

BLUE LAGOON POOLS

Swimming Pools / Wellness / Water Features

COMPANY PROFILE 2026

Construction / Renovation / Technical Systems

www.blue-lagoon-pools.com

Artistic cover visualization

Specialist pool contractor

Blue Lagoon Pools provides swimming pool construction, refurbishment and equipment installation in the United Arab Emirates. Based in Dibba, Fujairah, we bring practical site experience to pools, wellness facilities and water features.

Our work covers skimmer, overflow and infinity pools, together with spa facilities, water features and the equipment that keeps them operating.

OUR CAPABILITIES

Pool construction

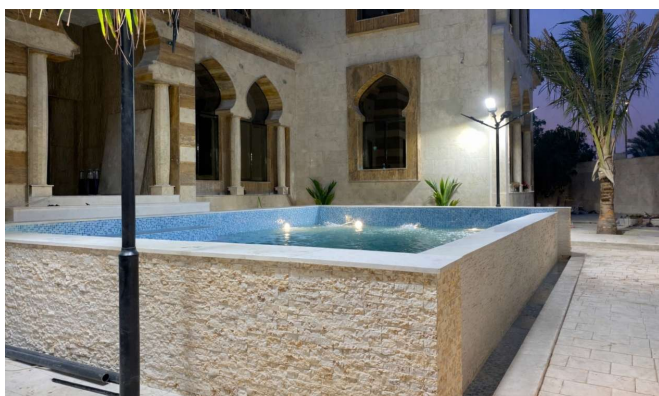

Excavation, reinforcement, concrete work and complete pool installation.

Pool equipment

Pumps, filters, pipework, valves and circulation equipment.

Heating and lighting

Pool heating and cooling equipment, underwater lighting and controls.

Pool renovation

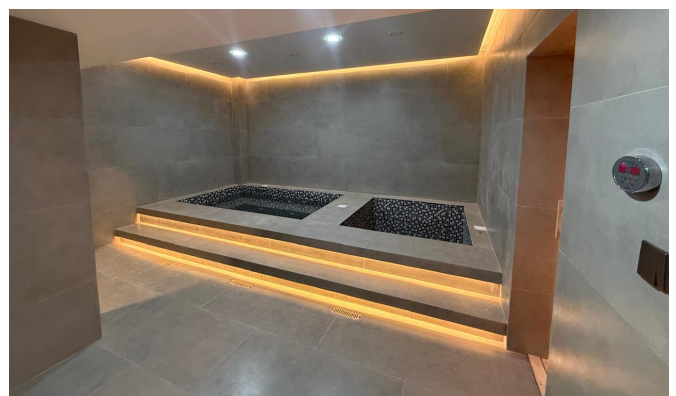

Surface preparation, waterproofing, mosaic replacement and finishing works.

Water treatment

Disinfection, dosing and filtration systems for pool water.

Wellness and water features

Spa pools, sauna and steam rooms, fountains and decorative water features.

MANAGEMENT

Abdullah Haitham Aji

Owner and Managing Director

EXPERIENCE

The owner brings nearly three decades of hands-on pool construction experience.

Renovation and technical scope

We combine civil finishing work with pool equipment installation, bringing the pool body, finishes and operating systems into one coordinated scope.

01 Assessment and preparation

Review existing conditions, define the required scope and prepare the pool surfaces for the specified renovation works.

02 Waterproofing and finishes

Carry out surface repairs, waterproofing, mosaic installation, grouting and pool-edge finishing.

03 Circulation and filtration

Install or replace pumps, filters, circulation pipework, valves, fittings and pool accessories.

04 Heating and water treatment

Integrate heating and cooling equipment, dosing or disinfection systems, and associated connections.

05 Lighting and completion

Install underwater lighting and controls, then test and commission the completed scope.

Pool shell preparation

Mosaic installation in progress

Pool equipment and plant rooms

Installation and coordination of circulation equipment, filtration, pipework and controls for swimming pools and spa facilities.

INSTALLATION VIEW

Circulation and filtration

Pumps and filters connected to the pool circulation system.

Pipework and valves

Equipment connections, distribution pipework and isolation valves.

Controls and integration

Control panels and connections for the installed pool equipment.

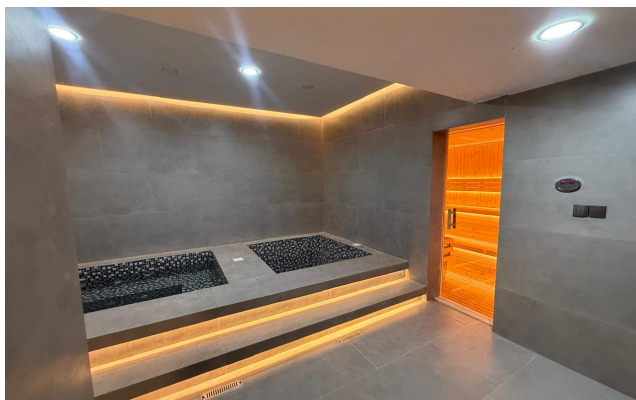

Spa pools and wellness spaces

Built-in spa pools, mosaic finishes and coordinated indoor spaces for residential and hospitality facilities.

SPA POOLS IN OPERATION

Digitally enhanced project photograph

Integrated indoor facilities

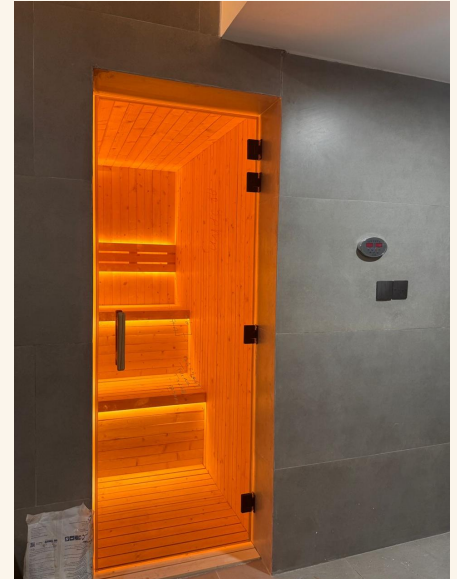

Twin mosaic-lined basins, access steps, perimeter finishes and lighting, with an adjoining sauna room.

Wet areas, finishes and operating equipment brought together.

Sauna rooms

Timber-lined sauna interiors with bench seating, heating equipment and integrated lighting.

INTERIOR DETAIL

Timber wall and ceiling finishes, tiered seating and a sauna heater form the room interior.

Lighting and access are coordinated with the surrounding wellness space.

WELLNESS SERVICES

Sauna rooms, steam rooms and spa facilities complement our swimming pool construction and renovation services.

Entrance water features

Decorative water features with mosaic-lined basins, finished surrounds and integrated illumination.

DAYTIME VIEW

Illumination at night

The same entrance feature viewed with its lighting switched on.

Pool and fountain work can be coordinated with the surrounding landscape and entrance finishes.

Pool and spa complex

Multiple pool areas integrated with paved surroundings and a landscaped setting.

COMPLETED VIEW

Digitally enhanced project photograph

Pool and spa structures during construction

Formwork and reinforcement stage

Landscaped overflow pool

Outdoor pool with perimeter coping, mosaic finishes and an integrated water feature.

COMPLETED VIEW

Digitally enhanced project photograph

Concrete base preparation

Reinforcement and embedded pool pipework

Residential pool at night

Completed outdoor pool with underwater lighting, mosaic finishes and poolside paving.

COMPLETED VIEW

Digitally enhanced project photograph

Reinforcement and pool shell works

Mosaic finishing in progress

Indoor mosaic pool

Indoor pool with mosaic finishes and built-in access steps.

COMPLETED VIEW

Waterproofing and reinforcement stage

Pool shell and internal steps before finishing

Raised pool with stone finish

Villa courtyard pool with raised edges and external stone cladding.

COMPLETED VIEW

Site preparation and excavation

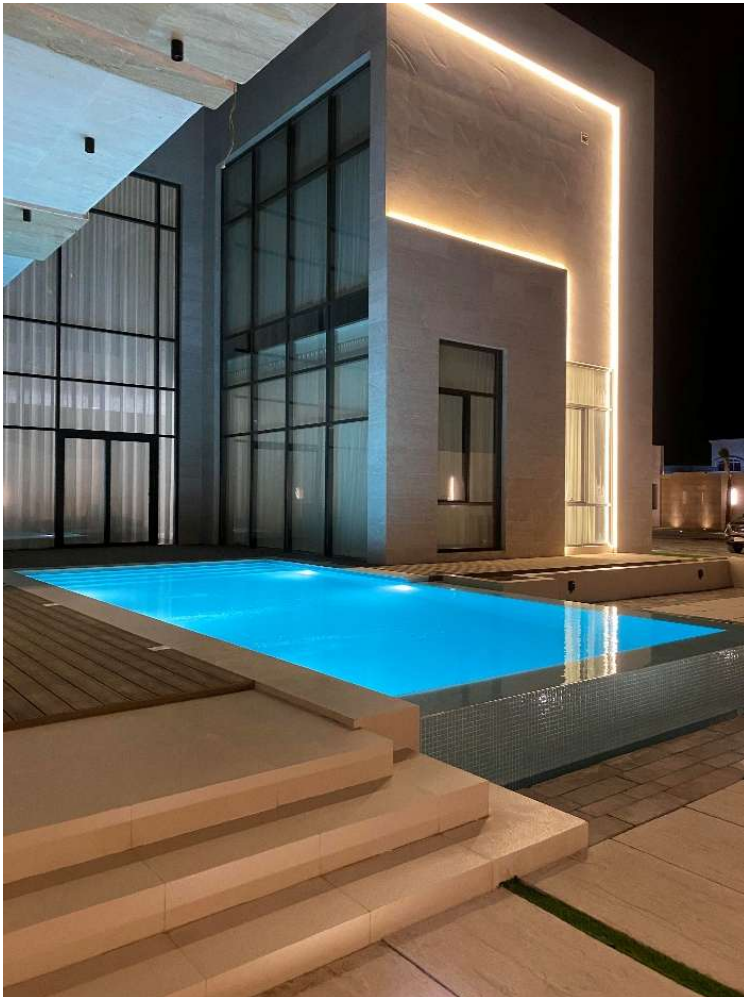

Pool body before mosaic and cladding finishes

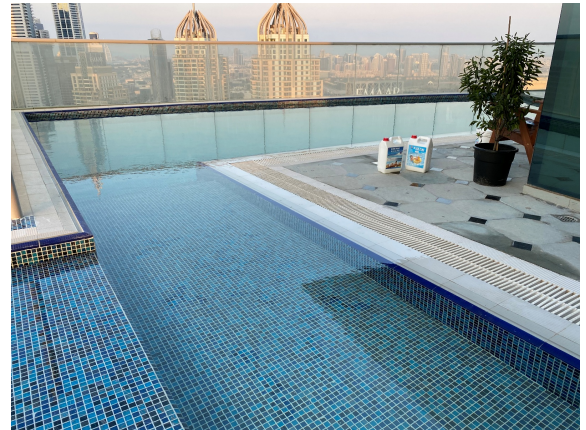

Villa and roof terrace pools

Selected pool installations in different settings, from residential outdoor spaces to elevated terraces.

VILLA POOL AT NIGHT

ROOF TERRACE POOL

Mosaic finishes, an overflow channel and perimeter glazing in an elevated pool setting.

Poolside finishes and technical installations are coordinated to suit the location and agreed scope.

Our portfolio combines completed views, installation details and construction-stage photographs to show the practical work behind the finished facilities.

Project delivery and contact

We work with clients and project teams to define the scope, coordinate the works and bring each agreed installation through to completion.

01 Scope and coordination

Site review, measurements, technical requirements and material selections.

02 Execution

Sequencing of civil works, waterproofing, finishes and equipment installation.

03 Testing and handover

Checking the completed works and commissioning the installed pool systems.
