances (for all rescue services incl. water rescue, mountain rescue, airfields, etc).

**Technical data:** Length folded/open: 52 cm / 158 cm, Width: 62 cm, Height folded/open: 84 cm / 86 cm, Weight: Frame 20 kg, Tyres 4 kg, Max. Load: 200 kg

## LifeBOX® SOFT

### LifeBOX Soft Backpack

Rough Backpack made of Tarpaulin including 7 black retainer modules, an adjustable middle partition, with an O<sub>2</sub> cylinder holder. The backpack offers two small side pockets and two large pockets on the front. A velcro strap on the front for identification. The carrying straps can be stored if it's not needed and the backpack can be carried as a case with the two handles.

The empty backpack is optionally available in blue/black, yellow/black or red/black, incl. reflective stripes.

## LifeBOX Soft Backpack Junior

The backpack "JUNIOR" is particularly suitable for paramedics and rapid-response emergency services. The belt system can be tucked away behind the cover provided and the sturdy handle enables the backpack to be carried as a case. The large, separate section at the front was designed to hold an AED but may also be used to hold whatever may be required. Inside the lid are two further zip-bags. Backpack Junior made of Tarpaulin, empty.

- » The backpack is optionally available in blue/black, yellow/black or red/black incl. Reflective strips.
- » Velcro label for inscription on the front.

## RETAINER SYSTEM

### LifeBOX - Retainer System

Lifebox retainer is the name of the refillable containers made of nylon, with a transparent cover. Due to the modular construction they can be used in all Soft-LifeBOX models.

#### Advantages:

- » Optimal all-weather protection
- » Individual choice of filling
- » Each retainer can be sealed
- » Multiple emergencies may be treated simultaneously, as only the appropriate retainer can be taken to the patient and not the whole case. Can be constantly upgraded
- » Can be used in all Lifeguard bags and backpacks
- » Colour-coded for better identification
- » Particularly lightweight

See succeeding pages for prefilled Retainers.

### Emergency Case

#### ❶ Emergency box: Multi

With variable compartments, cover and dustproof seal. Incl. wall mounting.

Dimensions: 42 x 33 x 15 cm

#### ❷ Emergency box: Coronado

With variable compartments, cover and dustproof seal. Incl. wall mounting.

Extra large = fits resuscitators.

Dimensions: 46 x 36 x 22 cm

#### ❸ Emergency box: Master

Fixed compartments, incl. wall bracket.

Dimensions: 56 x 43.5 x 20.5 cm

#### ❹ Emergency box: Mark I

With fixed compartments, wall mounting and twist locks. Deeper base with a flat lid. Incl. wall mounting.

Dimensions: 40 x 26 x 13 cm

#### ❺ Emergency box: Combistar

Without compartments, with wall mounting, transparent lid which stays open at 90°. Incl. wall mounting.

Dimensions: 28 x 20 x 11 cm

#### ❻ Emergency box: San

With 2 fixed, equally sized compartments. With wall mounting and lid opening to 90°. Incl. wall mounting.

Dimensions: 34 x 24 x 12 cm

## Max Emergency cases

Emergency case for hardest standards

In this case your emergency equipment is absolutely protected against dirt and wetness.

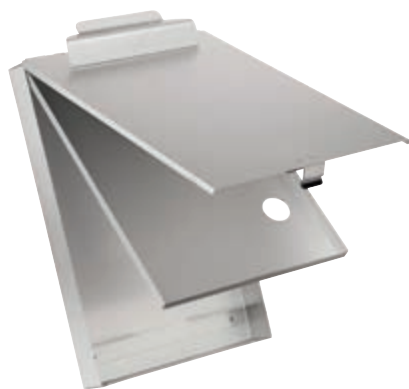

- » Housing made of ABS plastic, corrosion resistant
- » The pressure compensation remains closed even if the ambient temperature or the air pressure changes
- » Firm snap shots
- » Loops for safety locks
- » Water- and dust-proof due to IP 67

These case can be used in the nautical and flight electronically field for transporting elctronical, medical and military equipment and protection of highly sensitive equipment. The ABS housing provides extreme protection of the case contents from shock, water and all possible climatic influences.

Colours and sizes available in orange and black, in 3 different sizes.

### Läufer form holder with box, aluminium, with compartment divider

The bottom-opening form holder made of lightweight aluminium is the perfect companion for mobile working. With it you can work in an organised manner while on the move. In addition to the large inner compartment, the form holder has another intermediate compartment. The compartments can be closed individually and allow documents to be stored in a structured and secure manner. This form holder also has a separate area in the inner compartment for pens and other utensils. The special self-locking mechanism keeps the box securely closed. The extra strong clamp on the top and the stable writing surface make this form holder an ideal companion.

- » Aluminium clipboard with strong retaining clamp and stable writing surface.
- » Opens at the bottom, with special locking clamp
- » With two individually closable inner compartments for documents and papers

With a separate compartment for pens and utensils

**Technical data:** Colour: silver, Material: metal, Dimensions (L x W x H): 35.5 x 23.5 x 4.2 cm (without clamp)

| Type                                                                                                     | SU      | REF       | Price SU |

### Läufer form holder with box, aluminium, side opening, with retaining clamp

This form holder made of lightweight aluminium from Läufer opens sideways. On the left inside is a holder that protects your papers and documents from falling out. On the right side is the proven protective flap, which you can protect your confidential documents, forms and data from all eyes. The extra strong serrated steel clamp holds your documents securely in place. The smooth writing surface makes it easy to write down all information you have collected. The side-opening form holder from Läufer thus offers many advantages. It is particularly suitable for mobile working.

- » Aluminium form holder Box with internal metal clamp
- » Protective flap ensures the confidentiality of your documents
- » Side opening

The serrated clamp ensures a secure hold for important documents

**Technical data:** Color: silver, Material: metal, Dimensions (L x W x H): 32 x 23 x 2.8 cm (without clamp)

| Type                                                                | SU      | REF       | Price SU |

### Ready-Heat II Thermal blanket

This thermal blanket protects against hypothermia by actively creating heat. Made of a non-woven fabric interwoven with 12 chemical elements which reacts with the air to create warmth if the blanket is removed from the vacuum packaging. The blanket heats to ca. 38 °C within 10 minutes (possible max. temperature 52 °C) and retains this temperature for ca. 8 hours.

NSN: 6532-01-538-0759

**Technical data:** Dimensions: 32.25 x 40 cm (packed), 86 x 122 cm (open), Weight: 0.68 kg

| Type                          | SU      | REF    | Price SU |
|-------------------------------|---------|--------|----------|
| Ready-Heat II Thermal blanket | 1 piece | N6 RH2 | 38,50    |

### Ready-Heat Thermal Blanket

Blanket with heat pads that warms to a minimum of 40 °C within 15 - 20 minutes of breaking the package seal. The blanket will maintain that temperature for 10 hours. Used in the prevention of hyperthermia and temperature management.

Suitable as an evacuation litter and able to carry a person who weighs up to 113 kg.

NSN: 6532-01-525-4062 - 86 x 122 cm

NSN: 6532-01-525-4063 - 86 x 152 cm

# EMERGENCY BURN CARE

A combustion is a very painful injury which can occur anywhere and at any time, without warning. The incorrect treatment of a combustion can have serious repercussions, prolonging the healing process or even resulting in permanent damage. The sooner Burnshield is applied, the sooner pain is relieved and the healing process can begin. Burnshield is most effective within the first 24 hours. When kept within reach, Burnshield is always there when needed!

## What is Burnshield?

Burnshield is a remarkable sterile dressing which is made for the first-aid treatment of combustions, cooling and soothing the combustion area and minimizing trauma. Every Burnshield dressing is saturated with a sterile water-based gel which has the ability to absorb and dissipate heat, provide relief, minimise shock and skin damage, halt the burn process and protect against further contamination.

The Hydrogel is non-toxic and non-irritants and is safe for use on children. Burnshield dressings can be used on all 1<sup>st</sup>, 2<sup>nd</sup> and 3<sup>rd</sup> degree burns including facial burns and scalds.

## Use:

Tear open and remove the dressing from the pouch. Apply directly onto the affected area. Squeeze the rest of the hydrogel out of the pouch and onto the dressing. Secure the dressing with a light bandage.

## Will the Burnshield Dressing stick to the Wound?

The dressing is non-adhesive and can be painlessly removed without causing discomfort. Any hydrogel residues can be washed off with water.

## Technical Specifications

|                 |                                        |
|-----------------|----------------------------------------|
| Dressing:       | open-cell flexible foam                |
| Rescue Blanket: | pure wool base                         |
| Hydrogel:       | 96 % water                             |
|                 | Malaleuca alternifolia (tree-tree oil) |
|                 | Gelling agent                          |
|                 | Sterilised by gamma irradiation        |
|                 | Non-toxic, non-irritant                |

## Areas of use for Burnshield dressings, rescue blankets, Hydrogel spray and gel sachets

Emergency services, Fire brigades, Industry, Schools, Kindergartens, Restaurants, Hotels, Kitchens, Laboratories, Caravans, Ships, etc.

The main difference between these and other dressings on the market is the fact that the base material is no longer made of animal fibres, thus making them lighter. The pure wool Burnshield Rescue Blankets are heavier, absorbing more gel and can be used to shield against heat. Take advantage of the price of this innovation. Here is a comparison of the 3 types of dressings:

- 1 Burnshield Dressings and Face Masks made of open-cell, flexible foam
- 2 Burnshield Contour Dressings made of a lighter, non-animal fibre material (available in sizes 100 x 100 cm and 100 x 200 cm)
- 3 Burnshield Rescue Blanket made of pure wool

## Burnshield Gel sachets / Hydrogel / Hydrospray

Just like the Hydrogel and Hydrospray, the Gel Sachets are ideal for small surface burns as well as for treating sunburn and scrapes. Tip: It is recommended that medical advice be sought if smoke has been inhaled or a combustion injury has occurred. Burnshield products are first aid products for 1st, 2nd or 3rd degree burns or scalds or for direct protection from fire. Burnshield does not replace the need for medical examination of combustion injuries.

### Burnshield sterile dressings

The greatest danger with burns is the loss of body heat, dehydration and infection.

Gel-soaked, sterile foam compresses placed directly onto the wound, cool and protect against infection.

### Burnshield, the sterile and immediate burn treatment

- » Cools and relieves pain
- » Moistens without sticking
- » Reduces trauma
- » Reduces the risk of infection
- » Is suitable for children
- » Made of gel-soaked, absorbent foam

Burnshield is a ready to use, universal burns treatment that requires no time-wasting preparation.

### Burnshield rescue blanket

Burnshield blankets are sterile, hydrogel-impregnated blankets, designed for saving people in danger of burning. They protect from heat, smoke and fire. At the same time, they relieve pain through the cooling effect of the gel. The Burnshield blanket makes rescuing quicker and provides first aid to the victim. The blanket may also be used to extinguish small fires.

The blanket is made from a special, pure wool fibre and is impregnated with hydrogel. Each blanket is sterile and individually sealed.

The sturdy bag ensures safe storage. The instructions for use are printed on each bag.

#### Plum wound and eye spray

For quick, easy and hygienic first aid for minor accidents at work.

With the Plum wound and eye spray with sterile 0.9% sodium chloride solution you can quickly and effectively treat smaller wounds such as scratches and cuts on the skin or rinse dust and dirt out of the eye. The spray is strong enough to clean smaller wounds, yet gentle enough to rinse the eyes. Spraying is possible from all directions. The spray is easy to carry and can be operated with one hand. It can be used several times and remains sterile. Plum wound and eye spray is hypoallergenic and contains no preservatives.

### Cederroth eye wash station

Cederroth eye wash - proven to be more effective than saline for alkali and acid splashes. The eye wash station is designed for quick relief. The station holds 2 bottles which open when they are removed from the wall bracket. The bottles are designed to flush the eye for approximately one and a half minutes with a continuous strong flushing stream. The products have a shelf life of 4,5 years. Buffered solution with a higher chance of saving the eye. Our eye rinsing solution balances the pH value in the eye, i.e. it neutralises alkali and acid splashes. It works faster than a conventional saline solution. The effect is generally stronger with alkalis than with acids. With the Salvequick plaster dispenser, the plasters are always at hand and ready for use. In our Salvequick plaster dispenser, the plasters are pulled out downwards. The refill inserts are locked in place. This prevents wastage. With space for products of your own choice, the contents can be adapted to the specific needs of each workplace.

**Contents:** 2 x 500 ml Cederroth eye shower (REF A6 725200),  
1 x Salvequick plaster dispenser with: 40 x textile plasters (REF H7 6444),  
45 x plastic plaster (REF H7 6036),  
1 x instruction for the eye shower, 1 x key

**Technical data:** Dimensions: 29 x 56 x 12 cm (W/H/D)

### Cederroth Eye Wash 2 x 0,5 litres

Cederroth eye rinsing solution balances the pH value in the eye, i.e. it neutralises alkali and acid splashes. It works faster than conventional saline solution. The effect is generally stronger with alkalis than with acids. Shelf life: An impressive 4,5 years. In the event of accidents involving substances containing lime (e.g. cement, concrete or lime), the Cederroth eye wash can be used for rinsing without worry: for optimal rinsing, the eye wash solution is 100% phosphate-free.

## Cederroth Soft Foam Bandage

Cederroth Soft Foam Bandage is suitable as a plaster and bandage for minor wounds. Easy to apply to fingers, hands, arms, toes, feet, legs and more. The waterproof quick bandage, which fits securely even in cold, heat and dry conditions, is suitable for all types of minor wounds. Cederroth Soft Foam Bandage is a self-adhesive, adhesive-free plaster. This way it does not stick to skin or hair. Simply tear it off precisely and bandage the injured area. For heavily bleeding wounds, fold a piece of Soft Foam Bandage into a swab and apply a pressure bandage. Cederroth Soft Foam Bandage is ideal for quick, easy wound care. The bandage can be used for food processing because of its visibility, suitability and the blue colour. Black is recommended for dirty working environments as the colour conceals stains on the outside of the dressing. Suitable for refilling the Wound Care Dispenser or Foam Bandage Dispenser. Latex free.

## Plum Eye starter sets

### Plum eyewash solution starter set

The Plum Eye Wash starter Set contains 4 bottles of eye wash solution and a QuickFix plaster dispenser for individual use. The Plum eye wash is suitable for rinsing out foreign bodies such as dust or dirt and quickly relieves discomfort and prevents consequential damage.

The QuickFix plaster dispenser for filling with different types of plasters is included free of charge. The Plum starter set is available in three different versions.

### Product Properties Eyewash Solution

- » Effectively removes dust, dirt and impurities from the eyes
- » Easy to use - either by the injured person themselves or with help
- » Flexible solutions - bottles for mobile use and stations for wall mounting
- » Wide range of applications - from industrial workstations to laboratories and first aid kits
- » High functional safety - cylinders comply with EN 15154-4
- » CE marking in accordance with the MDD 93/42/EEC classification guidelines
- » Shelf life of at least 3 years for sealed bottles

### Contents:

#### Starter set 1

4 x eye wash, sterile 0.9 % NaCl solution, 500 ml each (A4 4604)

1 x QuickFix plaster dispenser, empty (A4 5500)

#### Starter Set 2

4 x eye wash, sterile 0.9 % NaCl solution, 200 ml each (A4 4691)

1 x QuickFix plaster dispenser, empty (A4 5500)

#### Starter set 3

4 x pH neutral eye wash, 4.9 % phosphate buffer, 200 ml each (A4 4752)

1 x QuickFix plaster dispenser, empty (A4 5500)

### Plum QuickFix starter sets

In addition to 6 packs of QuickFix plasters, the Plum QuickFix starter sets also contain a QuickFix plaster dispenser for individual filling.

The QuickFix plaster dispenser for filling with different types of plaster is included free of charge. The QuickFix starter set is available in two different versions.

### Product features

- » Provides immediate and visible access to patches
- » Each plaster unpacks itself on one side as soon as it is pulled out
- » Each plaster is packed individually and hygienically.
- » The plaster can be applied to the wound with one hand
- » Quickly refillable
- » Clear indication when dispenser is empty
- » Stops minor bleeding quickly without soiling the other plasters
- » Small dimensions - space for the QuickFix dispenser is easy to find
- » Includes a shelf for storing small, relevant items

### Plum QuickFix Elastic

Elastic and comfortable textile plasters that adapt to the movements of the skin. The plasters are skin-friendly and breathable.

The plasters are CE-marked

### Plum QuickFix Plaster dispenser

The QuickFix plaster dispenser allows quick and hygienic first-aid access, at the centre of the workplace. Pull to retrieve a ready-for-use plaster, and get back to work in seconds.

The dispenser contains 2 refills and can be attached to the wall in an area where plasters are most often required.

Dispenser: 23 x 13.5 cm (w x h).

Dimensions plaster: 7.2 x 2.5 cm.

**Water Resistant:** Waterproof plaster, particularly suitable for wet work areas.

**Elastic:** Elastic material, conforming to the movement of the skin for comfort. Airpermeable and particularly skin friendly.

**Elastic long:** Long plasters 12 x 2 cm which makes it possible to wrap the plaster around the finger more than once.

**Detectable:** A blue plaster with integrated metal surface for detection by a metal detector.

**Detectable long:** Long plasters 12 x 2 cm which makes it possible to wrap the plaster around the finger more than once.

**Aloe Vera:** The Aloe Vera contained in the wound dressing is known for its soothing, moisturising and soothing properties. It creates optimal conditions in the wound environment and thus promotes the natural healing process. Prevents the formation of scabs.

**Blood Stopper:** Plaster with hemostatic effect. The alginate fibres between the non-woven fibres of the wound dressing create an artificial clot (gel) inside the wound dressing, which stops the bleeding within one to two minutes and provides optimum moisturising conditions.

plum

### Plum QuickFix UNO plaster dispenser

The small QuickFix UNO plaster dispenser combines safety in the workplace with a modern design. It not only convinces with its visually appealing design, but also with simple and quick handling.

It contains a plaster refill with 45 elastic plasters and thus offers quick first aid for minor cuts. QuickFix UNO also functions according to the proven QuickFix principle, i.e. each plaster is hygienically packed individually and unpacks itself when pulled out of the dispenser. The small dimensions (H 8.5 x W 13.0 x D 3.5 cm) allow the plasters to be attached in almost any desired position. QuickFix UNO can either be screwed on or attached with adhesive strips (included in the scope of delivery).

The QuickFix UNO plaster dispenser is also available as empty version without contents. So you can fill it yourself and adapt it to your specific needs. You can use all the plaster refills from the QuickFix plaster assortment according to your individual needs.

## Mediware Protective goggle

Made of transparent polycarbonate.

Protection over the eyebrows and at the side of the eyes. Fits over most glasses.

| Type              | OC       | SU      | REF     | Price SU |
|-------------------|----------|---------|---------|----------|
| Protective goggle | 200 pcs. | 1 piece | H7 1630 | 3,40     |

## Protective goggle with Integrated side protection

The goggles provides a good all-round protection, the extendable side pieces enable a nearly perfect fit to all face shapes.

- » Side pieces extendable
- » Integrated side protection
- » Polycarbonate lens with antiscratch coating
- » Optical Class 1
- » According to DIN EN 166

| Type                                              | SU      | REF     | Price SU |

| Protective Goggle with Integrated side protection | 1 piece | H7 4308 | 7,80     |

## Protective goggle Design 12720

*DIN EN 166 1 - FT*

Ideal for factory visitors, construction and laboratory staff.

- » optimal wearing comfort
- » fits all faces
- » excellent field of vision
- » scratch-proof coating
- » anti-fog coating
- » 99.99 % UV protection
- » innovative UV 380 technology

| Type         | SU      | REF       | Price SU |
|--------------|---------|-----------|----------|
| Design 12720 | 1 piece | H7 277376 | 7,10     |

## Protective goggle Design 12750

*DIN EN 166 1 - FT*

Modern design, fits all faces.

- » comfortable and stylish
- » soft nose pad for greater comfort
- » scratch-proof coating
- » anti-fog coating
- » 99.99 % UV protection
- » UV 380 technology
- » arms adjustable to 4 positions

| Type         | SU      | REF       | Price SU |
|--------------|---------|-----------|----------|
| Design 12750 | 1 piece | H7 277377 | 7,70     |

### Protective goggle Basic

DIN EN 166

Plastic safety goggles.

Multi-purpose, plastic safety goggles for protection against large dust particles.

- » excellent fit
- » adjustable strap
- » large field of vision
- » comfortable to wear

| Type                    | SU      | REF       | Price SU |
|-------------------------|---------|-----------|----------|
| Basic protective goggle | 1 piece | H7 277382 | 6,90     |

### Clear Anti-fog full-side protective goggle

- » With air valve for better ventilation, no fogging
- » Made of soft, comfortable, firm fitting material with surrounded side protection of eye area
- » Scratch resistant, protecting well from dust, acid and fluids
- » Colour: Transparent
- » Size: Universal
- » According DIN EN 166

| Type                              | SU      | REF       | Price SU |
|-----------------------------------|---------|-----------|----------|
| Clear full-side protective goggle | 1 piece | H7 277381 | 7,10     |

### Face shield k1

- » Full protection of the entire face area and unlimited visibility
- » Robust plastic design
- » High wearing comfort with low weight (approx. 150 g)
- » Visor made of approx. 1.0 mm high-quality polycarbonate
- » Visor with special comfort bends
- » Shatterproof and scratch-resistant
- » Can be flipped up and unscrewed
- » Acid and alkali resistant

| Type                | SU      | REF       | Price SU |
|---------------------|---------|-----------|----------|
| Face shield k1      | 1 piece | H7 170574 | 25,60    |
| Replacement disc k1 | 1 piece | H7 170604 | 12,85    |

## Filtering Half Mask - FFP1

Filters fine inert particles up to 4 times the MAK value. Filter class DIN EN 149:2001 FFP1 NR & (EU) 2016/425.

| Type | SU      | REF       | Price SU |
|------|---------|-----------|----------|
| FFP1 | 12 pcs. | H7 411110 | 9,96     |

## Filtering Half Mask - FFP1/V

With "cool down" exhalation valve. Filters fine inert particles up to 4 times the MAK value. Filter class DIN EN 149:2001 FFP1 NR & (EU) 2016/425.

| Type   | SU      | REF       | Price SU |
|--------|---------|-----------|----------|
| FFP1/V | 12 pcs. | H7 411381 | 18,00    |

## Filtering half mask - FFP2

Protection against slightly toxic and harmful particles up to 10 times the MAK value. Filter class DIN EN 149:2001 FFP2 NR & (EU) 2016/425.

| Type | SU      | REF       | Price SU |
|------|---------|-----------|----------|
| FFP2 | 12 pcs. | H7 411181 | 16,00    |

#### Filtering half mask - FFP2/V

With "cool down" exhalation valve. Protection against slightly toxic and harmful particles up to 10 times the MAK value. Filter class DIN EN 149:2001 FFP2 NR & (EU) 2016/425.

| Type   | SU      | REF       | Price SU |
|--------|---------|-----------|----------|
| FFP2/V | 12 pcs. | H7 411281 | 24,00    |

#### Filtering Half Mask - FFP2 Combi/V

With "cool down" exhalation valve. Protection against slightly toxic and harmful particles and unpleasant organic odours up to 10 times the MAK value. Filter class DIN EN 149:2001 FFP2 NR & (EU) 2016/425.

| Type         | SU      | REF       | Price SU |
|--------------|---------|-----------|----------|
| FFP2 COMBI/V | 12 pcs. | H7 411250 | 30,00    |

#### Filtering Half Mask - FFP3/V

With "cool down" exhalation valve. Protection against toxic and highly toxic particles up to 30 times the MAK value. The broad inner sealing lip guarantees close fitting. The FFP3/V provides its wearers protection against hemorrhagic fevers such as Ebola. Filter class DIN EN 149:2001 FFP3 NR & (EU) 2016/425.

| Type   | SU     | REF       | Price SU |
|--------|--------|-----------|----------|
| FFP3/V | 5 pcs. | H7 412183 | 27,50    |

Note: Particle-filtering half masks DIN EN 149:2001

Odor protection filter mask and face mask. Our half masks are characterized by low weight, modern styling, low breathing resistance, high wearing comfort (optionally with/without Cool Down exhalation valve). The innovative Cool Down valve makes it easier to exhale and prevents heat build-up in the mask. The preformed and foam-lined nose area with flexible nose clip ensures a comfortable, tight fit that is kind to the skin..

## Lifeguard Trans-Chair Evacuation chair

This evacuation chair, made of aluminium, is needed everywhere, where immobile persons have to be evacuated downstairs. Within seconds the chair is usable by only one person. The slide system secures safety during transportation and thanks to foldable little wheels the chair can be used for horizontally running transportation.

**Technical data:** Size (non folded) 88 x 53 x 140 cm (L/W/H),  
Size (folded): 120 x 53 x 17 cm (L/W/H), Weight 13 kg, Max. load: 159 kg

| Type             | SU      | REF       | Price SU |
|------------------|---------|-----------|----------|
| Evacuation Chair | 1 piece | N6 EV1000 | 615,00   |

## Matching accessories

| Article                                          | SU      | REF       | Price SU |

| Protection Cover made of rough Tarpaulin, yellow | 1 piece | N6 EV1002 | 92,50    |

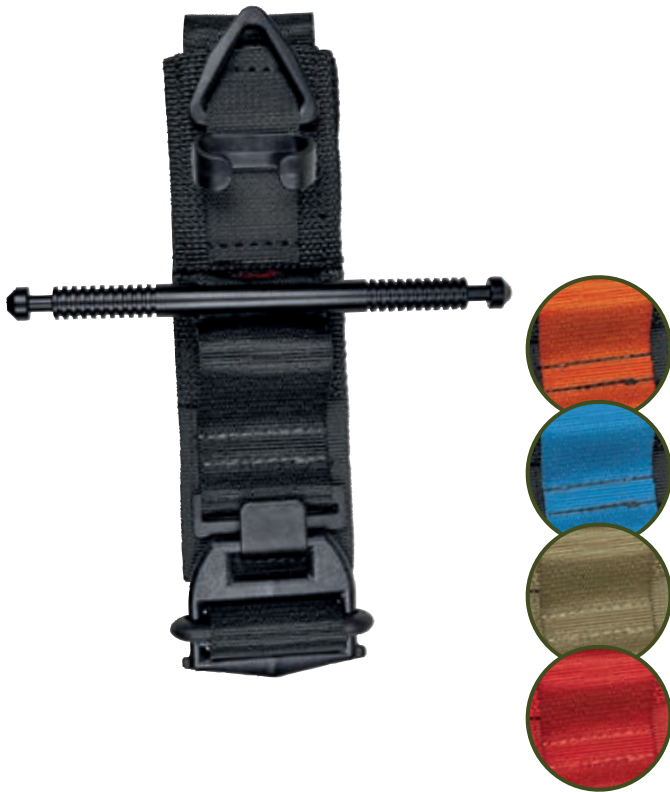

## Evac+Chair Model MK5

The Evac+Chair serves as a tool to transport persons downstairs if an elevator is missing, or cannot be used. The standard Model has got a blue textured painted frame and a contrasting yellow hammock seat. It offers a load capacity of 182 kg. Including cover, hanging bracket and information sign.

**Technical data:** (when folded) Height: 1050 mm, Width: 520 mm,  
Depth: 200 mm, Weight: 9.5 kg, Load capacity: 182 kg

| Type                 | SU      | REF    | Price SU |
|----------------------|---------|--------|----------|
| Evac+Chair Model MK5 | 1 piece | N4 MK5 | 950,00   |

### SOF Tourniquet

The newest evolution of the SOF Tourniquet sets the benchmark for prehospital tourniquets. Its innovative design incorporates end-user feedback from specific experiences and features most important to them, creating a tourniquet that is stronger, faster, and smoother than ever before.

#### Updates

- Easy-pull action for smooth, quick self-application
- Custom engineered materials for increased strength and durability
- Lighter weight for improved portability

#### Features:

- » Completely redesigned („1.5“ width) webbing maximizes compression during the application process. The new performance material glides through the Rugged Buckle for quick, snag-free operation and minimizes loss of pressure over time after application
- » New rugged buckle
- » Slack Indicator Wedge: stitched into the Performance Compression Band below the windlass, the contrasting wedge offers a visual confirmation you have pulled all excess slack from the band
- » Reinforced Tourniquet Retention Assistance Clip

| Colour | SU      | REF       | Price SU |
|--------|---------|-----------|----------|
| black  | 1 piece | N7 1007   | 39,50    |

| red    | 1 piece | N7 1007-R | 39,50    |

### TCP-Pouch

The TCP-Pouch (Tourniquet Carrier Pouch) is a small pouch to securely carry your Tourniquet. It's MOLLE-compatible and therefore can be attached to your vest or any other gear with MOLLE. Empty.

**Technical data:** Dimensions: 20 x 6 x 4 cm, Weight: 50 g

| Colour      | SU      | REF      | Price SU |
|-------------|---------|----------|----------|
| black       | 1 piece | N7 TCP01 | 9,95     |
| olive-green | 1 piece | N7 TCP03 | 9,95     |

### AAJT-S Tourniquet

Non-compressible hemorrhages are the cause of death for tens of thousands annually. Many difficult injuries in the abdomen, axilla, pelvis and inguinal areas require immediate care by first responders, paramedics, EMS professionals, emergency physicians, police officers and firefighters to help stabilize accident victims. The ability to manage difficult hemorrhages quickly and easily is imperative for patient survival until they can reach definitive care.

The Abdominal Aortic and Junctional Tourniquet-Stabilized (AAJT-S) device by Compression Works, was created to provide a solution to control junctional hemorrhage and pelvic bleeding. The AAJT-S is a multi-functional, externally applied truncal and junctional tourniquet that utilizes a wedge-shaped bladder to press into the body to occlude blood flow through all vasculature under the site of application.

The AAJT-S is cleared by the FDA for use to control difficult bleeding situations in the abdomen, axilla, inguinal area and for pelvic fractures. The AAJT-S device has been used successfully in military combat and in civilian pre-hospital settings and is the only junctional tourniquet proven to save human life in upper and lower junctional bleeding. The device also provides pelvic fracture stabilization and has been shown to be equivalent to Zone 3 REBOA.

NSN: 6515-01-616-4999

## Lifeguard Multi Trauma Bandage

The Multi Trauma Bandage has been developed to provide a large number of different injury patterns with a bandage. The pressure point is made for a better application of a pressure bandage, the twofold wound dressing can be used for extensive injuries (e.g. in abdomen) or else for simultaneous treatment of entry and exit wounds.

The use of the Multi Trauma Bandage is intuitive, it is applied like each normal dressing. Velcro strips inside the bandage prevent slipping, loosening and unintentional rolling off. The Multi Trauma Bandage is single sterile vacuum-packed.

| Dimensions              | OC       | SU      | REF     | Price SU |
|-------------------------|----------|---------|---------|----------|
| 10 cm x 4.5 m (elastic) | 100 pcs. | 1 piece | N7 MTB4 | 7,10     |
| 15 cm x 4.5 m (elastic) | 100 pcs. | 1 piece | N7 MTB6 | 7,70     |

## OLAES Bandage

No other trauma bandage of this size is as versatile as the OLAES Bandage. The bandage can be used to dress minor wounds, for pressure dressings, occlusive dressings or treat severe wounds with the occlusive plastic sheet and dressing pad. Equally useful for a qualified paramedic or untrained first-aid helper, the OLAES Bandage should be found in all medical and first-aid kits.

Every first-aid-er could use the OLAES Bandage, as it may be applied like any normal elastic bandage. There are no hooks or clips to complicate usage.

Pressure can be applied to the wound with the help of the pressure bar and thus control haemorrhaging. Velcro strips hold the OLAES Bandage in place during application. Each bandage is sterile and singly vacuum-packed.

|---------|---------|----------|----------|
| sterile | 1 piece | J8 1000S | 2,10     |

## Lifeguard Combat Tape

The Combat Tape is a universally applicable, strong adhesive tape that gives first responders additional security and support when gauze and elastic bandages are not enough. The roll is small and handy and therefore fits in every IFAK, but with the size of 5 cm x 2.5 m it offers enough tape for a wide range of applications.

### Areas of application:

- » Emergency services
- » Emergency medical services
- » Military
- » Police
- » Disaster relief

**Technical data:** Version: Color silver, Dimensions open: 5 cm x 2.5 m, Dimensions packed: 5 x 3.9 cm, Weight: 40 g

| Dimensions   | SU      | REF    | Price SU |
|--------------|---------|--------|----------|
| 5 cm x 2.5 m | 1 piece | N7 CT1 | 2,65     |

### Lifeguard Abdominal Trauma Bandage

The Abdominal Trauma Bandage ATB was designed for the treatment of extensive injuries to the abdomen as well as for traumatic amputations and burns. For this purpose, the bandage has a non-adhesive wound dressing of 50 x 50 cm, which can be placed on or around the injured region and securely fixed with the elastic bandage.

Velcro strips have intervals on the bandage which ensure a secure hold. Moreover, they prevent the bandage from unrolling unintentionally.

The ATB is individually sterile and space-saving vacuum packed.

| Dimensions              | OC       | SU      | REF     | Price SU |
|-------------------------|----------|---------|---------|----------|
| 15 cm x 4.5 m (elastic) | 100 pcs. | 1 piece | N7 ATB6 | 10,00    |

### BLAST Bandage

The BLAST Bandage was developed to enable traumatic amputations, burns and large wounds to be dressed quickly and with little fuss. The wrapped dressing is 10 cm wide, the unwrapped dressing can cover a wound of approximately 50 x 50 cm. The non-adherent wound pad can be to open wounds and limbs and held in place using the elastic bandage. The BLAST Bandage is large enough to cover the entire back or chest of large casualties.

The BLAST Bandage offers a removable occlusive layer 47.5 x 47.5 cm which can be used to cover abdominal wounds and thus prevent loss of heat and moisture. Each bandage is sterile and singly vacuum-packed.

NSN: 6510-01-586-4314

|------------|-------------|---------|---------|----------|
| 50 x 50 cm | white-beige | 1 piece | N7 1000 | 14,00    |

### Lifeguard Easy Bandage

The Easy Bandage is used for quick wound care. Velcro strips inside the bandage prevent slipping, loosening and unintentional rolling off, whereby a contamination of the bandage is prevented as well.

The Easy Bandage is available in 2 different widths.

| Dimensions              | OC       | SU      | REF    | Price SU |
|-------------------------|----------|---------|--------|----------|
| 10 cm x 4.5 m (elastic) | 240 pcs. | 1 piece | N7 EB4 | 2,65     |
| 15 cm x 4.5 m (elastic) | 240 pcs. | 1 piece | N7 EB6 | 2,99     |

### Control Wrap Bandage

Using the Control Wrap bandage, wounds may be dressed quickly and efficiently. The Velcro strip ensures that the bandage does not slip or unroll whilst being applied, thus reducing the risk of contamination or loss of pressure on the wound and also saves time.

| Dimensions     | Colour | SU      | REF     | Price SU |
|----------------|--------|---------|---------|----------|

| 15 cm x 1.80 m | beige  | 1 piece | N7 1004 | 4,95     |

## HALO SEAL

First aid for open chest wounds.

HALO SEAL is one of the original chest seals, intended to treat penetrating chest injuries. HALO SEAL acts as a mechanical barrier, adheres in the presence of moisture, dirt, blood or other residues.

### Product Features

- » Durable packaging
- » Large pull tab for easy removal
- » No vent to occlude
- » No latex used in the manufacturing of the product

### Product Specifications

- » 6-year shelf life
- » Two seals, treat entrance and exit wounds
- » Performs in temperature range of -34 – 60 °C
- » Dimensions: ca. 16.5 cm x 14 cm
- » Manufactured in the USA

Pack with 2 pcs.

NSN: 6510-01-581-0553

## Rhino Rescue Chest Seal

The Rhino Rescue Chest Seal is an advanced occlusive dressing designed to treat open chest wounds. Penetrating injuries to the chest that result in open chest wounds may lead to tension pneumothorax, the second most common cause of preventable death on the battlefield.

The Rhino Rescue Chest Seals are specifically designed with a hydrogel adhesive strong enough to adhere to skin – regardless of sweat, blood, or hair.

### Features:

- » Used by Military, Police, Fire, EMS and First Responders
- » With valves
- » Large Release Tab for Easy Application and Removal
- » Effective in Extreme Cold and Heat
- » Transparent Backing for Easy Placement Over the Wound
- » Strong Hydrogel Adhesive
- » Conforms and Adheres Easily to All Body Surfaces
- » Provides total occlusion – even with excessive blood, dirt, sand, hair, or heavy perspiration
- » Configured for ease of use in low-light environments
- » Latex-free
- » Durable, puncture-resistant packaging
- » Integrity and function maintained when stored or carried in folded configuration

### FAST1 Intraosseous Infusion System

The FAST1 Intraosseous Infusion System is designed to establish a sternal intraosseous access route to patients if a standard venous access is not possible. Using the sternal IO access route, providers can rapidly deliver lifesaving fluids and medications to facilitate emergency resuscitation through the bone marrow space. FAST1 can be effectively used during CPR and when a cervical spine collar is in place.

- » Sternum insertion site
- » Flow rates of up to 80mL/min (gravity drip)
- » Depth control (no need to choose needle length)
- » Low Profile Tubing (infusion tubing designed to be secure and not dislodge)
- » Small footprint 21.59 x 20.32 x 3.30 cm
- » Lightweight 127.6 g
- » Manual insertion – no batteries required
- » Indicated for patients aged 12 or older

### Complete thoracic drainage tray

Set completely for applying the drainage in pragmatic manner, in an ambulance or rescue van within emergency situations.

#### Contents:

- 1 XRO trocar drain
- 1 fenestrated drape 60 x 50 cm
- 2 rectangular cups for detergent and disinfecting agents
- 4 pads
- 8 gauze dressings 10 x 10 cm
- 2 dressing forceps
- 2 syringes 10 ml
- 1 needle for drug aspiration 38 x 1.2 mm (18G)
- 1 needle for skinwheal 15 x 0.5 mm (25G)
- 1 needle for local anaesthesia 38 x 0.8 mm (21G)
- 1 needle for exploratory puncture 90 x 1.2 mm (18G)
- 2 suture needles
- 1 scalpel
- 1 dual suction valve
- 1 plastic bag with connector for collecting the drained liquid
- 1 coil of adhesive bandage 75 mm wide
- 1 pair of gloves

## PRESSURE MAN II

### Pressure Man II Chrome-Line

2-tube blood pressure meter with chrome-plated, 50 mm diameter manometer, Incl. calibrated Velcro cuff. German quality.

#### Special features:

- » Scale is easy to read
- » Proven double-tube construction
- » Calibrated Velcro cuff
- » Progressive valve for uniform pressure
- » Cuff available in an attractive range of colours
- » Available as set with a matching stethoscope

| Type                | SU      | REF      | Price SU |

## B.Braun ThermoScan PRO 6000 Ear Thermometer

The new Braun ThermoScan PRO 6000 ear thermometry is featuring advanced measurement technology, has the speed and simplicity you need to capture accurate and reliable temperature readings in a comfortable way for patients.

- » The pre-warmed probe tip improves patient's comfort during measuring.
- » The probe covers are soft skinned for additional comfort intended for single use only to reduce the risk of cross-contamination.
- » Precise and quick temperature measurement - an ideal method for patients being not cooperative during the measurement
- » The memory recall feature provides the last temperature taken
- » 60 second pulse timer for manual measurement of respirations or pulse
- » Ability to set temperature scale default to Celsius or Fahrenheit
- » Electronic and mechanic safety functions protect against loss or theft.
- » ExacTemp light will pulse while temperature is in progress.
- » If the probe has NOT been constantly placed in a stable position in the ear canal, a sequence of short beeps will sound.
- » Ergonomic handle design - comfortably and securely to be held
- » Options of the base unit:
  - » small base with 1 pack probe covers (20 pcs)
  - » large base with 2 packs probe covers (2 x 20 pcs)

| Type                                                            | SU          | REF             | Price SU |

## Infrared Thermometer

Temperature measurement has never been easier. The non-contact infrared thermometer offers convenience, accuracy and precision in temperature measurement. At the touch of a button, the device instantly and accurately measures a person's temperature without the risk of contamination. Simply point the thermometer at the patient's forehead, press the trigger button and the reading is displayed immediately. Measured values can be displayed in either Celsius or Fahrenheit. Colour fever warning indicator (green/orange/red) and integrated audible alarm if the measured body temperature exceeds 38 °C (100.4 °F). Three selectable temperature measurement modes: body, room and surface temperature. Scope of delivery: without batteries.

### Product features

- » Durable measuring cell (approx. 100,000 measurements without recalibration)
- » Hygienic and easy to use, no cross-contamination
- » Response time: 1 second
- » Resolution of the temperature display: 0.1 °C (0.1 °F)
- » Coloured fever warning indicator
- » Integrated acoustic alarm
- » Suitable for newborns and adults
- » Automatic switch-off: < 30 seconds
- » Measured value memory: for 32 measurements

### Technical data:

**AMPUWA®**

solvent for the preparation of parenteral drugs. Composition: Active ingredient: 1000 ml contains: Water for injection 1000 ml. Other ingredients: None. Indications: As a solvent for dissolving and diluting drugs for injection or infusion, in accordance with the instructions for use. Contraindications: Contraindications resulting from the added drug must be observed. Side effects: If water for injection is administered intravenously without additives, hemolysis may occur. Warnings: Keep medicines out of the reach of children. For further warnings and precautions for use, please refer to the package insert or instructions for use. Available only in pharmacies. Pharmaceutical company: Fresenius Kabi Deutschland GmbH, 61346 Bad Homburg v.d.H. Date of information: December 2011.

**BRAUNOL®**

Active ingredient: Povidone-iodine Composition: 100 g solution contains: 7.5 g povidone-iodine, average molecular weight 40,000, with a content of 10% available iodine. Other ingredients: Sodium dihydrogen phosphate dihydrate, sodium iodate, macrogol lauryl ether 9 EO (Ph. Eur.), sodium hydroxide, purified water. Indications: For single use: Disinfection of intact external skin or antiseptic treatment of mucous membranes, e.g. before operations, biopsies, injections, punctures, blood sampling, and bladder catheterization. For repeated, temporary use: Antiseptic wound treatment (e.g., pressure ulcers, lower leg ulcers), burns, infected skin conditions. Hygienic and surgical hand disinfection. Contraindications: Hypersensitivity to iodine or any other ingredient of the medicine, hyperthyroidism or other manifest thyroid disorders, dermatitis herpetiformis Duhring, planned or ongoing radioiodine therapy (until treatment is complete), very small premature infants (birth weight below 1500 g). Side effects: Very rare: hypersensitivity reactions of the skin, e.g., contact allergic reactions of the delayed type, which may manifest as itching, redness, blisters, or similar. Very rare: acute reactions of the immune system (anaphylactic reactions) involving other organs (e.g., skin, respiratory tract, circulatory system). Occasional local burning at the start of treatment. Significant iodine absorption may occur with prolonged use of Braunol® on extensive wound and burn areas. Very rarely, patients with a history of thyroid disease may develop hyperthyroidism (iodine-induced hyperthyroidism), sometimes with symptoms such as rapid heartbeat or inner restlessness. After using large amounts of medicines containing povidone-iodine (e.g., in the treatment of burns), the occurrence of (additional) electrolyte and serum osmolality disturbances, impaired kidney function, and acidification of the blood (metabolic acidosis) has been reported. In very rare cases, patients with severe corneal defects developed corneal opacity due to the formation of calcium phosphates during treatment with phosphate-containing eye drops. Information status: 05/2013, Pharmaceutical company: B. Braun Melsungen AG, 34209 Melsungen.

**GLUCOSTERIL® 5% FRESenius INFUSION SOLUTION**

Composition: Active ingredient: Glucose monohydrate (Ph. Eur.). 1000 ml infusion solution contains: Glucose monohydrate (Ph. Eur.) 55.0 g, equivalent to anhydrous glucose 50.0 g. Other ingredients: Water for injection; hydrochloric acid 25%, sodium hydroxide. Indications: Carrier solution for compatible electrolyte concentrates and medications. Supply of free water. Contraindications: Untreated hyperglycemia, hypokalemia without simultaneous electrolyte substitution, metabolic acidosis. The administration of Glucosteril® 5% is associated with the supply of free water. In particular, if no concomitant electrolyte administration is given, the following additional contraindications may occur: hyperhydration, hypotonic dehydration. Special patient groups: Caution is advised in cases of hyperglycemia. Side effects: Common to very common: hyperglycemia, polyuria. Other possible side effects are related to the method of administration of the peripheral venous infusion and are not specific to the drug. As with all substances administered by peripheral venous infusion, the following side effects may occur: Frequency unknown: local skin reactions (redness, bruising, inflammation, bleeding), pain at the injection site. Special patient groups: With increasing age and severity of the disease or trauma, glucose intolerance occurs more frequently as part of post-aggression metabolism, especially if undiagnosed diabetes mellitus is also present. Warnings: Keep this medicine out of the reach of children. For further warnings and precautions for use, please refer to the package insert or instructions for use. Available only in pharmacies. Pharmaceutical company: Fresenius Kabi Deutschland GmbH D-61346 Bad Homburg. Information last updated: June 2015.

**ISOTONE SALT SOLUTION 0.9% BRAUN INFUSION SOLUTION**

Composition: 1000 ml infusion solution contains: sodium chloride 9.0 g, electrolytes, sodium 154 mmol/l, chloride 154 mmol/l. Indications: Fluid and electrolyte replacement in hypochloremic alkalosis, chloride loss, short-term intravascular volume replacement, hypotonic dehydration, isotonic dehydration, carrier solution for compatible electrolyte concentrates and medications, external use for wound treatment and for moistening cloths and dressings. Contraindications: Isotonic saline solution 0.9% Braun must not be used in cases of hyperhydration, severe hypernatremia, severe hyperchloremia. Side effects: None known when used as directed. Reporting suspected side effects: Reporting suspected side effects after approval is very important. This enables continuous monitoring of the benefit-risk balance of the drug. Healthcare professionals are asked to report any suspected side effects to the Federal Institute for Drugs and Medical Devices, Pharma ko vigilanz, Kurt-Georg-Kiesinger Allee 3, D-53175 Bonn, website: <http://www.bfarm.de>. Pharmaceutical company: B. Braun Melsungen AG, Carl-Braun-Straße 1, 34212 Melsungen, Germany.

**ISOTONIC SALT SOLUTION FRESenius INFUSION SOLUTION**

Composition: Active ingredient: sodium chloride. 1000 ml solution contains: sodium chloride 9.0 g, sodium 154 mmol/l, chloride 154 mmol/l. Other ingredients: water for injection, hydrochloric acid 25%, sodium hydroxide. Indications: Plasma isotonic fluid replacement in hypotonic and isotonic dehydration, short-term intravascular volume replacement. As a carrier solution for electrolyte concentrates and compatible medications. For moistening dressings. Contraindications: Hypersensitivity to the active ingredient or any of the other ingredients, hyperhydration. Special patient groups: Isotonic saline solution Fresenius should be used with caution in cases of hypokalemia, hypernatremia, hyperchloremia. Diseases that require restrictive sodium intake (such as heart failure, generalized edema, pulmonary edema, hypertension, eclampsia, severe renal insufficiency). Side effects: Frequency not known: hypernatremia, hyperchloremia. Warnings: Keep this medicine out of the reach of children. For further warnings and precautions for use, please refer to the package insert or instructions for use. Available only in pharmacies. Pharmaceutical company: Fresenius Kabi Deutschland GmbH, 61346 Bad Homburg v.d.H. Date of information: July 2013

**KODAN® TINCTURE FORTE COLOURLESS**

Composition: 100 g solution contains: Medicinal ingredients: 2-propanol (Ph.Eur.) 45.0 g, 1-propanol (Ph.Eur.) 10.0 g, biphenyl-2-ol 0.20 g. Other ingredients: hydrogen peroxide solution 30% (Ph.Eur.), purified water. Indications: Skin disinfection prior to surgical procedures, catheterization, blood and cerebrospinal fluid sampling, injections, punctures, excisions, cannulation, biopsies, etc. For suture care. For hygienic hand disinfection. To support general hygiene measures in the prevention of fungal skin diseases. The medically active ingredients 2-propanol, 1-propanol, and biphenyl-2-ol are effective against bacteria (including mycobacteria), fungi, and many viruses. The effectiveness of kodan® Tincture Forte colorless against viruses includes enveloped viruses\* (classification „limited virucidal“). Contraindications: Do not use for surgical hand disinfection. Hypersensitivity to the active ingredients or any of the other ingredients. Side effects: Skin irritation such as redness, burning, and dryness may occur, especially with frequent use. In rare cases, contact allergic reactions are possible. If you notice any side effects other than those described here, please inform your doctor or pharmacist. Warnings and precautions for use: For external use only. Do not bring into contact with open flames or switched-on electrical heating sources. Allow kodan® Tincture Forte Colorless to dry before applying bandages. Do not apply a thermo cautery until the skin areas disinfected with kodan® Tincture Forte Colorless are dry. In case of accidental contact with the eyes, rinse immediately with plenty of water while keeping the eyelids open for several minutes. Due to its high alcohol content, kodan® Tincture Forte Colorless should not be used on premature babies and newborns with immature skin (e.g., limited skin barrier function). \*Tested against test viruses BVDV (surrogate viruses for hepatitis C

virus) and vaccinia virus. Based on current knowledge, the results allow conclusions to be drawn about the effectiveness against other enveloped viruses, e.g., hepatitis B virus, HI virus. Pharmaceutical company and manufacturer: Schülke & Mayr GmbH, D-22840 Norderstedt, Tel. +49 40 52100-0, info@schuelke.com.

## KODAN® TINCTURE FORTE COLORED

Composition: 100 g solution contains: Medicinal ingredients: 2-propanol (Ph.Eur.) 45.0 g, 1-propanol (Ph.Eur.) 10.0 g, biphenyl-2-ol 0.20 g. Other ingredients: quinoline yellow, yellow orange S, brilliant black BN, hydrogen peroxide solution 30% (Ph. Eur.), purified water. Indications: Skin disinfection prior to surgical procedures, catheterization, blood and cerebrospinal fluid sampling, injections, punctures, excisions, cannulation, biopsies, etc., for suture care, to support general hygiene measures in the prevention of fungal skin diseases. The medically active ingredients 2-propanol, 1-propanol, and biphenyl-2-ol are effective against bacteria (including mycobacteria), fungi, and many viruses. The effectiveness of kodan® Tincture Forte colored against viruses includes enveloped viruses\* (classification „limited virucidal“). - Contraindications: Hypersensitivity to the active ingredients or any of the other ingredients. - Side effects: Skin irritations such as redness, burning, and dryness may occur, especially with frequent use. In rare cases, contact allergic reactions are possible. If you notice any side effects other than those described here, please inform your doctor or pharmacist. - Warnings and precautions for use: For external use only. Keep away from open flames or switched-on electrical heating sources. Allow kodan® Tincture Forte Colored to dry before applying bandages. Only apply a thermocautery device once the areas of skin disinfected with kodan® Tincture Forte Colored have dried. In case of accidental contact with kodan® Tincture Forte colored, immediately rinse with plenty of water for several minutes while keeping the eyelids open. Due to its high alcohol content, kodan® Tincture Forte colored should not be used on premature babies and newborns with immature skin (e.g., impaired skin barrier function). \*Tested against test viruses BVDV (surrogate viruses for hepatitis C virus) and vaccinia virus. Based on current knowledge, the results allow conclusions to be drawn about the effectiveness against other enveloped viruses, e.g., hepatitis B virus, HI virus. Pharmaceutical company and manufacturer: Schülke & Mayr GmbH, D-22840 Norderstedt, Tel. +49 40 52100-0, info@schuelke.com.

## MEDICAL OXYGEN

The manufacturer does not provide separate mandatory information for medical oxygen. Please refer to the current instructions accompanying the product. Pharmaceutical company: GT-GasTech, Salinger Feld 18, 58454 Witten.

## OCTENIDERM® COLORLESS

Composition: 100 g solution contains: Medicinal ingredients: Octenidine dihydrochloride 0.1 g, 1-propanol (Ph. Eur.) 30.0 g, 2-propanol (Ph.Eur.) 45.0 g. Other ingredients: purified water. Indications: Skin disinfection prior to surgical procedures, catheterization of blood vessels, blood and cerebrospinal fluid sampling, injections, punctures, excisions, cannulations, biopsies, etc., suture care. If no special hand disinfectant is available, octeniderm® colorless can also be used for hygienic and surgical hand disinfection. The medically active ingredients 1-propanol, 2-propanol, and octenidine dihydrochloride are effective against bacteria (including mycobacteria), fungi, and many viruses. The effectiveness of octeniderm® colorless against viruses includes enveloped viruses\* (classification „limited virucidal“). - Contraindications: Hypersensitivity to the active ingredients. - Side effects: Frequent use may cause skin irritation such as redness, burning, and itching. Allergic reactions (e.g., contact dermatitis) are also possible. If you notice any side effects other than those described here, please inform your doctor or pharmacist. - Warnings and precautions for use: Avoid direct contact of Octeniderm® colorless with X-ray pads. Flammable. Do not spray into open flames. Do not apply a thermocautery device until the disinfected skin areas have dried. Due to its high alcohol content, Octeniderm® colorless should not be used on premature babies and newborns with immature skin (e.g., impaired skin barrier function). \*Tested against test viruses BVDV (surrogate viruses for hepatitis C virus) and vaccinia virus. Based on current knowledge, the results allow conclusions to be drawn about the effectiveness against other enveloped viruses, e.g., hepatitis B virus, HI virus. Pharmaceutical company and manufacturer: Schülke & Mayr GmbH, D-22840 Norderstedt, Tel. +49 40 52100-0, info@schuelke.com.

## OCTENISEPT®

Composition: 100 g solution contains: Medicinal ingredients: Octenidine dihydrochloride 0.1 g, phenoxyethanol (Ph. Eur.) 2.0 g. Other ingredients: 2-[(3-coconut fatty acid amido) dimethylazaniumyl]acetate, sodium D-gluconate, glycerol 85%, sodium chloride, sodium hydroxide, purified water - Indications: For repeated, temporary antiseptic treatment of mucous membranes and adjacent skin prior to diagnostic and surgical procedures - in the ano-genital area of the vagina, vulva, glans penis, also prior to catheterization of the urinary bladder - in the oral cavity. For temporary supportive therapy in fungal infections of the skin between the toes and for supportive antiseptic wound treatment. - Contraindications: octenisept® should not be used for rinsing the abdominal cavity (e.g., intraoperatively) or the urinary bladder, and should not be applied to the eardrum. Hypersensitivity to the active ingredients or any of the other ingredients. Side effects: Rare: burning, redness, itching, and feeling of warmth; very rare: contact allergic reactions such as e.g. temporary redness, unknown: after rinsing deep wounds with a syringe, persistent edema, erythema, and tissue necrosis have been reported, some of which required surgical revision. When used for rinsing the oral cavity, octenisept® causes a temporary bitter taste. -

Warnings and precautions for use: Do not swallow octenisept® in large quantities or allow it to enter the bloodstream, e.g. through accidental injection. To avoid tissue damage, the product must not be injected deep into the tissue. The product is intended for superficial use only (application using a swab or spray). Pharmaceutical company and manufacturer: Schülke & Mayr GmbH, D-22840 Norderstedt, Tel. +49 40 52100-0, info@schuelke.com.

## RINGER-LACTATE SOLUTION FRESenius

1000 ml infusion solution contains: Sodium chloride 6.00 g Sodium (S)-lactate solution 6.34 g or 3.17 g Sodium (S)-lactate Potassium chloride 0.40 g Calcium chloride-dihydrate 0.27 g Na+ 131 mmol/l K+ 5.36 mmol/l Ca++ 1.84 mmol/l Cl- 112 mmol/l Lactate- 28.3 mmol/l pH value 5.0-7.0 Titration acidity 0.5 - 2.0 mmol NaOH/l theor. Osmolarity 278 mosm/l Complete list of other ingredients, indications Fluid replacement for balanced acid-base metabolism and mild acidosis. Primary volume replacement in emergency situations. For pre-, intra- and postoperative maintenance of fluid balance. Rehydration of the interstitium after colloidal volume replacement. Contraindications Ringer's lactate solution must not be used in cases of hyperhydration. Special warnings and precautions for use Ringer's lactate solution should be used with caution in cases of hyperkalemia or a tendency to hyperkalemia (especially in renal insufficiency) - Hyperchloremia - Hyponatremia - Diseases requiring restrictive sodium intake - Lactic acidosis - Severe liver disease (due to sodium intake and impaired lactate metabolism) In acute extracellular fluid or blood loss, the administration of Ringer's lactate solution should be supplemented with colloidal volume substitutes and, if transfusion triggers are exceeded, with blood preparations. Monitoring of the serum ionogram and water balance is necessary. Interactions with other drugs and other interactions None known. Contraindications Ringer's lactate solution must not be used in the following cases: - Hyperhydration Special warnings and precautions for use Ringer's lactate solution should be used with caution in the following cases: - Hyperkalemia or tendency to hyperkalemia (especially in renal insufficiency) - Hyperchloremia - Hyponatremia - Diseases requiring restricted sodium intake - Lactic acidosis - Severe liver disease (due to sodium intake and impaired lactate metabolism) In cases of acute extracellular fluid or blood loss, the administration of Ringer's lactate solution should be supplemented with colloidal volume replacement agents and, if transfusion triggers are exceeded, with blood preparations. Monitoring of the serum ionogram and water balance is necessary. 4.5 Interactions with other medicinal products and other interactions: None known. Caused by the drug itself. Possible side effects are due to peripheral venous infusion. As with all substances infused into peripheral veins, the following side effects may occur: Skin and subcutaneous tissue disorders - local skin reactions (redness, hematoma, inflammation, bleeding) - Pain at the application site The frequency of these side effects is unknown. Reporting suspected side effects after approval is very important. It enables continuous monitoring of the benefit-risk ratio of the drug. Healthcare professionals are asked to report any

suspected side effects to the Federal Institute for Drugs and Medical Devices, Department of Pharmacovigilance, Kurt-Georg-Kiesinger-Allee 3, D-53175 Bonn, website: [www.bfarm.de](http://www.bfarm.de), marketing authorization holder Fresenius Kabi Deutschland GmbH, D-61346 Bad Homburg v.d.H., Tel.: 06172/686-8200, Fax: 06172/686-8239, Approval number 6150917.00.00, Date of approval/renewal of approval, date of approval December 28, 2005, information status July 2013 11. Sales restriction: Available only in pharmacies.

## RINGER SOLUTION FRESENIUS INFUSION SOLUTION

Composition: Active ingredients: 1000 ml infusion solution contains: sodium chloride 8.60 g, potassium chloride 0.30 g, calcium chloride dihydrate 0.33 g; sodium 147.2 mmol, potassium 4 mmol, calcium 2.25 mmol, chloride 155.7 mmol. Other ingredients: water for injection, hydrochloric acid, sodium hydroxide. Indications: Short-term intravascular volume replacement, chloride losses, carrier solution for compatible electrolyte concentrates and medications. Contraindications: Hyperhydration. Special patient groups: Ringer's solution Fresenius should be used with caution in cases of hypertonic dehydration, hyperkalemia, hyponatremia, hypercalcemia, hyperchloremia, impaired renal function, and in patients with renal insufficiency who are prone to hyperkalemia, diseases that require restrictive sodium intake such as heart failure, generalized edema, pulmonary edema, hypertension, eclampsia, severe renal insufficiency, diseases associated with elevated vitamin D levels, such as sarcoidosis. Due to its potassium content, the solution should be used with caution in patients with heart disease or conditions that may lead to hyperkalemia, such as renal or adrenal insufficiency, acute dehydration, or extensive tissue destruction (e.g., in severe burns). Side effects: Side effects may occur as symptoms of overdose. Hyperchloremia may occur during use. Rare: Fever reactions caused by the method of administration, infections at the injection site, local pain or reactions, vein irritation, venous thrombosis or inflammation originating at the injection site, extravasation. Undesirable effects may also be caused by drugs added to the solution. The likelihood of this depends on the type of drug added. Warnings: Keep this medicine out of the reach of children. For further warnings and precautions for use, please refer to the package insert or instructions for use. Available only in pharmacies. Pharmaceutical company: Fresenius Kabi Deutschland GmbH, D-61346 Bad Homburg v.d.H., Information last updated: January 2012.

## STERILLIUM®

active ingredients: propan-2-ol, propan-1-ol, mecetronium ethyl sulfate. Composition: 100 g solution contains: active ingredients: propan-2-ol 45.0 g, propan-1-ol 30.0 g, mecetronium ethyl sulfate 0.2 g. Other ingredients: Glycerol 85%, tetradecan-1-ol, fragrances, patent blue V 85%, purified water. Indications: For hygienic and surgical hand disinfection. For skin disinfection prior to injections and punctures. Contraindications: Not suitable for disinfecting mucous membranes. Do not use in the immediate vicinity of

the eyes or open wounds. Hypersensitivity (allergy) to any of the ingredients. Side effects: Occasionally, slight dryness or irritation of the skin may occur. In such cases, it is recommended to intensify general skin care. Allergic reactions are rare. Warnings: Sterillium should not be used on newborns and premature babies. Only use electrical devices after the product has dried. Do not bring into contact with open flames. Do not use near sources of ignition. Flash point 23 °C, flammable. When used as intended, the product does not pose a fire or explosion hazard. If the disinfectant is spilled, take the following measures: immediately absorb the liquid, dilute with plenty of water, ventilate the room and remove sources of ignition. Do not smoke. In case of fire, extinguish with water, extinguishing powder, foam or CO<sub>2</sub>. Any transfer must only be carried out under aseptic conditions (sterile bench). For risks and side effects, read the package insert and ask your doctor or pharmacist. BODE Chemie GmbH, Melanchthonstraße 27, 22525 Hamburg.

## STERILLIUM® CLASSIC PURE

Active ingredients: propan-2-ol, propan-1-ol, mecetronium ethyl sulfate. Composition: 100 g solution contains: Active ingredients: propan-2-ol 45.0 g, propan-1-ol 30.0 g, mecetronium ethyl sulfate 0.2 g. Other ingredients: Glycerol 85%, tetradecan-1-ol, purified water. Indications: For hygienic and surgical hand disinfection. For skin disinfection prior to injections and punctures. Contraindications: Not suitable for disinfecting mucous membranes. Do not use in the immediate vicinity of the eyes or open wounds. Hypersensitivity (allergy) to any of the active ingredients or other ingredients. Side effects: Occasionally, slight dryness or irritation of the skin may occur. In such cases, it is recommended to intensify general skin care. Allergic reactions are rare. Warnings: The Hand disinfection is used to specifically prevent the transmission of infections, e.g. in nursing care. Sterillium classic pure should not be used on newborns and premature babies. It should only be used on infants and young children after consulting a doctor. Avoid contact of the solution with the eyes. If the solution comes into contact with the eyes, rinse them with running water for several minutes while keeping the eyelids open. Avoid transferring the solution from one container to another to prevent contamination. If transfer is unavoidable, it must only be carried out under aseptic conditions (e.g., using sterile containers under laminar air flow). Only use electrical equipment after drying. Do not bring into contact with open flames. Do not use near sources of ignition. Flash point 23 °C, flammable. When used as intended, the product does not pose a fire or explosion hazard. If the disinfectant is spilled, take the following measures: immediately absorb the liquid, dilute with plenty of water, ventilate the room, and remove sources of ignition. Do not smoke. In case of fire, extinguish with water, dry powder, foam, or CO<sub>2</sub>. For risks and side effects, read the package insert and ask your doctor or pharmacist. BODE Chemie GmbH, Melanchthonstraße 27, 22525 Hamburg.

## STERILLIUM® MED

Active ingredient: Ethanol. Composition: 100 g solution contains: Active ingredient: Ethanol 99% 85.0 g, Other ingredients: Butan-2-one, 1-propanol (Ph. Eur.), Tetradecan-1-ol, Glycerol 85%, purified water. Indications: For hygienic and surgical hand disinfection. Contraindications: Do not use in the immediate vicinity of the eyes or open wounds. Note: If the solution comes into contact with the eyes, rinse the open eyes with running water for several minutes. Do not use if you are hypersensitive (allergic) to the active ingredient or any of the other ingredients. Side effects: Occasionally, slight dryness or irritation of the skin may occur. In such cases, it is recommended to intensify general skin care. Allergic reactions are rare. Warnings: For external use only. Due to its alcohol content, frequent use of the product on the skin may cause irritation or inflammation. Keep away from open flames. Keep away from sources of ignition – do not smoke. Flash point according to DIN 51755: approx. 16 °C, highly flammable. When used as intended, the product does not present a fire or explosion hazard. If the disinfectant is spilled, take the following measures: immediately absorb the liquid, dilute with plenty of water, ventilate the room and remove sources of ignition. In case of fire, extinguish with water, extinguishing powder, foam or CO<sub>2</sub>. Any decanting must only be carried out under aseptic conditions (sterile bench). For risks and side effects, read the package insert and ask your doctor or pharmacist. BODE Chemie GmbH, Melanchthonstraße 27, 22525 Hamburg.

## STERILLIUM® TISSUE

Active ingredients: 2-propanol (Ph. Eur.), 1-propanol (Ph. Eur.), mecetronium ethyl sulfate. Composition: 1 moist wipe made of nonwoven fabric contains: Active ingredients: propan-2-ol 1,341 mg, propan-1-ol 894 mg, mecetronium ethyl sulfate 5.96 mg. Other ingredients: tetradecan-1-ol, glycerol 85%, fragrances, purified water. Indications: For hygienic hand disinfection, for skin disinfection prior to injections and punctures on skin with few sebaceous glands. Contraindications: Sterillium Tissue must not be used if you are hypersensitive (allergic) to 2-propanol (Ph. Eur.), 1-propanol (Ph. Eur.), mecetronium ethyl sulfate, or any of the other ingredients, in the immediate vicinity of the eyes or open wounds, on premature or newborn babies, or for disinfecting mucous membranes. Side effects: Occasionally, slight dryness or irritation of the skin may occur. In such cases, it is recommended to intensify general skin care. Allergic reactions are rare. Warnings: Use in infants and young children only after consulting a doctor. Avoid contact with the eyes. In case of contact with the eyes, rinse immediately with running water for several minutes while keeping the eyelids open. Do not use electrical devices until the product has dried. Keep away from open flames. Do not use near sources of ignition. Flash point 23.5 °C, flammable. In case of fire, extinguish with water, fire extinguisher, foam, or CO<sub>2</sub>. For risks and side effects, read the package insert and ask your doctor or pharmacist. BODE Chemie GmbH, Melanchthonstraße 27, 22525 Hamburg.

**STERILLIUM® VIRUGARD**

Active ingredient: Ethanol. Composition: 100 g solution contains: Active ingredient: Ethanol 99% 95.0 g. Other ingredients: Butan-2-one, glycerol, tetradecan-1-ol, benzine. Indications: Hygienic and surgical hand disinfection. Contraindications: Do not use on mucous membranes. Do not use in the immediate vicinity of the eyes or open wounds. Hypersensitivity to ingredients. Side effects: Mild, diffuse skin irritation or allergic reactions may occur in rare cases. In such cases, it is recommended to intensify general skin care. Warnings: Keep away from open flames. Do not use near sources of ignition. Close the bottle after use. Flash point according to DIN 51755: 0 °C. Highly flammable. Avoid electrostatic charging. Do not touch anything with alcohol-wet hands. If the disinfectant is spilled, take the following measures: Immediately absorb the liquid, dilute with plenty of water, ventilate the room, and remove sources of ignition. Do not smoke. Any transfer must only be carried out under aseptic conditions (sterile bench). For risks and side effects, read the package insert and ask your doctor or pharmacist. BODE Chemie GmbH, Melanchthonstraße 27, 22525 Hamburg.

# EMERGENCY PRODUCTS DIGITAL & ADVERTISING MATERIAL

Visit our online shop

[www.lifeguard-emergency-products.de](http://www.lifeguard-emergency-products.de) 

Sorted by **product groups**, you will find a selection of **more than 15,000 products**. **Best prices** and the latest products are just a mouse click away.

Many products are immediately available from stock.

Pay securely and conveniently!

Your goods will be delivered to your door.

## Product search made easy!

*Finding products anywhere, anytime,  
is now even easier.*

Our target group catalogues are always up to date,  
also available as flipping books on the Internet.

### The digital advantages

- Browse just like in a printed catalog
- Use the zoom and print functions
- Find your complete overview of alternative products

Catalogs,  
at an unbeatable price

**medical products**

**emergency products**

**tactical care products**

**schnell-diagnostik & laborzubehör**

### Catalogs at a favourable price

We offer you the  
opportunity to print your  
address imprint or your own  
envelope for your  
own advertising.

### Direct advertising for your customers

All available brochures  
for passing on to your  
customers can be found  
on our website.

### Advertising material with your logo

Advertise with medical  
equipment. We bring your  
company or brand visibly  
to the front.

### Packaging with your logo

Strengthen your brand.  
Products with your logo  
as your own brand.
