

Mitwirkung an folgenden wissenschaftlichen Publikationen:

N. Lügering, R. Stoll, A. Siekmann, J. Faulhaber, C. Heese, O. Dietrich, T. Kucharzik, H. Busch, A. Hasilik, W. Domschke.

Elevated levels of activities of β -hexosaminidase and α -mannosidase in human immuodeficiency virus-infected patients.

J. Inf. Dis. 171, 683-686 (1995)

M. Lancel, T. A. M. Crönlein, J. Faulhaber.

Role of GABAA receptors in sleep regulation: differential effects of muscimol and midazolam on sleep in rats.

Neuropsychopharmacology 15, 63-74 (1996)

M. Lancel, S. Mathias, J. Faulhaber, T. Schiffelholz.

Effect of interleukin-1 β on EEG power density during sleep depends on circadian phase.

Am. J. Physiol. 270, R830-R837 (1996)

M. Lancel, J. Faulhaber, F. Holsboer, R. Rupprecht.

Progesterone induces changes in sleep comparable to those of agonistic GABAA receptor modulators.

Am. J. Physiol. 271, E763-E772 (1996)

M. Lancel and J. Faulhaber.

The GABAA agonist THIP (gaboxadol) increases non-REM sleep and enhances delta activity in the rat.

NeuroReport 7, 2241-2245 (1996)

J. Faulhaber, A. Steiger, M. Lancel.

The GABAA agonist THIP produces slow wave sleep and reduces spindling activity in NREM sleep in humans.

Psychopharmacology 130, 285-291 (1997)

M. Lancel, J. Faulhaber, T. Schiffelholz, S. Mathias, R. Deisz.

Muscimol and midazolam do not potentiate each other's effects on sleep EEG in the rat.

J. Neurophysiol. 77, 1624-1629 (1997)

M. Lancel, J. Faulhaber, T. Schiffelholz, E. Romeo, F. di Michele, F. Holsboer, R. Rupprecht.

Allopregnanolone affects sleep in a benzodiazepine-like fashion.

J. Pharm. Exp. Ther. 282, 1213-1218 (1997)

M. Lancel, J. Faulhaber, R. Deisz.

Effect of GABA uptake inhibitor tiagabine on sleep and EEG power spectra in the rat.

Brit. J. Pharm. 123, 1471-1477 (1998)

J. Faulhaber, A. Femson, A. Hasilik.

Abnormal lysosomal sorting with an enhanced secretion of cathepsin D precursor molecules bearing monoester phosphate groups.

Eur. J. Cell Biol. 77, 134-140 (1998)

M. Lancel, J. Faulhaber, F. Holsboer, R. Rupprecht.

The GABAA receptor antagonist picrotoxin attenuates most sleep changes induced by progesterone.

Psychopharmacology 141, 213-219 (1999)

R. Rupprecht, M. Koch, A. Montkowski, M. Lancel, J. Faulhaber, J. Harting, R. Spanagel.

Assesement of neuroleptic-like properties of progesterone.

Psychopharmacology 143, 29-38 (1999)

F. M. Leweke, C. W. Gerth, D. Koethe, J. Faulhaber, J. Klosterkötter.

Oxcarbazepin as an adjunct for schizophrenia.

Am. J. Psychiatry 16, 1130-1131 (2004)

A. Giuffrida, F. M. Leweke, C. W. Gerth, D. Schreiber, D. Koethe, J. Faulhaber, J.

Klosterkötter, D. Piomelli.

Cerebrospinal anandamide levels are elevated in acute schizophrenia and are inversely correlated with psychotic symptoms.

Neuropsychopharmacology 29, 2108-2114 (2004)
