

A diagram of a scissor lift. It consists of a base with four wheels, a central scissor mechanism made of four interlocking triangles, and a rectangular platform at the top. Two stylized human figures are standing on the platform, one with arms raised. The entire device is shown on a horizontal ground line.

A diagram showing a crane lifting a load vertically. The crane's arm is extended horizontally, and the load is being moved upwards along a vertical track. Four upward-pointing arrows indicate the direction of motion.
