Decan Seating Solutions

Decan is a company specialized in the design, engineering and manufacturing of seating solutions where demands for quality and safety are key points. Our demountable/fixed stands as well as our other seating solutions are designed by professional engineers with extensive experience, and the finished seating systems are following and exceeding requirements from European normative and other guidelines from relevant sources.

Th Demountable/fixed stands from Decan are safe, practical and comfortable, and can be used as both temporal as well as a permanent seating solution. The dimensions, shape and colour of the structure and seats are adapted to the client's needs and can be prepared for use in both outdoor as well as indoor environments. Our seating systems can otherwise be technically and aesthetically customized and adapted to each individual project, and have also been installed and used with great success in a high number of projects in different parts of the world.

Normative and certificates:

The seating solutions from Decan are subject to and follow European normative and regulations, and satisfy the specific and detailed requirements that apply to spectator facilities. Corresponding documentation and certificates for telescopic bleachers can be provided, including:

- **General certificate/declaration document** for the demountable/fixed stands where it is confirmed that they are designed and fabricated in accordance with the specific European regulations which apply to spectator facilities: UNE-EN-13200-6: Spectator Facilities. Part 6: Demountable Stands*.
- **Structural analysis report** with calculations made according to the UNE-EN-13200-6.
- **Third party official report and certification:** Compliance to European norm UNE-EN 13200-6 is confirmed also via an independent European public laboratory/technological institute.
- **CE certificate and Declaration of performance document.**
- **Third party Factory Production Control Certificate** confirming that the factory production control is assessed to be in conformity with the applicable requirements and following the European standard EN 1090**.

*EN 13200-6 Spectator facilities – Part 6: Demountable stands.

"This European standard specifies product characteristics for demountable stands at permanent or temporary entertainment venues including sports stadiums, sport halls and indoor and outdoor facilities."

**EN 1090 Conformity assessment of load-bearing components:

"EN 1090-1 is a harmonized standard that specifies requirements for the execution of load-bearing components in steel or aluminium, requirements that must be met in order for the component to be in accordance with the EU's construction products directive, including requirements for CE marking."

Through this latter norm, production (including welds etc.) as well as material (including composition, quality, place of origin, etc.) is controlled at the class level required for the product being produced.
