

Reducing complexity,

Creating space for innovation,

Strengthening cooperation

I provide tailored, collaborative, and methodically sound support to help organisations navigate change in a structured manner.

Changes in the working environment can be challenging for everyone involved. Structures evolve, work processes require redefinition, and new technical solutions must be adopted. Additionally, complex interdependencies can make it difficult to assess the impact of decisions.

» Let me be your additional resource, helping you prepare for and support change projects in a structured manner to ensure their successful implementation.

**process management
consulting**

Lidia Grabe

Use Cases

Improve existing processes

Would you like to make your business processes more **efficient**? Are you considering **automating** process steps, perhaps through **AI** implementation?

» Let us collaborate to analyse your current processes and develop target process models!

~

Design new processes

Are you experiencing significant changes in your organisation, such as **reorganising** structures, teams, and responsibilities?

» Let us work together to design, visualise, discuss, and test your new business processes in alignment with your strategic goals!

~

Document established processes

Would you like to document business processes to facilitate **knowledge transfer** during staff changes or to establish **role-based structures**?

» Let us collaborate to thoroughly document your current processes!

Apply process knowledge

Would you like **workshops** on process management tailored to your organisation? Or perhaps **expert support** for your technical questions?

» In either case, I am here to help with my services!

~

Bridging the gap between business+IT

Do you offer software products and require an additional resource to capture **customer requirements**, thereby facilitating **technical implementation**?

» Let me help bridge the gap between business and IT through process models!

~

Structure digital transformation projects

Would you like to initiate digital transformation projects and require support, for example, to **capture requirements** for IT tools or analyse your **current situation**?

» Let us work together to plan and structure your projects with a process-oriented approach from the outset!

Phases of Collaboration

1 First contact

Please contact me by email or phone. We will arrange a meeting - digital or, if possible, in person - for a non-binding, detailed discussion.

2 Clarifying the initial situation and scoping

In an in-depth discussion, we will analyse your current situation together, identify existing challenges, and define your desired outcomes for our collaboration. I will then prepare a tailored proposal for you.

3 Assignment and service provision

Does my proposal appeal to you? Once confirmed, we can get started. Through an iterative process, characterised by close collaboration and continuous feedback, I will deliver the agreed services.

4 Conclusion

Once the service is complete, we will have a final discussion about the results of the assignment, its impact, and the value you have gained from our collaboration.
