General Information

Delivery of advertising material

Deadlines, guidelines and specifications must be observed

Terms of delivery

Standard advertising formats: 5 working days before campaign start

Special advertising formats: 10 working days before campaign start

AS24 Newsletter: 3 working days (Tuesday) before sending (Friday)

campaignmanagement@autoscout24.com

Non-compliance with our specifications/ late delivery

In the case of advertising material that was not produced according to the following specifications or in the case of advertising material that is delivered late, we do not guarantee that the campaign will start on time or that the booked service will be achieved.

Subsequent removal of advertising material

Upon delivery, the advertising materials are subjected to a check to see if they meet the specifications. Should problems arise after the start of the campaign, AutoScout24 Media reserves the right to remove advertising material partially or completely.

Possible reasons for this can be:

- Large number of complaints from our users
- the advertising medium interferes with the performance of the page or the use of the end device
- Subsequent changes to external advertising materials without prior consultation that contradict our specifications

Notes on HTML5 Ads 1/3

Delivery as Redirect

Delivery of HTML5 ads as redirect

The delivery can be made as a redirect (JavaScript-/ iFrame-tag). The redirect, as well as all built-in contents, trackers & redirects must be HTTPS-capable (secure: <https://www...>). Customer/agency tracking must be completely installed. In order to guarantee click measurement on our part, the support of an AdServer click measurement placeholder ("Clicktracker") is required (e.g. AdTAG: `<script src="https://www.adserverxyz.de/ads.min.js?click=%%CLICKTRACKER%%"></script>`). Redirects from third-party vendors must read the IAB TCF consent string or enable a possibility for transfer via placeholders (e.g. `${GDPR}` and `${GDPR_CONSENT_XXXX}`).

Overview of supported third-party providers for redirects:

On-Site Bookings: <https://support.google.com/admanager/answer/177366?hl=de>

Audience Extension Bookings: <https://support.google.com/displayvideo/answer/2782676?hl=de>

File weight

PC-Web/ Tablet: Max. 250 KB¹ | Smartphone: Max. 50 KB¹ | Subload: Max. 2 MB

For further information (e.g. compression, click-tag integration, streaming) please refer to [IAB-Standards](#). We also recommend using [IAB LEAN guidelines](#) incl. Initial- and Subload.

We reserve the right to change the HTML5 specifications without prior notice

1) Exact specifications See corresponding format

Notes on HTML5 Ads 2/3

Delivery of a physical ad

Delivery of physical HTML5 ads

Delivery can also be made as a ZIP file, in which any number of graphics, CSS, JavaScript and other files can be used. All content must be included in an index.html file. Only creatives that are IAB-HTML5 compliant will be accepted. For more information, click [here](#).

Important: A clickTag variable must be used in the JavaScript code of the ad. Example:

```
<head>
  <meta name="ad.size" content="width=300,height=250">
  <script>
    var clickTag = "http://www.targetwebsite.de";
  </script>
</head>
```

Linking on an image:

```
<a href="javascript:window.open(window.clickTag)">
  
</a>
```

Note: Please note that for physical HTML5 ads, only 1x1 pixels can be delivered as tracking URLs. Third-party SCRIPT tags cannot be used. It is also recommended to define a META tag with ad.size. More information can be found [here](#). When including external resources, make sure that they are enabled for cross-domain access on the server side. Use only JS frameworks or external fonts with low file weight. Animations should be as resource-efficient as possible.

Notes on HTML5 Ads 3/3

Delivery of an ad

Ad Format	Physical HTML5 ads	HTML5 ads as redirect
Leaderboard	x	x
(Mobile) Medium Rectangle	x	x
(Wide) Skyscraper	x	x
Lightbox Ad	x	x
Halfpage Ad	x	x
Masthead	x	x
Mobile Banner	x	x
(Double) Sitebar		x
Masthead Reminder	x	x
Detailpage Branding		x
(Mobile) Understitial		x
Gallery Ad	x	x
Homepage Takeover Hero Ad	x	x
Homepage Takeover Skin Ad		x

General Technical Guidelines 1/3

Advertising material must meet technical requirements

CPU load

The ad may not use the main thread for more than 60 seconds or 15 seconds in any 30-second window. Find more information regarding Heavy Ads [here](#).

Background Colours

The CI color of AutoScout24 (#F5F200) is not allowed.

Flexible or Responsive Ads

The term “responsive” refers to flexible ad sizes [as defined by the IAB](#). The Sitebar creative can have a vertical aspect ratio of 1:4, 1:3 or 1:2. Rich Media creative hosting vendors or HTML5 authoring tools call them Interstitial (Google), Deluxe Banner (Sizmek), Fully-Fluid™ (ResponsiveAds) or dynamic/scalable. Please ask your vendor for assistance in providing IAB-compliant flexible ads for the Dynamic Sitebar ad format.

HTML5

HTML5 advertising material can be delivered via redirect or physically. Comprehensive information on HTML5 advertising material can be found [here](#).

Links

Links in the creative must open in a new window.

General Technical Guidelines 2/3

Advertising material must meet technical requirements

Performance & availability of advertising material

If 3rd party systems are used to (re-)load content, it must be ensured that these systems provide high availability and performance even under heavy load. If we detect availability or performance problems, we must stop the corresponding campaign. In this case, the risk of non-performance is borne by the advertising customer.

Plug-in / Codec

In order to display the advertising material, the advertising material must not prompt the user to first install a plug-in or codec.

Postmessage

Please note that the Devices are not loaded at the same time. In order to enable synchronous animation, the animation may only start once all Devices have been loaded completely. Please take this into account when programming.

Sound

The sound may only be activated by user interaction (click on button "Sound on" or a unique symbol). It must be possible to deactivate the sound at any time. Sound must not last longer than 30 seconds and must not be repeated. The maximum volume must not exceed -12dB.

SSL-compliant (HTTPS)

All destination URLs, tags, redirects and pixels contained therein must be SSL compliant (HTTPS).

General Technical Guidelines 3/3

Advertising material must meet technical requirements

Streaming and Initial-/Subload

The file accessing the stream/subload download must meet our file weight specifications. For videos with stop function, the stream must be closed as soon as the user clicks Stop.

Validity

Only the performance metrics recorded by the Ad Server of AutoScout24 Media are relevant for the fulfillment of the campaign.

Video integration

Video material can be integrated as “adaptive streaming” in the following formats: (Mobile) Medium Rectangle, Masthead, Halfpage Ad, Sitebar, Double Sitebar, Understitial. For this purpose, an MP4 file must be provided for hosting. Alternatively, the finalized creative can also be delivered as HTML5 redirects.

Display Advertising Guidelines on AutoScout24 1/3

Advertising material must meet design requirements

Principle

AutoScout24 is a well-known and trustworthy brand that must be considered and respected by our advertising partners. Although we are open to new creative ideas, we must ensure that the ads are appropriate for our users and are not in conflict with our content and branding.

The following points should be considered for display advertising:

- No influence on the performance of AutoScout24
- No contradictory statements about the AutoScout24 brand and its content
- No opening of a new browser window (Pop-up)
- No Devices with autoplay
- No link to competitors of AutoScout24
- No offensive or degrading content
- No unexpected or misleading functions (e.g. Window system message or other Windows symbols)
- No installing, copying or downloading of programs

Display Advertising Guidelines on AutoScout24 2/3

Advertising material must meet design requirements

Animation

Animation is not always permitted (see single format). The length of the entire animation must not exceed 30 seconds. The animation may have a maximum of 3 loops. The sound may only be played after user interaction.

Content

Use a simple and focused message across the entire ad.

The legal notice must not be longer than two lines and the font size must not exceed 10.

Avoid redundant information.

Design

Choose a suitable call-to-action in the advertising material and make sure that it is not larger than ours.

Do not use AutoScout24 elements in your design.

Preserve our brand perception.

The colours should not conflict with our colour hierarchy.

The advertising material must be different from other parts of our site and stand out in colour (exception: Native Ads).

The advertising material must have a visible border.

Display Advertising Guidelines on AutoScout24 3/3

Advertising material must meet design requirements

Images

Use high-quality, professional images.

Use an image statement across the entire ad (especially for BrandDays, tandems, etc.) to complement your core message.

Create a homogeneous and qualitative image effect by using large and calm image motifs.

Logo

The advertiser's logo must not be the dominant visual element within the ad.

The logo may not be displayed at the end of an animation.

Other points

Too many elements (logo, call-to-action, image, etc.) in the advertising material are confusing for the user. We recommend a maximum of four elements.

By grouping the elements the attention of the visitors can be concentrated.

Make sure that all advertising texts of the ad are in a readable size.

Brand Safety at AutoScout24

100% **brand-safe** content

- > No **daily** news or negative reporting, e.g. about the automotive industry
- > Focus on **all topics related to mobility**

- Little ad clutter & high viewability
- Wide range of realization options for branding and performance campaigns
- Extensive & data protection compliant 1st Party Data

Our standards as a **premium publisher**

- Pleasant experience and relevant advertising for our users
- High-quality campaign environment for advertisers

Leaderboard

Description

The Leaderboard is one of the classic standard formats. It is characterized especially by its elongated format.

Devices

- Desktop, Tablet

Technical information

- Dimensions: 728x90 px
- File size: max. 150 KB initial¹
- File format: HTML5² /GIF/JPG

Medium Rectangle

Description

The Medium Rectangle is one of the classic standard formats. It is characterized by its compact, almost square dimensions.

Devices

- Desktop, Tablet

Technical information

- Dimensions: 300x250 px
- File size: max. 150 KB initial¹
- File format: HTML5² /GIF/JPG

(Wide) Skyscraper

Description

The (Wide) Skyscraper is one of the classic standard formats. It is characterized by its portrait format and remains sticky up to a certain scroll depth.

Devices

- Desktop, Tablet

Technical information

- Dimensions: 120x600 or 160x600 px
- File size: max. 150 KB initial¹
- File format: HTML5² /GIF/JPG

Lightbox Ad (Medium Rectangle)

Description

The Lightbox Ad consists of the standard format Medium Rectangle, which is prominently displayed in the Lightbox of the gallery.

Devices

- Desktop, Tablet

Technical information

- Dimensions: 300x250 px
- File size: max. 150 KB initial¹
- File format: HTML5² /GIF/JPG

Halfpage Ad

Description

The standard format Halfpage Ad is characterized by its wide portrait format and remains sticky to a certain scrolling depth.

Devices

- Desktop, Tablet

Technical information

- Dimensions: 300x600 px
- File size: max. 250 KB initial¹
- File format: HTML5² /GIF/JPG

Masthead

Description

The Masthead is characterized in particular by its large landscape format, which is placed close to the content

Devices

- Desktop, Tablet

Technical information

- Dimensions: 800x250 px or 970x250 px
- File size: max. 250 KB initial¹
- File format: HTML5² /GIF/JPG

Mobile Banner

Description

The Mobile Banner is one of the standard formats and stands out in particular for its compact landscape format.

Devices

- MEW, Apps

Technical information

- Dimensions: 320x100 px (Optional also 300x100 px possible)
- File size: max. 50 KB initial¹
- File format: HTML5² /GIF/JPG
- Resolution: Additional delivery in double Retina resolution possible

Mobile Medium Rectangle

Description

The Mobile Medium Rectangle is a versatile standard format that captures a large area of the screen on mobile devices.

Devices

- MEW, Apps

Technical information

- Dimensions: 300x250 px
- File size: max. 150 KB initial¹
- File format: HTML5² /GIF/JPG
- Resolution: Additional delivery in double Retina resolution possible

Medium Rectangle Multiscreen

Description

This format is a standard format which is available on all devices and characterized by its compact, almost square dimensions.

Devices

– Desktop, Tablet, MEW, Apps

Technical information

- Dimensions: 300x250 px
- File size: max. 150 KB initial¹
- File format: HTML5² /GIF/JPG
- Resolution: Additional delivery in double Retina resolution possible

AdBundle Multiscreen

Description

The AdBundle consists of the standard formats Leaderboard, (Wide) Skyscraper and Medium Rectangle Multiscreen, which are delivered depending on availability

Devices

- Desktop, Tablet, MEW, Apps

Technical information

- Dimensions: 728x90 px + 120x600/160x600 px + 300x250 px
- File size: max. 150 KB initial¹ per single format
- File format: HTML5² /GIF/JPG

Special Formats

Sitebar

Description

The Sitebar is displayed on the right-side of our website content. The size adapts flexibly to every display size.

Additional notes

- Safety area: upper $\frac{2}{3}$ of the ad
- Scaling limited to max. 600 px horizontally
- Creative needs to be responsive

Devices

- Desktop

Technical information

- Dimensions: 1:4, 1:3, 1:2 or 300x960 px¹
- File size: max. 250 KB initial²
- File format: HTML5³

1) Must meet the IAB specification for Flexibible ads (See [here](#)) 2) Max. 2 MB subload, more information on initial-sub-load [here](#) 3) Please be aware of the notes on [HTML5 ads as redirect](#) | See also [General Information](#)

Double Sitebar

Description

The Double Sitebar is displayed on the right- & left-side of our website content. The size adapts flexibly to every display size.

Additional notes

- Safety area: upper $\frac{2}{3}$ of the ad
- Scaling limited to max. 600 px horizontally

Devices

- Desktop

Technical information

- Dimensions: 1:4, 1:3, 1:2 or 300x960 px¹
- File size: max. 250 KB initial²
- File format: HTML5³

1) Must meet the IAB specification for Flexible ads (See [here](#)) 2) Max. 2 MB subload, more information on initial-sub-load [here](#) 3) Please be aware of the notes on [HTML5 ads as redirect](#) | See also [General Information](#)

Masthead Reminder

Description

This format includes a masthead with an integrated video. After "scrolling" the masthead, the video appears as a reminder at the bottom right corner of the browser¹.

Additional notes

- Please use the template for creation

Devices

- Desktop

Technical information

- Masthead: 970x250 px | max. 250 KB initial² | HTML5³/GIF/JPG
- Video Reminder (max. 30 Sek.): 400x225 px | max. 5 MB | MP4

¹) Outside the page content ²) Max. 2 MB subload, more information on initial-sub-load [here](#) ³) Please be aware of the notes on [HTML5 advertising material](#) | See also [General Information](#)

Detailpage Branding

Description

The Detailpage Branding consists of two "long" Halfpage Ads and a "wide" Masthead below the hero image.

Devices

- Desktop

Technical information

- Dimensions: 300x960 px (left & right Halfpage Ad) + 1120x250 px (Masthead)¹
- File size: max. 250 KB initial² per single format
- File format: HTML5³ /GIF/JPG

1) Alternatively, also 2x 160x800 px + 1120x90 px possible 2) Max. 2 MB subload, more information on initial-sub-load [here](#) 3) Please be aware of the notes on [HTML5 ads as redirect](#) | See also [General Information](#)

Listpage Branding

Description

The Listpage Branding consists of two "long" Halfpage Ads and a "wide" Masthead above the search results.

Devices

- Desktop

Technical information

- Dimensions: 300x960 px (left & right Halfpage Ad) + 1120x250 px (Masthead)¹
- File size: max. 250 KB initial² per single format
- File format: HTML5³ / GIF / JPG

¹) Alternatively, also 2x 160x800 px + 1120x90 px possible ²) Max. 2 MB subload, more information on initial-sub-load [here](#) ³) Please be aware of the notes on [HTML5 ads as redirect](#) | See also [General Information](#)

Mobile Rich Media

Description

Different images rotate automatically or through user interaction by means of various effects (e.g. cube, slide, fade, flip, coverflow).

Additional notes

- Creation via external service provider¹

Devices

- MEW, Apps

Technical information

- Image (min. 4): 640x480 px | max. 200 KB² | HTML5/GIF/JPG
- Video (max. 30 Sek., recommended 15-20 Sec.): 16:9 | max. 5 MB | MP4

¹) Weborama ²) per image | See also [General Information](#)

Mobile Slider Ad

Description

The Mobile Slider is a combination of image and text that can present different content thanks to automatically changing pictures.

Additional notes

- Creation via external service provider¹

Devices

- MEW, Apps

Technical information

- Images (min. 3): 614x216 px | max. 100 KB² | GIF/JPG/PNG/SVG
- Logo: 180x80 px | max. 100 KB | GIF/JPG/PNG/SVG
- Headline: max. 20 characters
- Text: max. 24 characters
- CtA: Learn more/ Request now/ Call now

¹) Weborama ²) per image | See also [General Information](#)

Mobile Video Ad

Description

The Mobile Video Ad consists of a video, text and a call-to-action. The video starts automatically and the sound starts with a click from the user.

Additional notes

- Creation via external service provider¹

Devices

- MEW, Apps

Technical information

- Video image: 640x360 px | max. 100 KB | GIF/JPG/PNG/SVG
- Video (max. 30 Sec., recommended: 15-20 sec.): 16:9 | max. 5 MB | MP4
- Headline: max. 20 characters
- Text: max. 24 characters
- CtA: Learn more/ Request now/ Call now

¹) Weborama | See also [General Information](#)

Canvas Ad

Description

Clicking on the start image opens the canvas, which consists of various "slides". Different media elements can be used for an appealing presentation.

Additional notes

- Creation via external service provider¹

Devices

- MEW, Apps

Technical information

- Starting screen: 300x250 px | max. 200 KB | GIF/JPG
- More „Slides“, e.g. with: images (max. 200 KB²), Videos (15-20 Sec., 16:9 | max. 5 MB | MP4), Text

¹) Weborama ²) per image | See also [General Information](#)

Native Content Ad

Description

This integration combines a text teaser with the customer logo. It fits harmoniously into the content of the detailpage.

Devices

- MEW, Apps

Technical information

- Logo: 240x240 px | max. 20 KB | JPG/PNG
- Headline (advertiser's name): max. 20 characters
- CtA: max. 40 characters

Shoppable Video Ad

Description

The Shoppable Video Ad consists of a video and matching product tiles. The video starts automatically and the sound starts with a click from the user. The tiles rotate automatically and on user interaction.

Additional notes

- Creation via external service provider¹

Devices

- MEW

Technical information

- Video image (optional): 16:9² | max. 50 KB | JPG
- Video (6-20 Sec.): 16:9² | max. 3 MB | MP4
- 6x Images: 640x440 px | max. 50 KB | PNG

¹) Weborama ²) 640x340 px recommended | See also [General Information](#)

Portrait Video Ad

Description

This format consists of a video, logo and a Call-to-Action button, which will be shown in the end of the video. The video starts automatically and the sound starts with a click from the user.

Additional notes

- Creation via external service provider¹

Devices

- MEW

Technical information

- Video image (optional): 4:5² | max. 150 KB | JPG
- Video (6-20 Sec.): 4:5² | max. 3 MB | MP4
- Logo: 1:1³ | max. 50 KB | PNG
- Call-to-Action Button: 16:3⁴ | max. 50 KB | PNG

Portrait Slider Ad

Description

The Portrait Slider Ad consists of 4 image tiles that rotate automatically and on user interaction. Different content/products can be presented in the images.

Additional notes

- Creation via external service provider¹

Devices

- MEW

Technical information

- Images (min. 4): 4:5² | max. 100 KB | JPG
- Logo: 1:1³ | max. 50 KB | PNG
- Call-to-Action Button: 18:5⁴ | max. 50 KB | PNG

Portrait Window Ad

Description

The Portrait Window Ad consists of 4 image tiles that rotate automatically and on user interaction. The images are also located as thumbnails below the tiles.

Additional notes

- Creation via external service provider¹

Devices

- MEW

Technical information

- 4 Images for main view: 1:1² | max. 100 KB | JPG
- 4 Images for thumbnail: 1:1² | max. 100 KB | JPG

¹) responsive Ads ²) 960x960 px recommended | See also [General Information](#)

Halfpage Ad Multiscreen

Description

The format consists of a sticky Halfpage Ad (desktop, tablet), which becomes visible on mobile devices (MEW) after scrolling the page.

Additional notes

- Background colouring possible with mobile variant (Hexadecimal code, e.g. #000000)

Devices

- Desktop, Tablet, MEW

Technical information

- Dimensions: 300x600 px
- File size: max. 150 KB initial¹
- File format: HTML5² /GIF/JPG

Understitial Multiscreen

Description

The format consists of a background image that only becomes visible when the page is scrolled. Additionally, a foreground image can be placed which scrolls along with the page.

Additional notes

- Be aware of the safety areas (See example)

Devices

- Desktop, Tablet, MEW, Apps

Device	Dimensions	File size	File format
Desktop	1024x1300 px	Max. 150 KB initial ¹	HTML5 ² /GIF/JPG
MEW	300x600 or 415x845 px	Max. 150 KB initial ¹	HTML5 ² /GIF/JPG
Apps	300x600 or 320x480 px	Max. 150 KB initial ¹	HTML5 ² /GIF/JPG
Foreground image (optional)	820x400 & 360x400 px	Max. 40 & 30 KB ¹	PNG (transparent)

1) Max. 2 MB subload, more information on initial-sub-load [here](#) 2) Please be aware of the notes on [HTML5 ads as redirect](#) | See also [General Information](#)

Video Understitial

Description

The Video Understitial consists of a video which becomes visible and starts to play by scrolling the page.

Additional notes

- Be aware of the safety areas (See example)

Devices

- Desktop, Tablet, MEW, Apps

Device	Dimensions	File size	File format
Desktop	1024x1300 px	Max. 150 KB initial ¹	HTML5 ² /GIF/JPG
MEW	300x600 or 415x845 px	Max. 150 KB initial ¹	HTML5 ² /GIF/JPG
Apps	300x600 or 320x480 px	Max. 150 KB initial ¹	HTML5 ² /GIF/JPG
Foreground image (optional)	820x400 & 360x400 px	Max. 40 & 30 KB ¹	PNG (transparent)

1) Max. 2 MB subload, more information on initial-sub-load [here](#) 2) Please be aware of the notes on [HTML5 ads as redirect](#) | See also [General Information](#)

Addendum Understitial & Video Understitial

Creative with safety area: Desktop + MEW

Addendum Understitial & Video Understitial

Creative with safety area: Apps

Multiscreen Slider Ad

Description

The Multiscreen Slider Ad consists of multiple ad formats. Each format contains several slides that rotate either automatically or through user interaction.

Available Ads

- Sitebar, Portrait Slider Ad, Masthead, Medium Rectangle Multiscreen

Devices

- Desktop, Tablet, MEW, Apps

4-5 slides per format

Book at least 2 formats¹

¹) At least one desktop and one mobile format | See also [General Information](#)

Addendum 1/2: Multiscreen Slider Ad

Additional Information and Technical Specifications

AutoScout24

Media

Additional notes

- Created by an external service provider¹
- 4–5 slides per format
- Provide the (dynamic) sidebar as an editable PSD file
- Place text, logo, and CTA in the center of the safe zone
- Relevant content must not overlap navigation elements

File sizes

images: max. 250 KB

Logo / CTA: max. 25 KB

PSD-Layers/Elements

background • text • logo • CTA • subject

Use JPG/PNG only where dynamic positioning is not required.

Technical Specifications

Format	Dimensions	Playback / Notes	File Format
Sitebar	800x2000 px	Center the subject (e.g., car) on the background PSD layers: background image, text, logo, CTA, subject (optional)	PSD
Portrait Slider Ad	4:5 (at least 800x1000 px)	Scales for high-resolution displays (MEW + apps)	PSD / JPG / PNG
Masthead	970x250 px alternatively: 800x250 px	Static Format for Desktop	PSD / JPG / PNG

Homepage Events

Guidelines for Homepage Events

Advertising material must meet all of the following requirements

Advertiser

Homepage events are bookable for car manufacturers, financing and insurance partners and aftermarket advertisers. Excluded is the advertising of OEM-exchanges and advertising of another marketplace - i.e. links from the Fireplace and Brand Box may not go to a page with integrated search.

Images

Use professional and high-quality photo motifs.
Use a picture statement over the entire display to complement your core message.

Design

Do not use AutoScout24 elements in your design.
The colors should not conflict with our color hierarchy.

Logo

The advertiser's logo must not be the dominant visual element within the ad and shouldn't be larger than the AutoScout24 logo.

Content

The legal notice must not exceed the font size of 10.

Homepage Takeover

Description

The format includes a hero ad for mobile devices and desktops on the homepage (web) and the home screen (apps).

Additional notes

- Please respect the safety areas for desktop, tablet, and MEW on the next page.

Devices

- Desktop, Tablet, MEW, Apps

Addendum Homepage Takeover: Hero Ad

Hero Ad-Creative with safety area

Desktop

Elements must not overlap the desktop safe zone. Content placed outside the tablet safe zone may be cropped on the left and right on some tablet devices.
