MORVA L.L.C.

About MORVA

MORVA is a specialized professional services firm founded by two leading experts in Disaster Risk Reduction, Crisis Management, and Sustainable Development, with a combined track record spanning the United Nations system, national governments, and frontline disaster operations across the Arab Region and beyond. We help governments, international organizations, and private sector clients turn operational risks into strategic advantages – combining UN-grade technical expertise with AI-powered analytics, and on-ground field experience to deliver solutions that are evidence-based, context-sensitive, and built to last.

With offices in the UAE, Kuwait and Syria, and a proven track record across the Arab Region, MORVA brings unmatched regional depth anchored in the Sendai Framework, ISO 31000, and international standards.

OUR MISSION

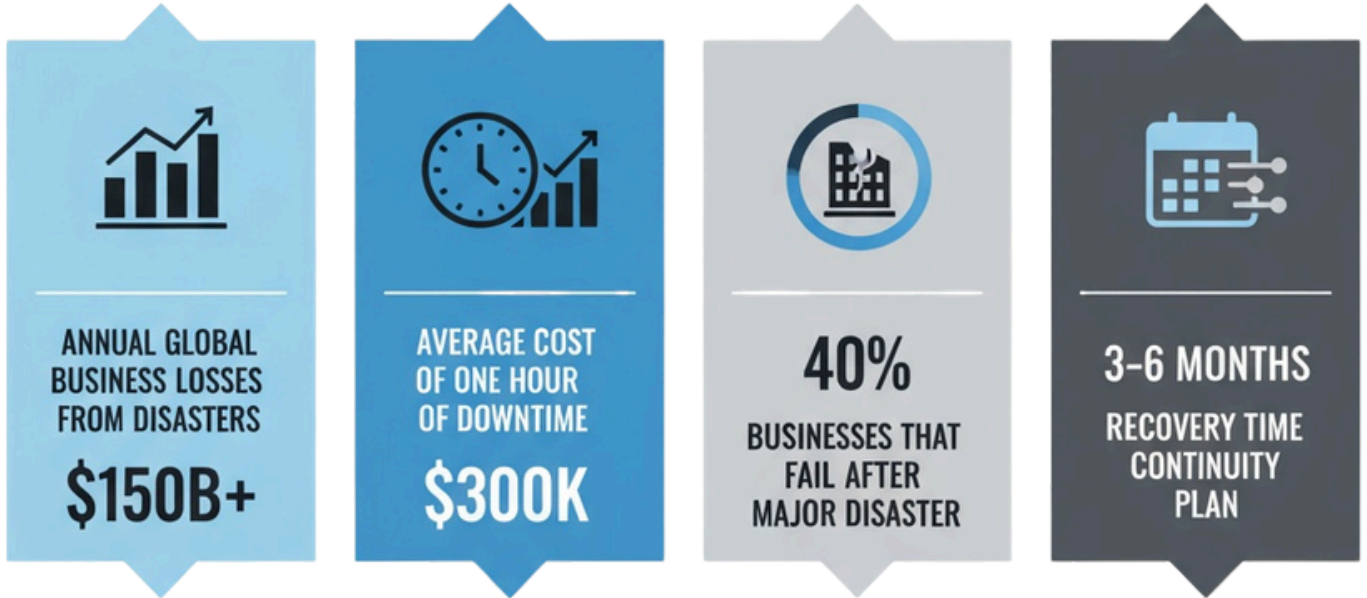

To empower communities, governments, and organizations to reduce disaster risks, build lasting resilience, and achieve sustainable development through innovative solutions, cutting-edge AI technology, and world-class expertise.

OUR VISION

A world where every community and organization is equipped, prepared, and resilient – where disaster risk is proactively managed, not reactively suffered.

WHY BUSINESS RESILIENCE MATTERS

RETURN ON RESILIENCE INVESTMENT

OUR SOLUTIONS

1. RISK ASSESSMENT & MANAGEMENT

For Government

- National & regional multi-hazard risk assessments
- National Risk Register development & management
- Critical infrastructure vulnerability analysis
- Public safety & emergency preparedness planning
- National risk reduction strategies aligned with Sendai Framework

For Private Sector

- Enterprise risk assessment for facilities & operations
- Supply chain vulnerability analysis
- Financial risk modelling & insurance optimization
- Data-driven risk analytics & reporting dashboards
- Real-time risk monitoring systems

2. BUSINESS CONTINUITY & CRISIS MANAGEMENT

For Government

- National emergency operations center design & implementation
- Inter-agency coordination protocols & frameworks
- Public crisis communication strategies
- Post-disaster recovery planning & implementation
- Crisis simulation exercises & tabletop exercises

For Private Sector

- Business Continuity Planning (BCP), development, testing & maintenance
- Recovery Time Objective & Recovery Point Objective optimization
- Crisis management center establishment
- Emergency response protocols & team activation procedures
- Business Impact Analysis (BIA) & continuity strategy development

3. AI-POWERED TECHNOLOGY SOLUTIONS

For Government

- Early warning systems for natural & operational hazards
- Predictive analytics & AI-driven risk forecasting
- Real-time monitoring via IoT sensor integration
- Digital decision support platforms for emergency management
- Automated incident management & reporting systems

For Private Sector

- Cloud-based resilience management platforms
- AI risk assessment dashboards & visualization tools
- Geospatial risk mapping (GIS, Remote Sensing)
- Cybersecurity risk integration
- Digital twin modelling for critical infrastructure

OUR SOLUTIONS

4. GOVERNANCE & POLICY ADVISORY

For Government

- Risk governance framework development
- National DRR policy formulation & legislative advisory
- Inter-ministerial coordination mechanisms
- Public-private partnership frameworks
- Sendai Framework voluntary reporting & monitoring

For Private Sector

- Corporate governance & enterprise risk management frameworks
- ESG advisory, sustainability strategy & TCFD alignment
- Compliance & regulatory alignment
- Board-level risk advisory & governance training
- ISO 31000 risk management implementation

5. CAPACITY BUILDING & TRAINING

For Government

- National emergency management training programmes
- First responder and first aid training
- Public sector leadership development in DRR
- Community resilience & gender-inclusive DRR training
- Sendai Framework awareness & implementation training

For Private Sector

- Executive crisis management training
- Business continuity awareness programmes
- Emergency response team development
- First aid & emergency response training for corporate staff & field teams
- Industry-specific risk management training
- Tabletop exercises & full-scale simulations

6. ESG & SUSTAINABILITY ADVISORY

For Government

- National sustainability strategy development
- SDG alignment, tracking & voluntary national reviews
- Climate adaptation & mitigation planning
- Green economy transition advisory
- Climate risk disclosure frameworks

For Private Sector

- ESG risk assessment & reporting (TCFD, GRI, SASB)
- Sustainability strategy development & implementation
- Stakeholder engagement frameworks
- Corporate social responsibility (CSR) integration
- Climate risk quantification & scenario analysis

OUR SOLUTIONS

RESILIENCE

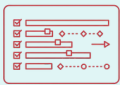

7. SUPPLY CHAIN RESILIENCE

For Government

- National supply chain security assessment
- Strategic reserves & logistics continuity planning
- Import/export vulnerability analysis
- Critical supply chain infrastructure protection
- Regional supply chain risk coordination

For Private Sector

- End-to-end supply chain risk mapping & analysis
- Supplier vulnerability assessment & diversification strategies
- Alternative sourcing & logistics continuity planning
- Multi-tier supply chain visibility systems
- Supply chain stress testing & scenario modelling

8. PROJECT MANAGEMENT SERVICES

For Government

- National resilience programme management
- Infrastructure development project oversight
- Multi-stakeholder & donor-funded project coordination
- Monitoring, evaluation & learning (MEL) frameworks
- Results-based management & reporting

For Private Sector

- Resilience transformation project management
- Technology implementation oversight
- Change management & organizational transition
- Quality assurance & compliance monitoring
- Milestone-based delivery & performance management

9. ECONOMIC FEASIBILITY STUDIES & CONSULTING

For Government

- National infrastructure investment feasibility
- Cost-benefit analysis of DRR investments
- Economic impact assessments of disasters & risk reduction
- PPP financial modelling & risk financing
- Risk-informed investment prioritization

For Private Sector

- Business expansion feasibility studies
- Investment risk assessment & market entry analysis
- ROI modelling for resilience investments
- Financial viability assessments
- Cost-benefit analysis of risk mitigation measures

OUR SOLUTIONS

10. ORGANIZING & MANAGING CONFERENCES & SEMINARS

MORVA designs and executes high-impact international conferences, technical workshops, expert seminars, and stakeholder forums. Our team manages all aspects – from strategic agenda design and speaker curation to logistics, facilitation, and post-event reporting – ensuring every event delivers measurable outcomes.

Our conference services include:

- International conference organization & management aligned with DRR objectives
- Regional Platforms for Disaster Risk Reduction (Arab Region experience)
- Specialized exhibitions, trade fairs & public event organization
- Technical workshops, expert seminars & multi-stakeholder forums
- Community engagement events & public awareness campaigns
- Virtual, hybrid & in-person event management
- Post-event analysis, documentation & lessons learned

11. MINE RESILIENCE & EXPLOSIVE REMNANTS of WAR (ERW) MANAGEMENT

For Government

- Landmine & ERW contamination mapping and national risk register integration
- Mine risk assessment at national & sub-national level
- Socioeconomic impact analysis of mine-affected communities and land
- Land release prioritization, clearance feasibility & post-clearance certification
- Mine Risk Education (MRE) programme design & community awareness campaigns
- Victim assistance frameworks & survivor support integration into DRR plans
- Mine action coordination with national authorities, UNMAS & international partners
- GIS-based contamination mapping, hotspot identification & monitoring systems

For Private Sector

- ERW risk assessment for infrastructure, energy & construction projects in post-conflict zones
- Supply chain & logistics route safety assessment through mine-contaminated areas
- Insurance and liability risk advisory for operations in mine-affected regions
- Business continuity planning for companies operating in ERW-risk environments
- Workforce safety protocols & mine risk awareness training for field staff
- Due diligence & environmental impact assessment in conflict-affected project sites
- Stakeholder & community engagement for projects in mine-affected areas

12. ENVIRONMENTAL IMPACT ASSESSMENT & ADVISORY

For Government

- National environmental risk profiling & hazard-environment interaction analysis
- Environmental Impact Assessments (EIA) for infrastructure & development projects
- Strategic Environmental Assessment (SEA) for national & regional policies and plans
- Climate change vulnerability & environmental risk mapping
- Post-disaster environmental damage assessment & recovery planning
- Environmental compliance advisory aligned with national legislation & international standards
- Green infrastructure & nature-based solutions for disaster risk reduction

For Private Sector

- Environmental Impact Assessment (EIA) for private sector projects & investments
- Environmental due diligence for real estate, energy & industrial projects
- Environmental risk management frameworks & monitoring systems
- Regulatory compliance advisory (national & international environmental standards)
- Environmental liability assessment & risk mitigation for investors
- Sustainability & environmental performance reporting (GRI, TCFD, ISO 14001)
- Environmental site assessments & contamination risk studies

KPI tracking, lessons learned, plan updates & re-testing cycles

4. Monitoring & Improvement

MORVA'S RESILIENCE METHODOLOGY PHASES

1. Business Impact Assessment

Understand operations, critical functions, dependencies & exposure

2. Risk Profiling & Analysis

Multi-hazard risk scoring, vulnerability mapping & scenario analysis

Strategy & Implementation

Develop, test & deploy resilience plans, BCPs & response protocols

THE MORVA ADVANTAGE

VALUE DELIVERED TO OUR CLIENTS

For Government & Public Sector

- Reduced disaster casualties and economic losses
- Evidence-based policies aligned with international standards
- Enhanced emergency response and operational readiness
- Strengthened inter-agency coordination and governance
- SDG & Sendai Framework progress tracking & reporting
- Improved public confidence, trust and government credibility
- Optimized public investment in resilience infrastructure

For Private Sector & Business

- Minimized downtime — 40–60% faster operational recovery
- Protected revenue streams and market position during crises
- 15–25% reduction in insurance premiums through certified BCPs
- Competitive advantage through proven resilience credentials
- ESG & regulatory compliance (TCFD, GRI, ISO standards)
- Supply chain continuity and supplier risk visibility
- Investor confidence through demonstrated risk governance
