

SMART.

Enhance it. Transform it.

Meet the SMART AM60 Upgrade Module

Old tech? New tricks.

Upgrade, accelerate, and extend your SMART Board® with the **SMART AM60 OPS upgrade module** – the plug-and-play appliance that gives your display a second life. Get faster load times, modern widgets, and Google app access while protecting your investment. With OTA updates, the AM60 makes sure your display stays powerful, supported, and ready for the future.

Android Upgrade

Get the latest Android OS, full Google Apps, and Google Play Store access so you can keep using the tools you love.

- ✓ Google Mobile Services
- ✓ Android OTA updates
- ✓ New built-in widgets

Easy Installation

Installation is clutter-free with no extra cables. Just slide the AM60 into your OPS slot and you're ready to go.

- ✓ Plug-and-use install
- ✓ Boosted performance
- ✓ Modernized ports (USB-C)

Refresh For Less

At a fraction of the cost of buying new, it's the quick and affordable way to give your trusted display new life.

- ✓ Affordable refresh
- ✓ Remote management
- ✓ Secure data protection

From slow, to whoa.

Wondering if your legacy displays qualify? You can upgrade SMART Boards with IQ as far back as 2015 including models like the 6000 series with DVIT. If you're not sure about your model, our expert team can help you confirm.
