

People you can trust!

Do you want a refreshingly unpressured and knowledgeable approach to choosing uPVC windows, doors and conservatories?

Choose from our extensive range of Vevo products and enjoy the highest quality as well as professional design and installation. By providing beautiful windows and doors we aim to enhance your home and lifestyle. They'll protect you from the elements too, keeping you and your family cozy in winter and improving ventilation in the summer.

We only employ experienced installation technicians and salespeople. Along with having the finest products in the business, it's the key to your quality installation. First you get sound advice. Then your doors and windows are professionally fitted to the highest possible standard for your lasting satisfaction.

With glazing technology changing so fast, you won't want to miss out. Naturally, we keep up with all the latest developments. So you can enjoy the best from the glazing industry.

Vevo windows, doors and conservatories will transform your home like no other product. We believe they're the best on the market; that's why we offer them to you...

vevo[™]
Let the **light** in

The highest quality and service are at the heart of everything we do

More than just windows & doors

Vevo means more than just windows and doors, it's about improving your home and enhancing your lifestyle. From rustic to contemporary, Vevo windows, doors and conservatories improve your home's energy efficiency, enhance your lifestyle and help keep your family secure.

The mark of Security, Reliability, Quality and Peace of mind only comes from Vevo.

Vevo PVCu Profile

Why it is the best on the market

Zero Air Leakage

Patented co-extruded bubble gaskets which out perform all others in permeability - achieving a zero air leakage result at independent tests at BSI.

Screw Retention

Hollow pockets allow for the insertion of UPVC screw retaining strips to achieve 'screw pull out forces' to rival 1.2mm steel.

Strength

The six chamber design achieves strength without the need for thermally inefficient steel inserts in both window sashes and window outer frames.

Energy Efficient

The uniquely designed six chamber energy plus system is so efficient it can achieve the energy ratings A+13 with a double glazed unit and A+23 with a triple glazed unit, which exceeds the new A++ standard.

Heat Conserving

A sign of how well insulated our Vevo windows are is that so little heat escapes, that it is not uncommon to see condensation on the OUTSIDE!

Lead Free

All Vevo Upvc products are completely lead free.

VevoChamfered

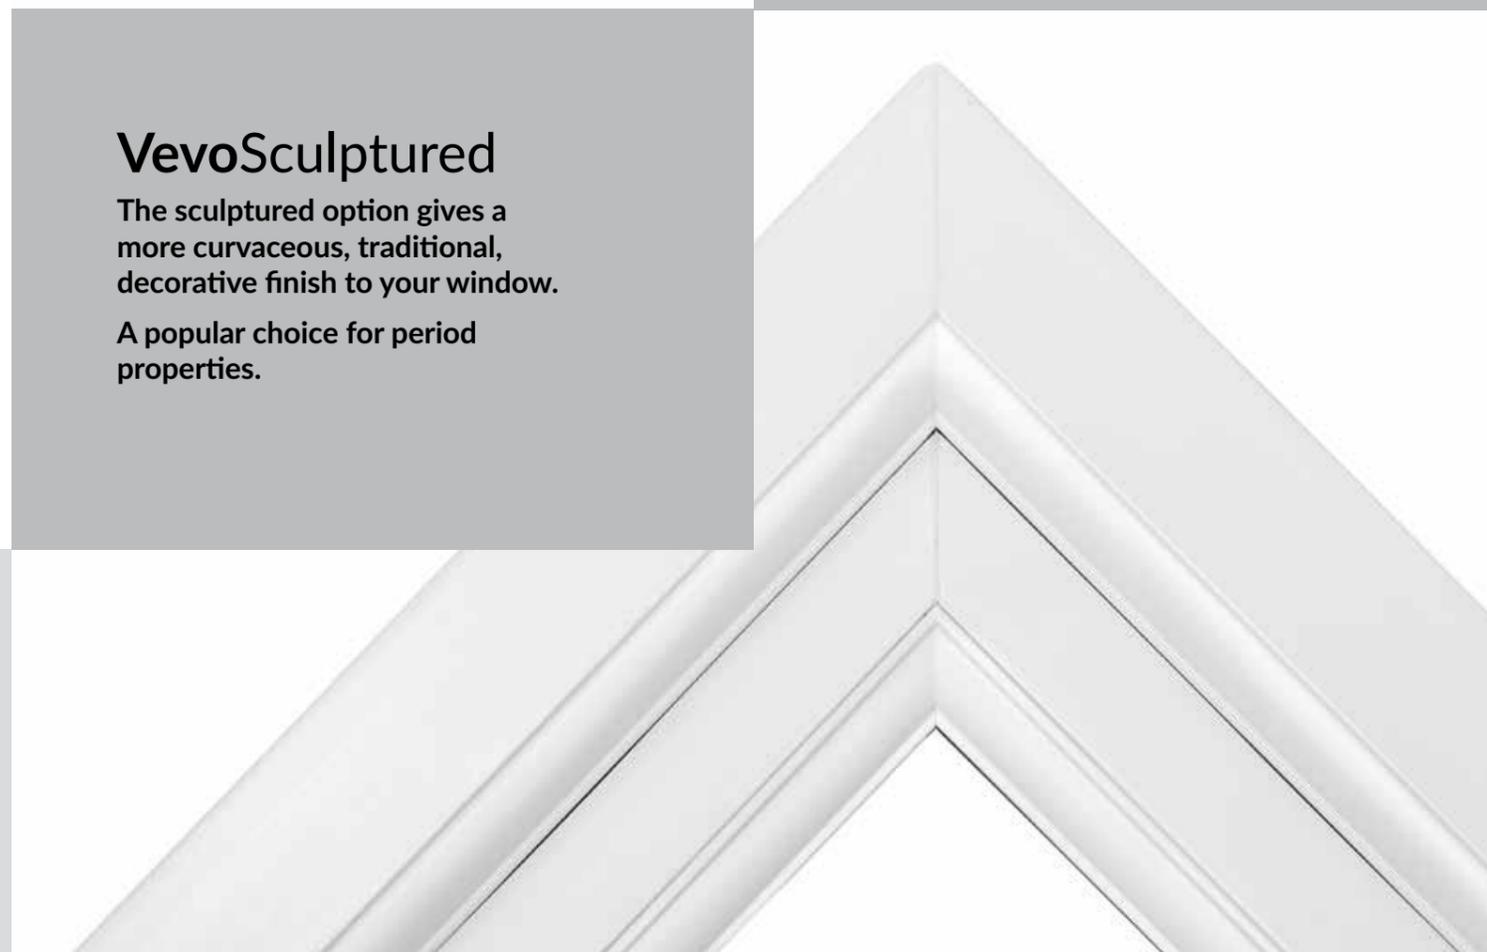

The chamfered option creates a symmetrical, contemporary, straight edged style.

Typically considered a more modern look.

VevoSculptured

The sculptured option gives a more curvaceous, traditional, decorative finish to your window.

A popular choice for period properties.

Better for the Environment

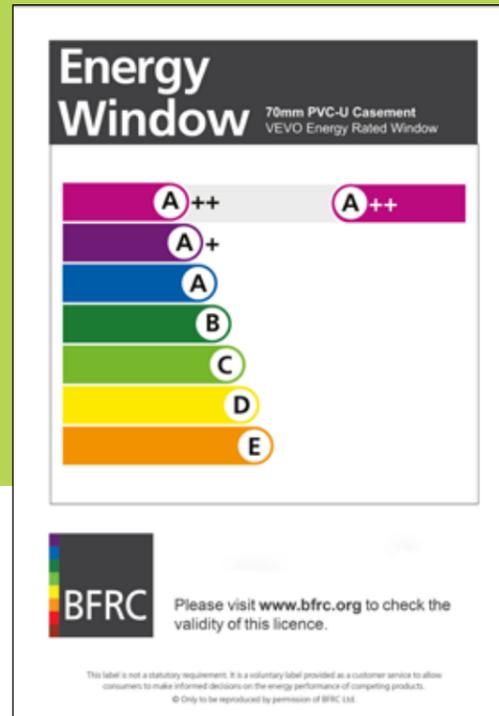

Energy ratings explained

One of the most effective ways you can save energy within your home is through installing energy efficient doors and windows.

Whether double or triple glazed, Vevo windows outperform most of the other leading windows in the UK – mainly due to our innovative PVCu multi-chambered profile design.

The BFRC Energy Rating Scheme is the UK's national system for rating the energy efficiency of windows and is recognised within the Building Regulations as a method of showing compliance for your windows installation. The rating scale runs from A++ to E, and indicates how well a product will:

- Help you contain and conserve heat within your building in the winter
- Keep out the elements
- Resist condensation on the inside
- Contribute to improved sound insulation.

The Vevo windows that we install can achieve an 'A++' rating, better than most of our competitors, which means you'll be able to enjoy a warmer and quieter home as well as lower energy bills.

Lead-free

The Vevo windows we install are made from 100% lead-free PVCu – better for the environment and better for you and your family. You no longer have lead in your petrol or paint, so why choose to have windows containing lead?

EnergyPlus

Setting new standards

The Vevo EnergyPlus range offers even greater energy efficiency for your home.

The uniquely designed six chamber energy plus system is so efficient it can achieve the energy ratings A+13 with a double glazed unit and A+23 with a triple glazed unit, which exceeds the new A++ standard.

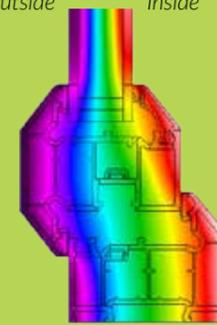

Why pay to heat your home, then lose up to 20% through your windows and doors?

Heat is being lost through inefficient windows and doors

Heat stays where it's meant to be – inside your home doors

Outside Inside

The cross section above shows how the multi-chambered profile prevents the transfer of heat from the inside to the outside.

Windows

Not every PVCu window system is the same

When you're deciding which range of windows to choose for your home, there are a number of factors to consider:

- Will they look good?
- Will they be sympathetic to the overall building design?
- Will they exceed the most stringent energy efficiency targets and help minimise ongoing heating bills?
- Will they provide the highest levels of safety and security?
- Are they available in a wide range of styles and colour choices?
- Is there a range of matching doors, roofs and other products available?
- Will the products be guaranteed?

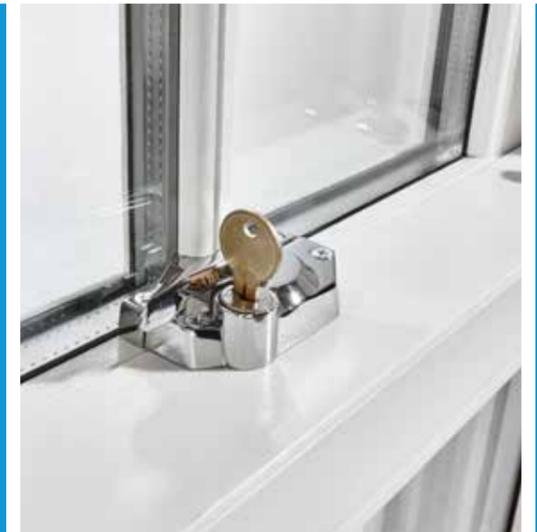

The Vevo range is different to other systems on the market – being designed from scratch to take advantage of the very latest developments in window engineering technology.

Combining high-tech design and engineering with the flexibility to create an individual appearance for every home, the Vevo system pushes the boundaries of possibility with a range that doesn't even need to look like PVCu. And with the patented double-action bubble gasket offering a continuous seal, even in the corners, draughty windows are a thing of the past.

Safe & Secure

Keep the intruders out!

Your home should be a safe haven – that's why all our windows are designed, tested and certified to meet the highest standards of security. We also cyclic test our moving parts to make sure they won't wear out, however much you use them.

Child restrictors can be fitted to almost any Vevo window to give you extra peace of mind that your little ones will be safe – please ask for more information.

Enhanced Security

High security shootbolts top and bottom.

The shootbolts are double the thickness than most on the market.

An end cam fitted close to the shootbolt adds extra security.

Metal keeps for maximum security.

The centre lock has robust opposing claws that firmly grip both ends of the keep to resist attack.

PAS24:2012

This accreditation is part of the British Standards system and shows that every component used to make the product has been subjected to a series of tests, demonstrating enhanced security performance for your peace of mind.

Secured by Design

A police-backed initiative, Secured by Design status is awarded to products designed with exceptional security features as their main priority. Products that hold this certification are tested to meet the requirements of the Association of Chief Police Officers'.

Design Options

Windows

Trusting us to use Vevo products to transform your home and lifestyle brings exciting choices. Not least, the opportunity to choose from an almost limitless range of colours, profiles, textures and styles for the look you want.

Georgian Bar

At Vevo we manufacture our Georgian style double glazed sealed units with an internal bar to give the effect (at a distance) of separate sealed units.

This popular feature is always in demand as it combines stylish traditional looks, with an easy to clean, low maintenance finish.

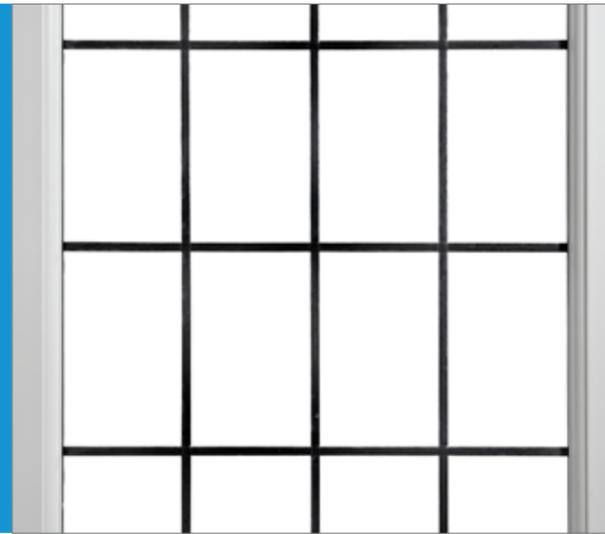

Astragal Bar

Designed to replicate traditional timber windows, the Vevo Georgian astragal bar design goes one step further than our Georgian window.

As well as incorporating spacer bars between the glass, bars are also raised from the glass to give the window an authentic cottage style look, making the astragal bar extremely popular, particularly with owners of older-style properties.

Astragal bar is available in a range of colours. The standard size bar is 25mm and our new 50mm bar looks stunning when used as a false transom or a door mullion.

Leaded Glass

Traditional leaded windows are an important architectural feature of many houses and very much part of the English Heritage.

While a lead design serves no practical purpose today leaded windows can enhance a property of any age with character and charm. A wide choice of leaded window designs are available to closely match your existing windows. There are also two different colours of lead; silver and antique which provides a more aged look. Our leaded windows offer easier cleaning and maintenance as well as the enhanced insulating qualities of modern uPVC windows.

Decorative Glass

You don't have to lose the character of your property when you update your windows.

With a wide range of choice of decorative designs or even a bespoke design, your house will retain its character whilst gaining all the benefits of new windows.

Equal Sight Lines

A more traditional look is achieved by designing your windows with equal width frames ensuring a balanced and equal sight line across all glass units. This applies both horizontally and vertically.

Unequal Sight Lines

Having opening sashes in certain areas of the window creates an unequal glass sight line between the sash and the fixed light.

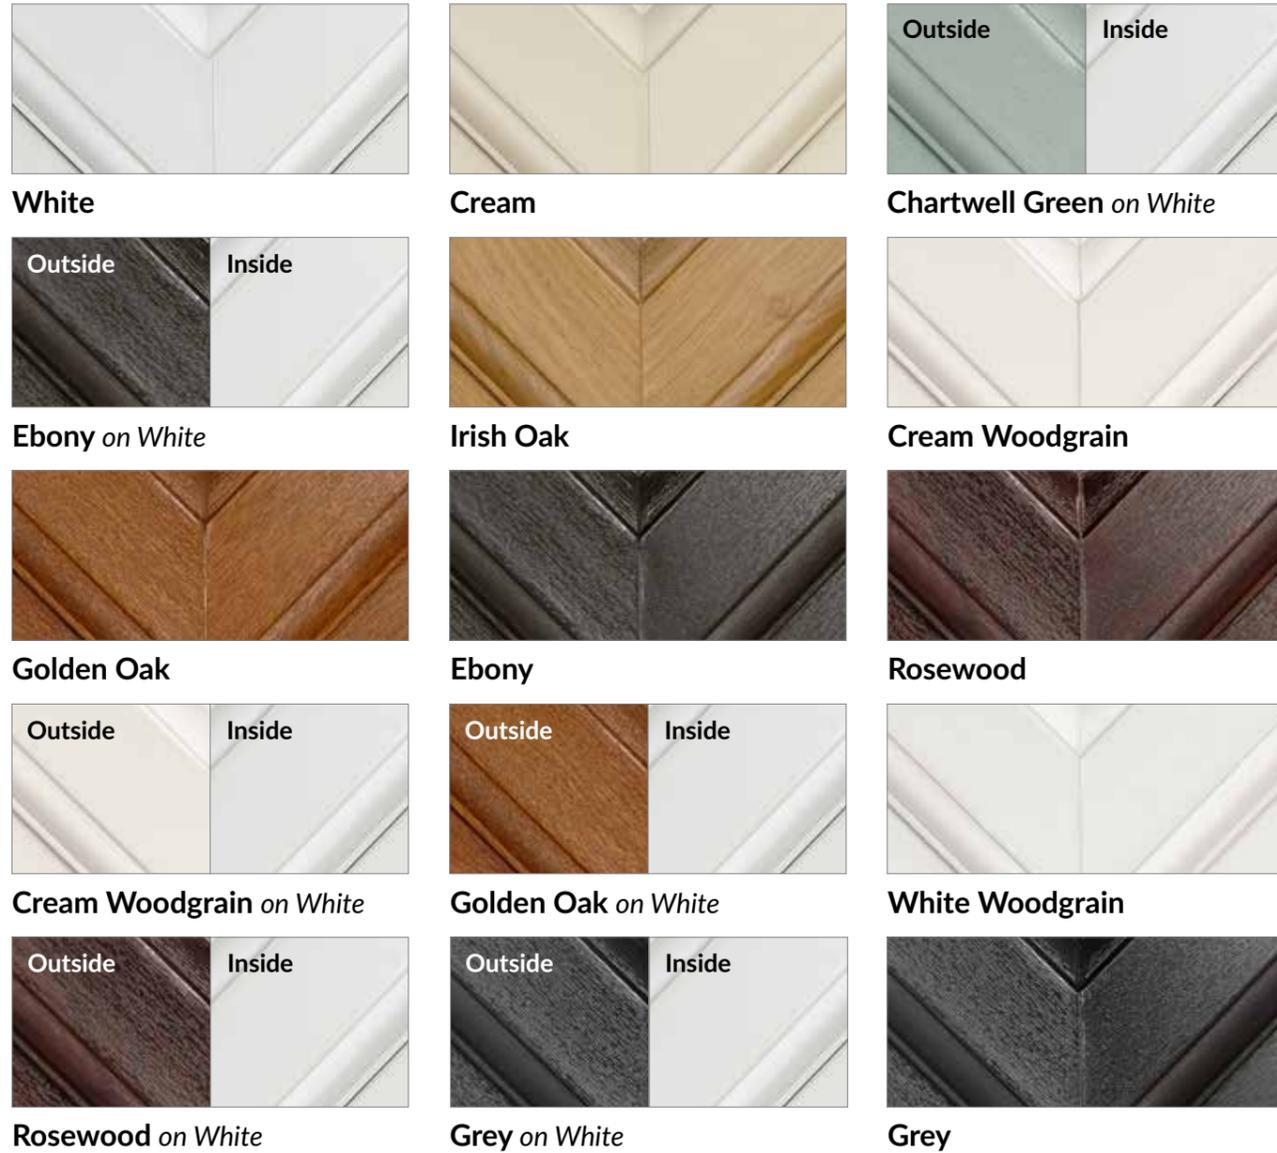

Colour Finish Options

Not just available in standard white, our windows can be personalised to suit the style of your home - as well as its colour scheme.

1. Stock Colours

The foiled colours are applied during the manufacturing process of the profile.

2. Special Colour Options

If the stock colours aren't quite what you want, special order colours are available.

The molecular cross bond process of Kolorbond means that the choice of colour for your windows is truly yours. Available in all standard RAL and BS colours. Colour can be applied to uPVC window frames, doors, conservatories and fascias. Guaranteed to adhere to the plastic and is extremely colour stable and resistant to UV. Vevo also offers a special order foiling option. Ask our sales team for details.

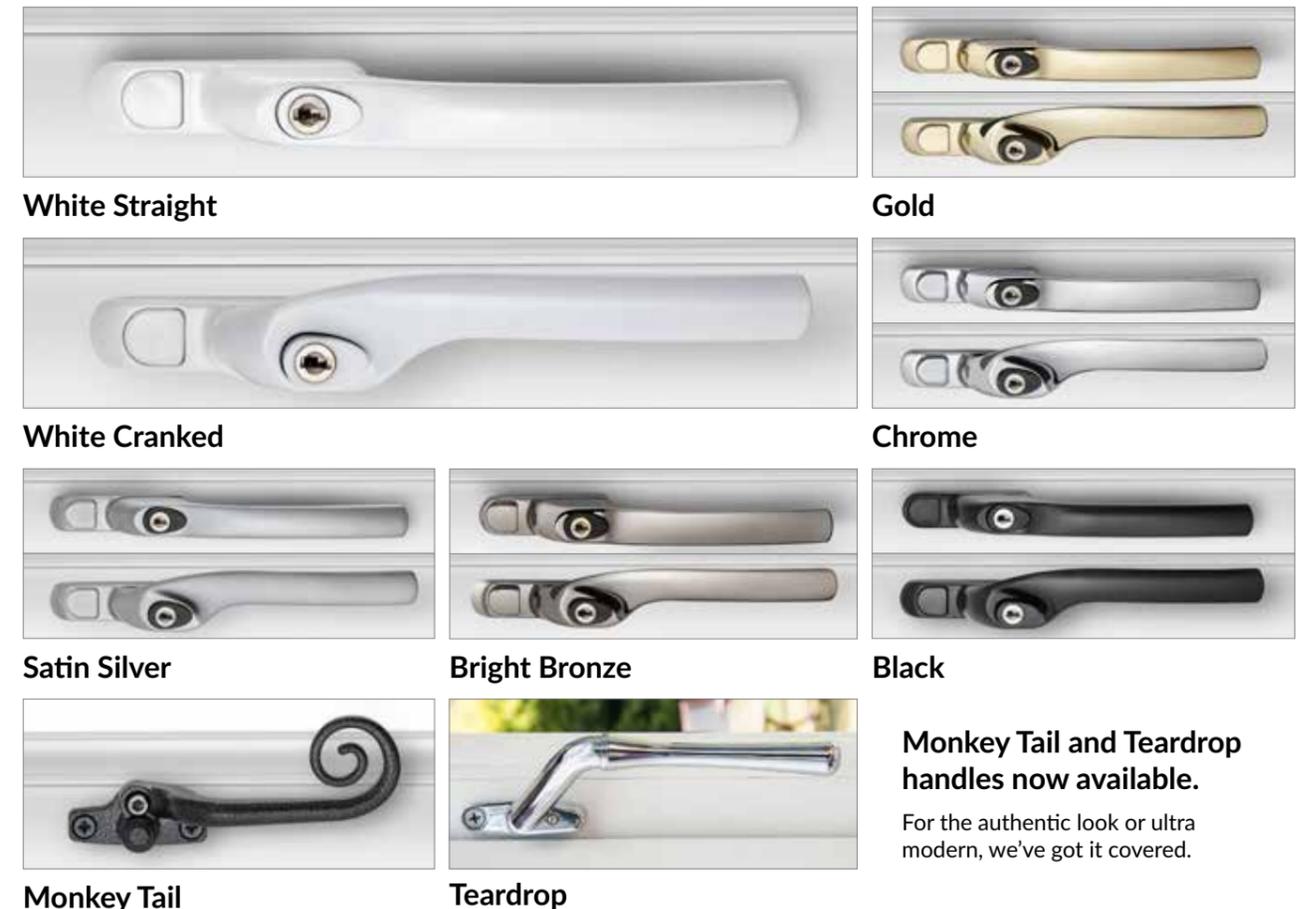

The colours shown in this brochure give an indication only. No guarantee can be given that they will exactly match the product

Handle Options

Your choice of handles complements your good taste in windows.

Our range of handles combines security, practicality and aesthetics for a long, trouble free service life - with colours and finishes to match or contrast with our uPVC products. Available in both straight and cranked styles.

Monkey Tail and Teardrop handles now available.

For the authentic look or ultra modern, we've got it covered.

Casement Windows

The casement window offers total versatility and is still the most popular choice available today.

The traditional British window style offers slim sight lines to allow in maximum light.

You can say goodbye to draughty windows as the patented double-action bubble gasket gives a continuous seal - even in the corners.

Available in sculptured (curved) or chamfered (bevelled) 70mm profiles (frames), with either 28mm double or 40mm triple glazing. Vevo casement windows are normally internally beaded, but can be externally beaded.

To add character you can add astragal bars or Georgian bars. You can also choose from a wide choice of colours, finishes, hardware and glazing options.

Vertical Slider Windows

When you want the best of both worlds, the traditional visual appeal and versatility of sliding sash windows meets low-maintenance, rattle-free modern construction in Vevo vertical sliders.

Vertical sliders can be styled with various Georgian bar designs: single, double bars or a full grid and with a choice of internal or astragal Georgian bar.

And don't forget those finishing touches: run through sash horns, thumb latches and finger pulls. We can shape your vertical slider windows to accurately suit the design of your home - see below.

Vertical sliders are also available in aluminium - see aluminium section.

Shaped Windows

Here at Vevo we are proud of our manufacturing and design capabilities and we pride ourselves on our experience and expertise and our ability to 'fit any window, anywhere'.

Our ability to manufacture windows in all shapes and sizes sets us apart from the competition and provides you with more choice. Once your windows are designed and built at our UK based workshops our Vevo craftsmen and expert fitters can install your beautifully crafted shaped windows almost anywhere and look forward to the challenge.

As with our standard range of double glazed windows the Vevo shaped windows you require can still be made from a choice of an almost limitless range of colour finishes, profiles, textures and styles for the look you want.

A window does not have to be square. Vevo can manufacture windows in all shapes and sizes and are happy to undertake more difficult installations. Arched, round or simply 'odd-shaped' we can provide the solution.

You can even have an arched vertical slider.

Tilt and Turn Windows

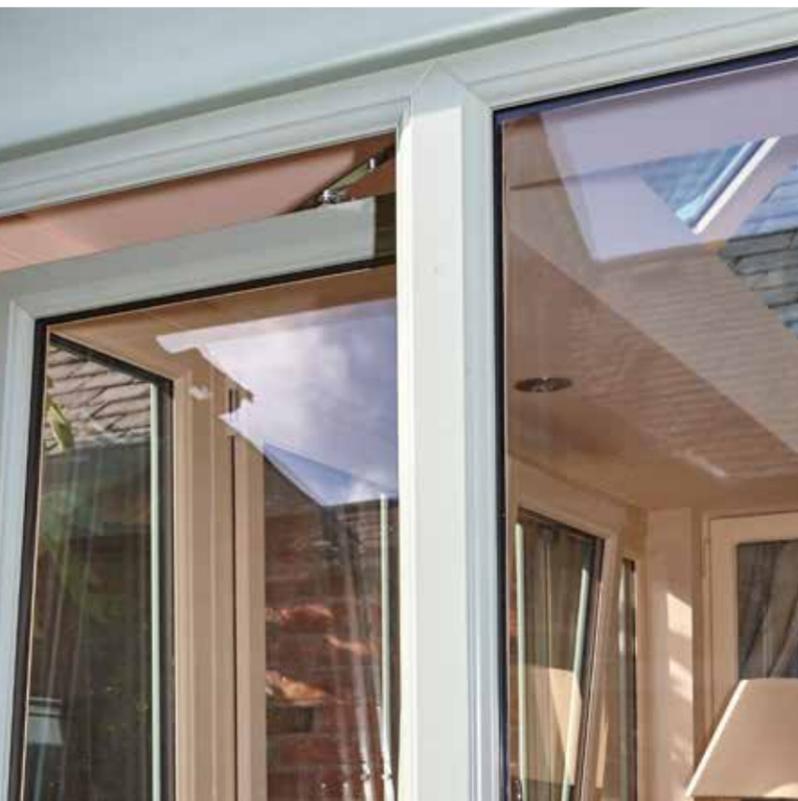

If you love having your windows open to let in fresh air, but worry about security, why not consider Vevo tilt and turn windows for your ground floor?

The open-in style of window is very much a European design and is ideal for cleaning from within (in the turn position).

Ideal for high-rise as well as low-rise applications, the tilt and turn window offers a greater scope for larger opening lights than a traditional casement window and the larger panes of glass help its thermal performance.

Perfect as a fire escape or simply to let in more fresh air, most windows are supplied as 'tilt before turn' to make them safer and avoid the risk of children opening them fully in the first instance.

With many practical benefits, tilt and turn windows are also available with as many options as our popular casement window.

Bow and Bay Windows

Bay or bow windows are a great way to bring more light into your home. Choose from different styles and colours to get exactly what you need.

Vevo's innovative bay and bow windows offer a number of features and benefits unrivalled in today's market place and are available in a range of styles.

The ultra-slim frames of Vevo's beautiful windows increase the flow of natural light as well as creating an enhanced field of view.

Enhance the look of your windows with a range of additional designs including leaded glass, Georgian or astragal bar, or decorative sash horns.

Decorative glass fanlights can be ordered to closely match your existing designs. Ask our sales team for guidance.

Sash Horn Windows

Vevo's industry leading sash horn windows provide the traditional style of yesteryear combined with 21st century materials, offering superior performance and functionality.

Sash horn windows preserve the classic look of wooden box-sash windows while maintaining the authenticity of any property.

They are designed to achieve the highest levels of weather-tightness and resistance to draughts.

Made to compliment our casement range, the sash horn window looks like a traditional sliding sash but performs as a casement - giving you the best of both worlds.

The high security shoot bolt locking systems provide unparalleled protection against break-ins and the windows can be customised with accessories such as Georgian bars for an individual appearance.

Bifold Windows

Vevo bi-folding windows can enhance almost any type of building.

Popular for use in conservatories and orangeries, the bi-fold window enables you to fully open one side of the room whilst retaining valuable wall space for furniture inside the room.

Also ideal for the commercial sector, Vevo bi-fold windows can transform a café or restaurant during the summer months – giving your establishment an open, outdoor feel whilst being child-safe and secure.

Not only does the bi-fold window have high energy efficiency, it meets the highest security standards and is manufactured in the UK. With a huge choice of colours and pane options, Vevo bi-fold windows can look either modern and contemporary or traditional, enhancing any type of building.

Doors

Every type of door for every style of home

Whether you're looking for a new front door to add character to your home, replacing existing patio doors or wanting a whole new look, Vevo's range of doors is sure to have a solution.

Style and performance don't stop at your front door. With a range like ours, you can be sure we've got a product to transform any entrance around your home. From French doors and period-style doors to the most contemporary sliding patio doors and bi-fold doors, the choice, yet again, is yours.

Design Options

Doors

You can personalise your doors and windows at every stage of your purchase. Not least when it's time to choose furniture options to complement your home décor. From colours to trims and handles, our friendly, knowledgeable sales consultants will help you make the perfect choice from the many available styles and configurations.

Threshold

Not every doorway is the same and sometimes the threshold needs to be thought about too.

Vevo uPVC doors come with a range of threshold options and considerations for disabled access too.

- Low aluminium
- Standard uPVC
- Wheelchair access
- No threshold.

Our consultant will be happy to discuss the threshold options for uPVC and aluminium bi-fold doors.

Glazing Options

Do you want to make a special statement with decorative glass?

For the ultimate finishing touch to your window and door installation, we've got a great selection of speciality glazing in a variety of colours and finishes:

- Fanlight designs
- Etched glass
- Stained glass
- Leads and Georgian
- Coloured glass
- Satin (sandblast effect)

Door Security

Keeping the family safe

What's your biggest concern when you are considering new doors? Does security for your family and possessions come top of your list? If so, you'll be pleased to learn about the advanced safety and security features designed into every Vevo product that we install.

Enhanced Security

Anti-jimmy hookbolts and anti-lift deadbolts.

High security shootbolts top and bottom.

ModLok™

Developed in conjunction with Yale, ModLok™ technology not only provides the strongest possible locking mechanism for your security but also enables the PVCu to be disposed of in the most environmentally friendly way possible at the end of its life.

Wherever you see the ModLok™ icon you can be assured of the highest security standards.

Certified

PAS24:2012 Enhanced security performance

Strength

Stainless steel keeps for additional strength and security

Steel Reinforced

Steel reinforcing is used for additional strength and security

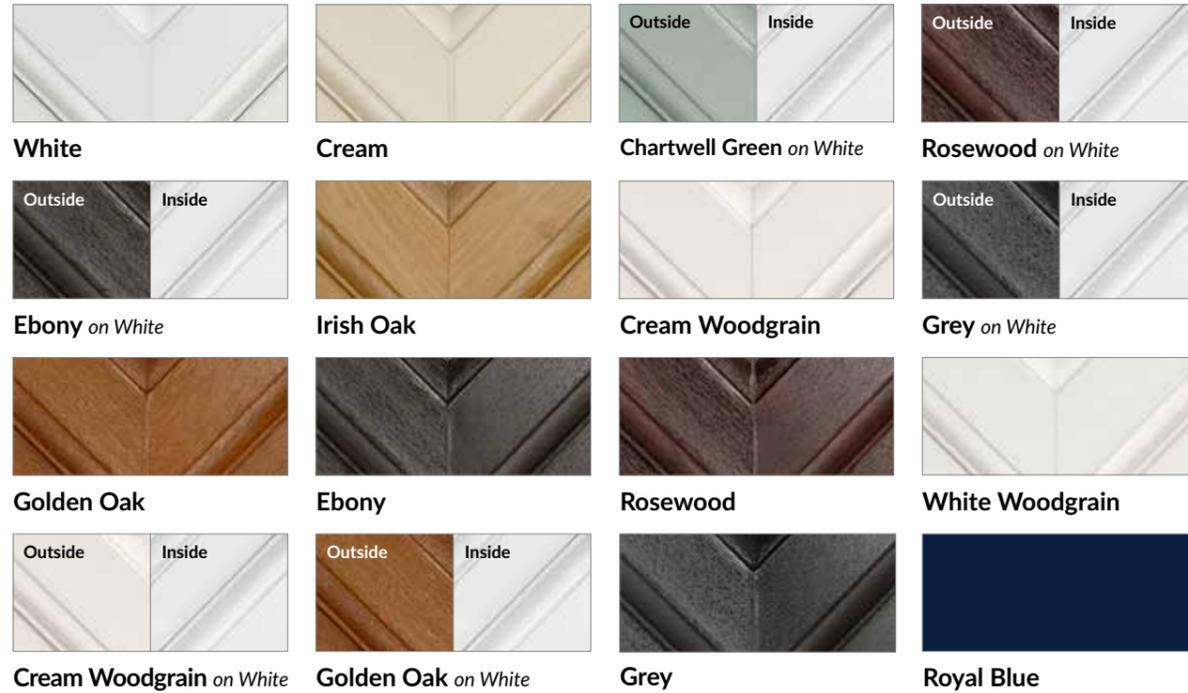

Smooth Operation

All locking points retract to open to ensure years of trouble free use.

Colour Finish Options

Not just available in standard white, our doors can be personalised to suit the style of your home - as well as its colour scheme.

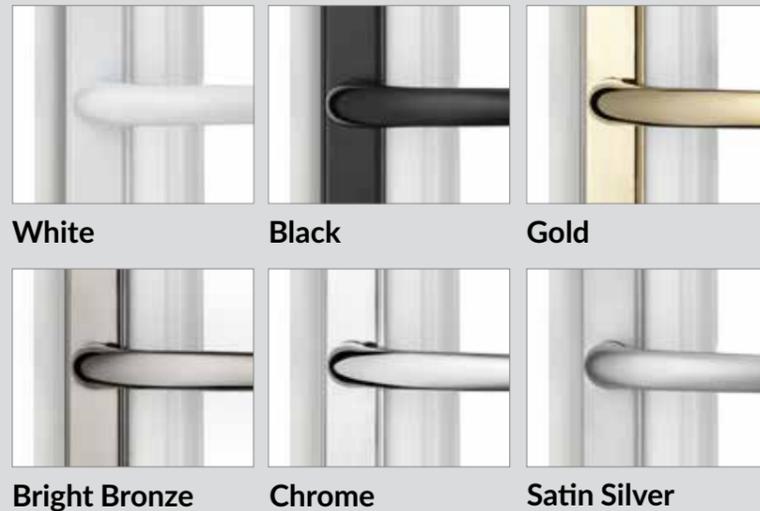

Special Colour Options

The molecular cross bond process of Kolorbond means that the choice of colour for your door is truly yours. Available in all standard RAL and BS colours. Colour can be applied to uPVC window frames, doors, conservatories and fascias. Guaranteed to adhere to the plastic and is extremely colour stable and resistant to UV. Alternatively, ask for the special order foil option.

Handle Options

Our door handles are elegantly designed and perfectly match the hinges and letterbox ranges. You can choose from a lever pad handle, usually installed on a front door, or a lever/lever, usually fitted on a back door. Please discuss your requirements with our sales team who will be happy to explore all the options with you.

Door Furniture

It's such a personal choice to complete the look of your new door, but you can select from a stylish range of knockers, letterplates and hinges.

Entrance Doors

The Vevo range of PVCu front doors is designed to match perfectly with our window range to create a co-ordinated appearance for your home.

With matching sidelights to let in more light, decorative glazing options, handles, letterboxes and knockers, you can personalise your front door to welcome your visitors in style.

We will be more than happy to discuss all available colour and accessory options.

Back Doors

The choice is yours.

You can design your back door to be fully glazed, half glazed, clear patterned or sandblasted and as with all Vevo products a choice of furniture to suit your taste.

Composite Doors

A composite front door combines the traditional appearance of a timber door with the thermal performance and optimum style of a modern solution – offering up to six times the insulation of a timber door.

Whether your home is on a busy main road or a rural retreat, a composite door guarantees security together with maintenance-free enduring performance.

Porches

You can really create the finishing touch to your home or commercial building by creating an inviting entrance and adding extra space. With the help of our professional team you can design the perfect porch for your period or contemporary property.

We will help you identify your homes unique characteristics and assist you in creating a porch that is in-keeping with your home, or maybe something completely unique.

We will take care of everything from base building and brickwork through to door fitting, windows, decorative panels and roof. We will match your existing brickwork and finish with uPVC guttering and drainpipes.

Experience guaranteed

We have fitted hundreds of porches in the surrounding area, so you are guaranteed an efficient and professional service every time.

Stable Doors

More versatile than a standard back door, our uPVC or composite stable doors provide maximum ventilation without having to open the whole door, as well as keeping children and pets safely indoors.

We combine the following to make Vevo stable doors the perfect home improvement:

- A colour that's right for you and your home
- Choice and flexibility with traditional and contemporary designs
- Low uPVC and aluminium thresholds available
- High-quality door furniture to compliment your stable door
- Security features to keep intruders out and your family safe
- Local, reliable installation and service

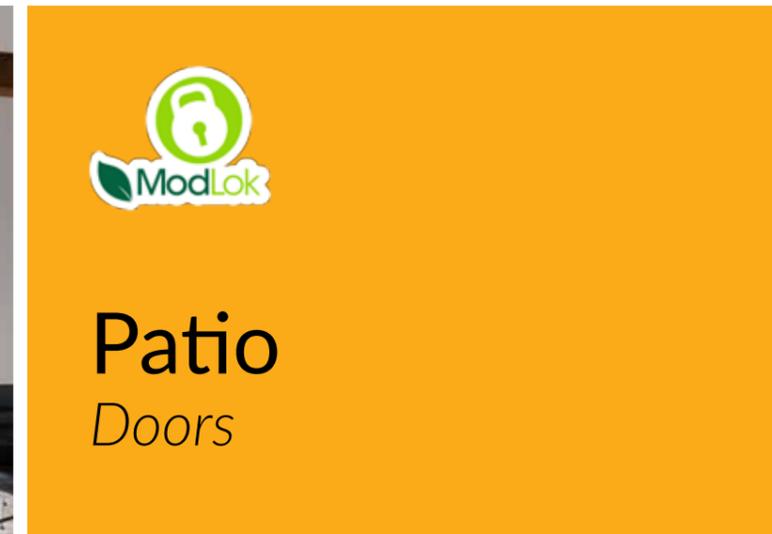

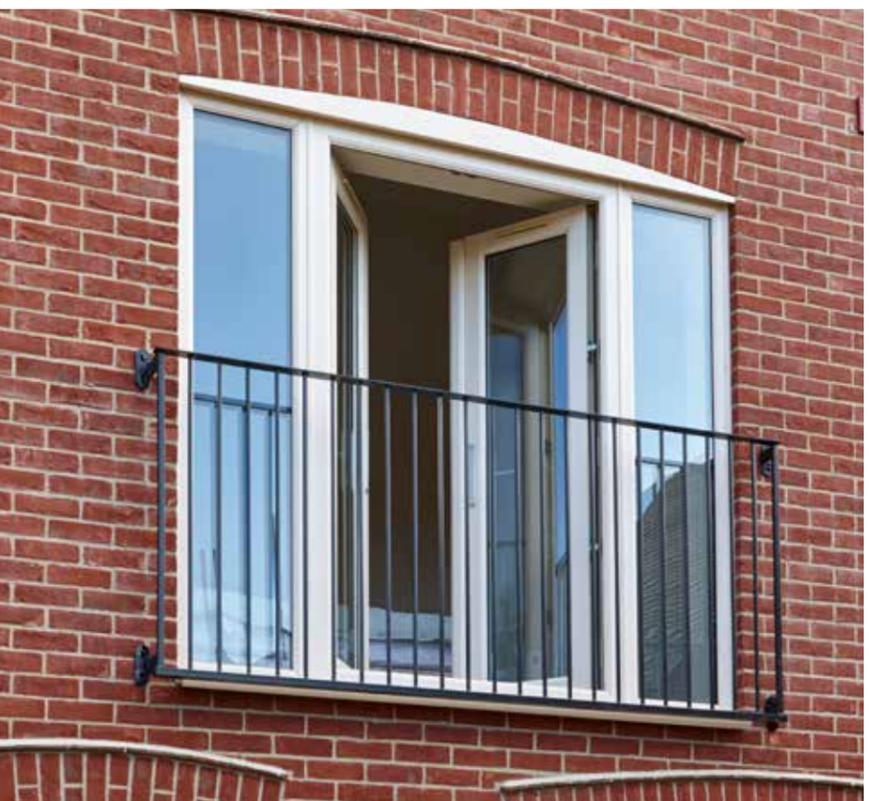

French Doors

Offering a more traditional alternative to patio or bi-fold doors, the stunning Vevo range of PVCu French doors comes with the same high specification and colour options as our window range, just as you'd expect.

The Vevo French door is available in either 'open in' or 'open out' style to suit your living space and provide your home with a beautiful and secure entrance – complete with a range of patented low and ultra low threshold options.

And, of course, with Vevos unparalleled energy efficient, lead-free profile used to make every door, you can be assured of the highest quality French doors for your home.

Our exclusive patio door with ModLok™ is one of the UK's only PVCu patio door systems to include a family-friendly low threshold option without the need for major renovation work to your home.

Available in the beautiful VevoSculptured profile, you can choose from 2, 3 or 4-pane styles, in a range of gorgeous colours to perfectly complement the style of your home – and your replacement patio door installation can usually be carried out in just one day.

With patented ModLok™ locking mechanism, in addition to a range of other anti-theft features, your Vevo patio door offers the highest levels of security – and as each Vevo Patio system is fully designed and manufactured in the UK you can be sure of the highest quality. The unique 'air glide' running system, means your patio door runs quietly and smoothly – you really need to see it for yourself!

Patio doors are also available in aluminium, see Visoglide Plus details in aluminium section on page 38.

uPVC Bi-Fold Doors

Imagine being able to open up an entire wall of your room, bringing the outdoors indoors and bringing a whole new dimension to entertaining at home.

The Vevo bi-fold is the only PVCu range with a completely smooth opening and closing action, slimline frames, bespoke hinges and locks, together with a choice of styles, colours, pane combinations and handles – and our registered design low threshold opening for family-friendly or wheelchair access.

The bi-folding door range comes in a huge range of opening configurations so you can be sure of getting the right one for your home – from a 2-pane to a 7-pane door. Talk to us today about the most suitable combination for your needs.

Now with patented ModLok™ locking mechanism for extra security and strength, we believe it is the very best on the market. Add to that being one of the most thermally-efficient, helping to keep energy bills lower, and you can see why the Vevo bi-fold is a more cost-effective choice than a timber or aluminium door.

Aluminium Bi-Fold Doors

With Vevo products there is always an option. The option of aluminium provides additional strength and durability.

Thermally efficient they contribute to a reduction in heat loss and the cost of heating bills, providing warmth and comfort. The rigidity of aluminium sections means that these bi-folds show more glass and less frame than the uPVC option. In a white finish, they blend in seamlessly with a uPVC conservatory. The strength and durability of aluminium also make them the perfect choice for commercial applications such as restaurants, cafés and bars.

Colour Options

The standard finish for an aluminium bi-fold is white (powder coated) and guaranteed for up to 25 years, (although can be scratched if mishandled). Alternatively, any RAL colour is possible. You could choose one colour inside and another outside. To make a real feature of your bi-fold there is also a wide choice of metallic finishes. For the final touch, colour coded handles, hinges and roller carriers are available.

Alumina Bi-Fold Doors

Get the best of both worlds with cost effective, energy efficient PVCu windows and perfectly matching, 'warm touch' aluminium bi-folding doors.

Alumina by Liniar is a true aluminium bi-fold door with high thermal efficiency – helping to keep more of the heat in your home and reduce energy bills. With U-values as low as 1.2W/m²K, Alumina offers much better energy efficiency than other aluminium bi-folding doors, thanks to its innovative thermal lock.

High security features include shootbolts, anti-lift features, anti-bump cylinders and optional anti-snap cylinders. The Alumina bi-fold is so secure, it has passed stringent PAS24 testing and carries Secured by Design accreditation for your peace of mind.

As the only foiled aluminium bi-fold on the market, Alumina matches perfectly with Liniar PVCu windows – offering a warm touch finish. The shape of the frames has even been carefully designed to match with the sculptured shape of Liniar windows, so the whole installation is perfectly co-ordinated.

Aluminium Windows and Doors

Vevo Windows also offer a fantastic range of aluminium doors and windows as well as the high quality upvc windows and composite doors. We manufacture our aluminium product range in our state of the art factory to your exacting specifications.

Our aluminium windows range has been steadily growing and we've mastered the art of creating the best possible aluminium windows to suit any home. Our windows are low maintenance and are not liable to rotting or warping in the elements.

Aluminium Windows

Alitherm 300 & Alitherm 800

The Alitherm 300 is perfect for residential installations or for an 'A' rated casement, choose the Alitherm 800.

Heritage 47

When you need to keep the style of your building's original windows and you cannot detract from the aesthetic or character of your property, there is a solution. Heritage 47 offers practical, elegant aluminium windows that enhance and protect your property.

Aluminium Sliding Sash

The slim frame sightlines, and slim '42mm' meeting rails make this modern window perfect for a commercial property. The flush opening of the sashes with no projection makes the Vevo aluminium sliding sash window ideal for schools & hospitals.

This window can also be used in domestic properties with a choice of decorative sash horns & deep bottom rails available if you are trying to replicate a traditional sash window. All Vevo aluminium sliding sash windows come with traditional authentic looking catches in a range of colours: White, Black, Gold, Chrome & Brushed steel.

Aluminium Sliding Sash

Alitherm 300

Alitherm Plus

Visoglide Plus

Heritage 47

Aluminium Doors

Alitherm Plus

The Alitherm Plus range of residential aluminium doors gives a high performing, robust domestic door at an affordable cost. The Alitherm Plus range features adjustable hinges and lock keeps ensuring your door is completely adjustable and secure for any application.

Visoglide Plus

A Vevo Visoglide Plus door adds eye-catching impact to the exterior of your home. The outward appearance focuses on stunning glass areas, highlighted by bold aluminium sections styled with clean aesthetic lines that work in harmony with the character of any home.

Slide 2000

The Vevo Windows Slide 2000 is a versatile single track residential sliding door system that provides consumers with a highly attractive slim line sliding door that has all the advantages of modern thermal break profiles to keep the heat in.

The Slide 2000 offers the option of 2 or 4 pane doors to suit any application. The 2 pane mono-track option provides a single opening sash on either the left hand or right hand side. The 4 pane option allows for two opening sashes in the centre and fixed panes on the outside.

Slide 2000

Conservatories

Add light & space to your home

A luxury dining area? A second lounge, playroom for the children or a spacious hobby room?

Imagine using the extra space that your Vevo conservatory gives you, and how it will transform how you live all year round.

Choosing the right conservatory is a big decision. Your choice must complement your home and your taste. It must integrate seamlessly with your house and garden. It must match the scale of your property and the way you use your home, and it must suit your budget.

That's why, whether you choose a Georgian, Victorian, Orangery or the simplicity of our Lean-to conservatory, it's so important for us to help you make the right choice to enhance your home. With more options and more helpful support from us, you have more freedom to choose the conservatory that's right for you.

A bespoke conservatory has limitless possibilities, so if a standard design doesn't fit your space; a Vevo bespoke conservatory is limited only by your imagination. Talk to our sales consultants to picture the ideal living space and make it a reality.

As your local installer of Vevo conservatories, you can count on us for superb products, installation and customer service. Service that begins with your call. Service that continues long after our methodical, courteous, professional installers have left you with a smile on your face.

Lean-To

The Lean-To conservatory is the simplest of conservatories in terms of design and its clean lines help it maintain a contemporary look which still makes it a popular choice of conservatory style today.

Whether your lean-to conservatory is traditional or contemporary, the style is perfect for properties that have restricted space under the eaves, like a bungalow, or have an area that's too awkward to accommodate a conservatory. This is because the pitch of the roof on lean-to conservatories can vary – so a shallow pitch can fit under a low bungalow roof and a steeper one would be ideal for a terraced house.

Victorian

The Victorian conservatory is the most popular style of conservatory and it suits all styles of house and home whether it be a period property or a new build.

When people think of a conservatory it is the Victorian style that comes to most peoples minds. The Victorian conservatory style includes a bay front, a steeply pitched roof and ornate ridge details.

Victorian conservatory styles comprise the three-facet Victorian, featuring a bay front with three main windows at wide angles, or the five-facet Victorian. This conservatory style also has a bay front but with five main windows for space as well as aesthetics.

Orangery

Orangeries, like conservatory styles, are both traditional and contemporary, falling somewhere between conservatory and traditional extension styles.

With their brick pillars, orangeries offer more privacy than conservatory styles and the interior height provides a breathtaking focal point through which light floods in to your home. Your orangery will also offer a seamless link between your home and garden.

Orangeries use less glass than modern conservatory styles.

Georgian

The Georgian conservatory style is characterised by lightness and airiness, with more subdued lines than the ornate Victorian'.

The Georgian conservatory style features a flat front and a square or rectangular symmetrical shape. This makes the Georgian conservatory a really handy shape for laying out furniture and plants, with no wasted space.

The Georgian conservatory typically has a high, sloping roof style that gives a spectacular vaulted effect. Your conservatory floods with light, making it a bright, airy and uplifting room.

Lantern

For those with the right budget, a lantern conservatory style makes a fantastic statement of grandeur and elegance.

Lantern conservatories feature a two-tier conservatory roof on different levels, creating a 'wedding-cake' effect. The two levels are separated by a row of windows that is highly stylish and makes this style ideal for period properties of Victorian and Edwardian vintage, where relatively plain conservatories might not match the grandeur of the existing building.

The lantern conservatory is a style that is often chosen to house swimming pools, orangeries or for larger conservatories.

Gable

A gable-end conservatory can add real grandeur to your home.

A gable-end conservatory is square or rectangular in style, like a Georgian conservatory. This gives you maximum space to plan the interior of your gable-end conservatory. The gable front of the conservatory adds style and also maximises light coming into the room, while the height of the conservatory gives the room a feeling of space.

The gable roof provides a grand and stunning impact both inside and out, and the front of the gable-end conservatory can have a number of designs including a 'sunburst' effect.

Solid Roof

Is your conservatory too hot in the summer and too cold in the winter?

A solid roof may be the perfect solution. Whether you are constructing a new home extension or replacing an old existing conservatory roof a solid roof can give you total design flexibility and the ability to create stylish and thermally efficient rooms like no other solution on the market.

Constructed from insulated composite external panels and slab insulation, solid roofs are strong and robust yet extremely thermally efficient.

P-Shaped

P-Shape - combining a mix of lean-to and Victorian styles, a 'P-shape' is the ideal choice for a larger conservatory.

Ideal for larger, detached properties, this style combines a lean-to conservatory with a Victorian conservatory, which can be either three-faceted or five-faceted. When you combine a lean-to with a Georgian-style conservatory, this is called an L-shaped style.

The P-shape style is commonly used as two separate living areas. Modern families often use the longer part of the P-shape style as a lounge or dining area, with the rounded part being used as a children's play area.

Our Accreditations

Dedicated to excellence

We are committed to providing our customers with the best quality windows and doors. To achieve this goal we have devoted time, effort and expense into obtaining all the relevant standards and accreditations the glazing industry has to offer.

Bespoke

Although all our conservatories are custom built, you may have your own unique requirements.

For example a T-Shaped conservatory allows you to create two distinct living spaces within the one room.

You may wish to have a completely original shape of conservatory designed and constructed to fit your requirements. The door, window and roof systems that we install can be combined in many unique and exciting ways. Ask our sales team and we will be happy to discuss your requirements to help you to achieve the conservatory of your dreams.

Product Accreditations

Build Check Folding Sliding Doors
Build Check is an independent testing and certification company which operates throughout the UK and Europe and has become a highly respected provider within the marketplace, operating a management and quality system conforming to ISO/IEC 17025 (Testing) and BS EN 17065 (Product Certification) and accredited by UKAS and the BFRC.

ModLok™ Bi-fold was the first product to successfully meet the stringent requirements.

Secured By Design
Secured by Design is the initiative from the Association of Chief Police Officers (ACPO) that aims to reduce crime through effective environmental design.
Vevo products that qualify to hold this certification are tested to meet the requirements of the Association of Chief Police Officers.

Profile Accreditations

BS EN ISO 9001:2008
Quality management system: Strong customer focus, management motivation, the process approach and continuous improvement.

BS EN 12608:2003
The standard of quality, consistency and performance required for UPVC extruded hollow profiles.

BBA
The BBA (British Board of Agreement) is the UK's major authority offering approval of construction products, systems and installers.

Their certificates are recognised by architects, engineers and specifiers as an impartial and unbiased review on the performance of products, and Liniar holds a certificate for the whole window system.
