CALL FOR PAPERS

The AIESR2026 international conference welcomes researchers, academics, experts, and practitioners in related fields to submit research papers and participate. The conference is taking place at a time of rapid global transformation driven by the rapid development of artificial intelligence technologies and their potential to transform education systems, improve scientific research, and solve current problems.

This notable scientific platform will host the exchange of information and skills, the presentation of the latest studies and practical applications, and the debate of future trends in using artificial intelligence to promote education and scientific research. They also want to improve cooperation between academic institutions, research centers, and decision-makers to create an integrated knowledge ecosystem that fosters innovation and keeps up with global advancements.

Accordingly, the AIESR2026 invites all interested researchers and specialists to submit original scientific papers on conference themes to enrich this important scientific event, which showcases Arab expertise and its ability to shape the future of artificial intelligence in education and scientific research.
