

GYSIN AG has over 60 years of experience in **GEAR MANUFACTURING** and **PRECISION GEARBOXES**.

GYSIN precision gearboxes drive **TECHNOLOGIES** in many industries including medical device, optical, oil and gas, aviation and aerospace as well as manufacturing systems.

Our **EXPERTISE** is a reflection of a highly qualified and thriving employee base. They form our basis along with modern manufacturing equipment and software to maximize our precision work.

Our **STRENGTHS** include the ability to advise and support you in finding the best possible gearbox and gear-component solutions to fulfill your specific requirements.

GEARS

We manufacture gears in accordance with your requirements. Whether made of steel, aluminum, special alloy or synthetic materials, we can take on your challenge.

WORM GEARBOXES

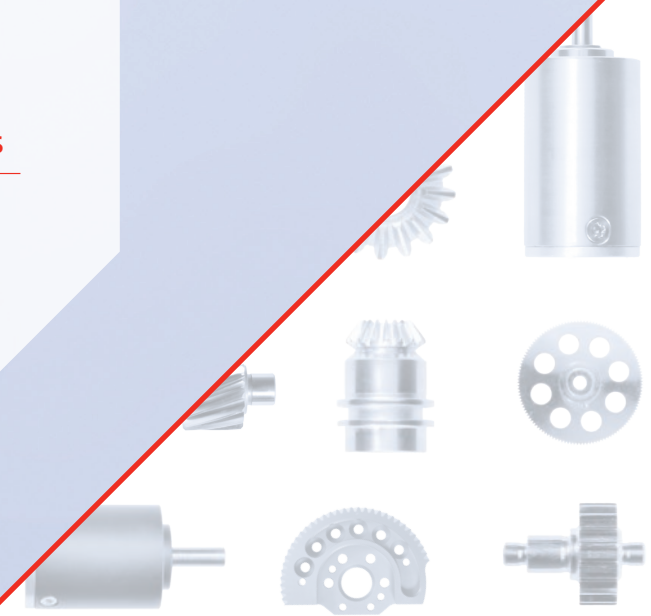

Based on our experience, we meet the individual design, manufacturing and on-time delivery requirements of our gearboxes.

PLANETARY GEARBOXES

Our precision gearboxes perform based on innovative technology that results in an excellent product.

SPECIAL AND CUSTOM GEARBOXES

Numerous custom solutions and our decades of expertise allow us to offer you a product that meets your exact requirements.

QUALITY COMMITMENT

Our high-quality products are defined by your unique specifications.

Complex projects in gearing technologies are challenges that we master on a daily basis.
